User guide

School Management System

How to find your way around the system, step by step, for students, teachers, HR staff and administrators.

October 2026 edition. The screenshots use made-up demonstration data; names and numbers in your school will differ.

How to use this guide

Everyone starts with **Part 1, Getting started**. It covers signing in, finding your way around and the features every account has. Then go to the part for your role:

Part 1 · Getting started (everyone)

Signing in and resetting a password
The main screen and menu
Notifications
Your profile and logging out
Using a phone
Forum, and Help and FAQ

Part 2 · Students

Finding your activities
Handing in an assignment
Taking a quiz or examination
Results, grades, attendance and awards

Part 3 · Teachers

Your classes and subjects
Creating, publishing and closing activities
Adding exam questions
Grading work and computing grades
Attendance, awards, reports, analytics
Moderating the forum

Part 4 · HR staff

Teacher records
Assigning teachers to classes
Reports

Part 5 · Administrators and super admins

User accounts
Students
Academic years, classes and subjects
Enrolling students
Grading settings, awards, announcements, FAQ
Audit trail

Appendix

Who can do what

Reading the screenshots

A **red outline** marks the button or link to click for that step.

Words in **blue bold** are the exact labels you will see on screen, such as buttons, menu items and page titles.

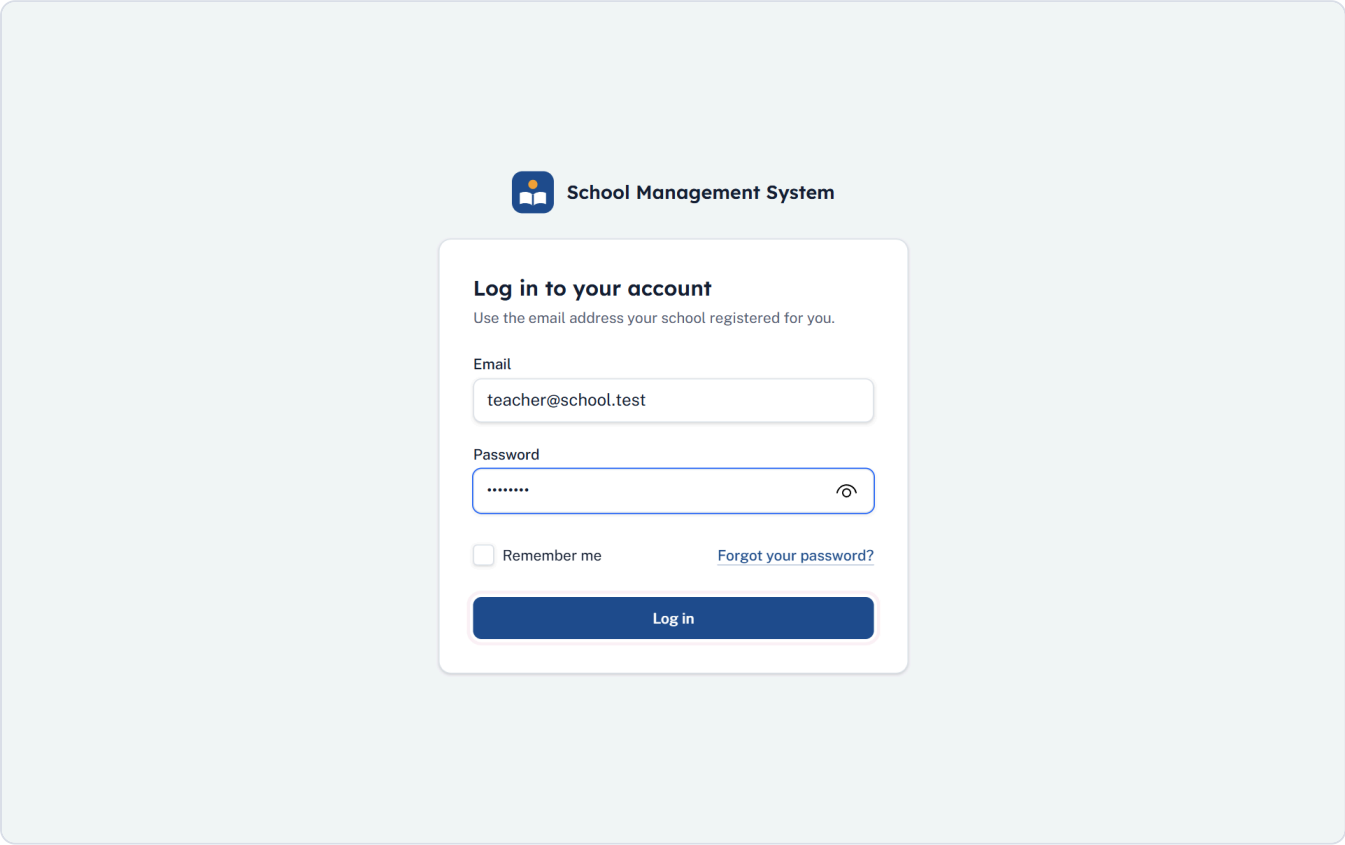

> You only see the menu items and buttons your role is allowed to use. If something in this guide is missing from your screen, it belongs to another role, or the school has not given you that permission. Ask your administrator.

Part 1 · Getting started

Everyone

1.1 Sign in

1. Open the school's address in your web browser and click **Log in**.
2. Enter the **email** and **password** your school gave you.
3. Click **Log in**. You arrive on your **Dashboard**.

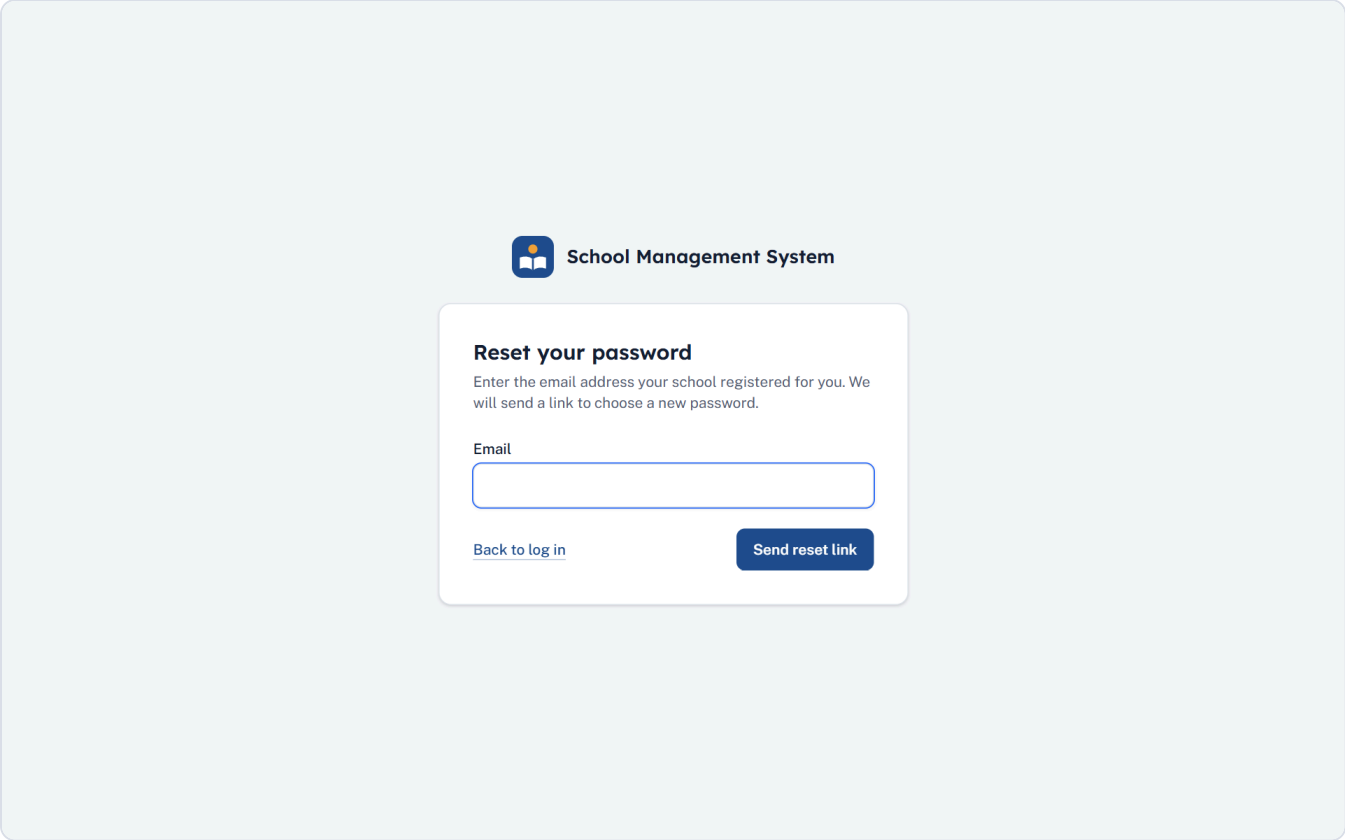

The sign-in page.

> Accounts are created by the school. If you see "This account has been deactivated", contact the school administrator. After several wrong passwords in a row, wait a minute before trying again.

1.2 Forgot your password

1. On the sign-in page, click **Forgot your password?**
2. Enter your email and send the link.
3. Open the email, follow the link and choose a new password.

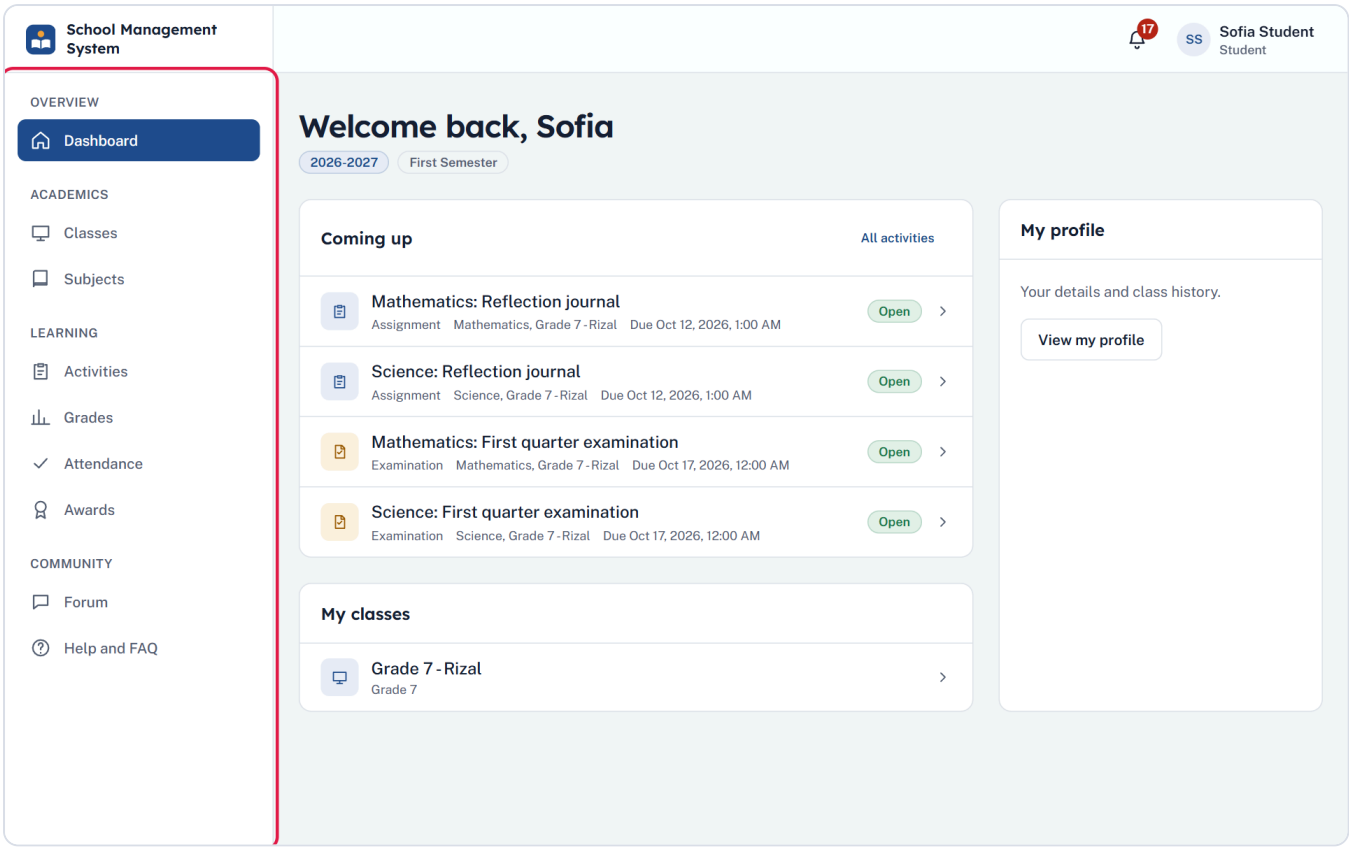

Requesting a password reset link.

1.3 The main screen

Every page has the same frame:

- **Menu on the left**: the modules you can use, grouped into Overview, People, Academics, Learning, Community and Administration. The page you are on is highlighted.
- **Bell at the top right**: your notifications. A red number shows how many are unread.
- **Your name at the top right**: the account menu.
- **The Dashboard**: a summary of what matters for your role. Students see upcoming work, teachers see their classes, administrators see school-wide figures.

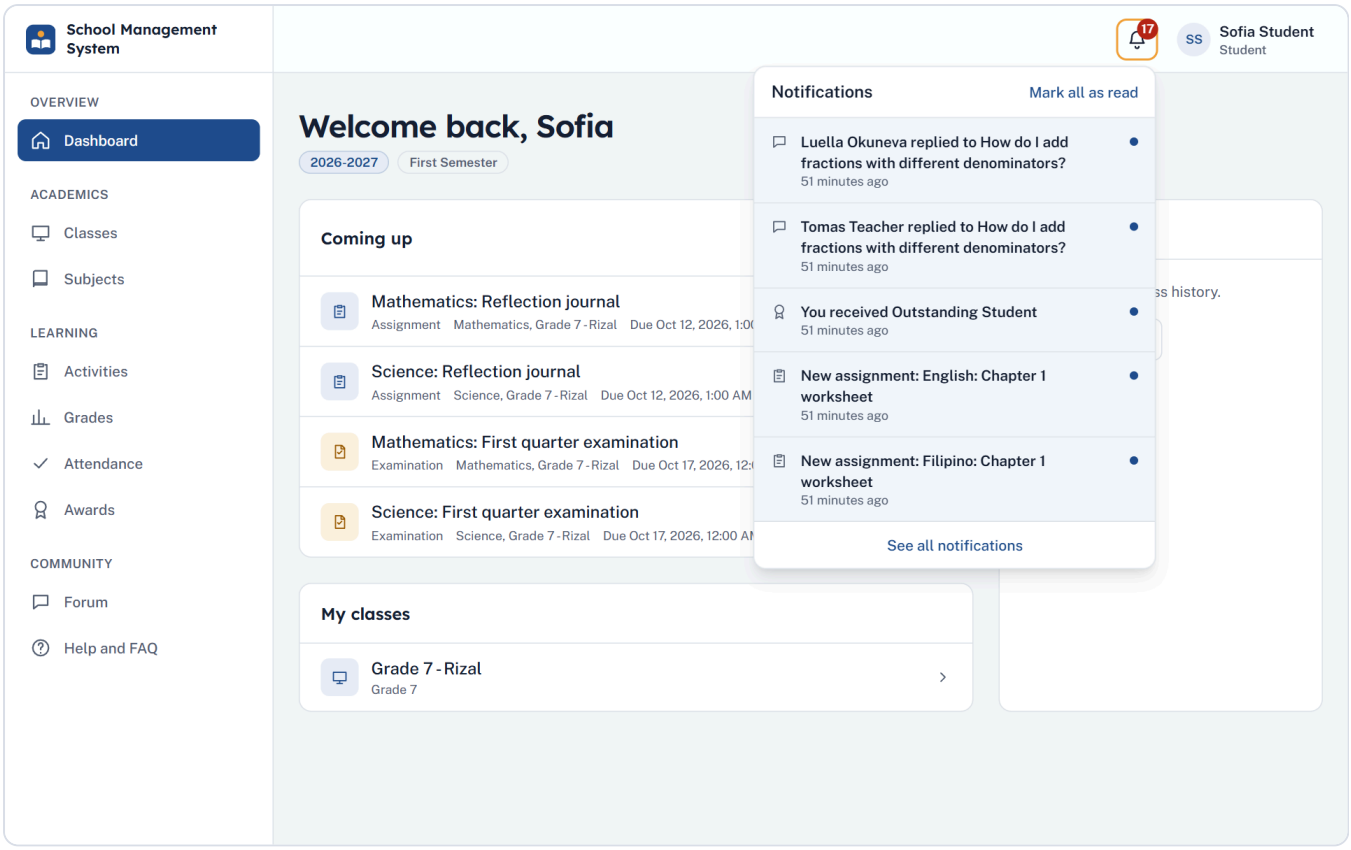

A student's dashboard. The menu (outlined) only lists the modules this account can use.

1.4 Notifications

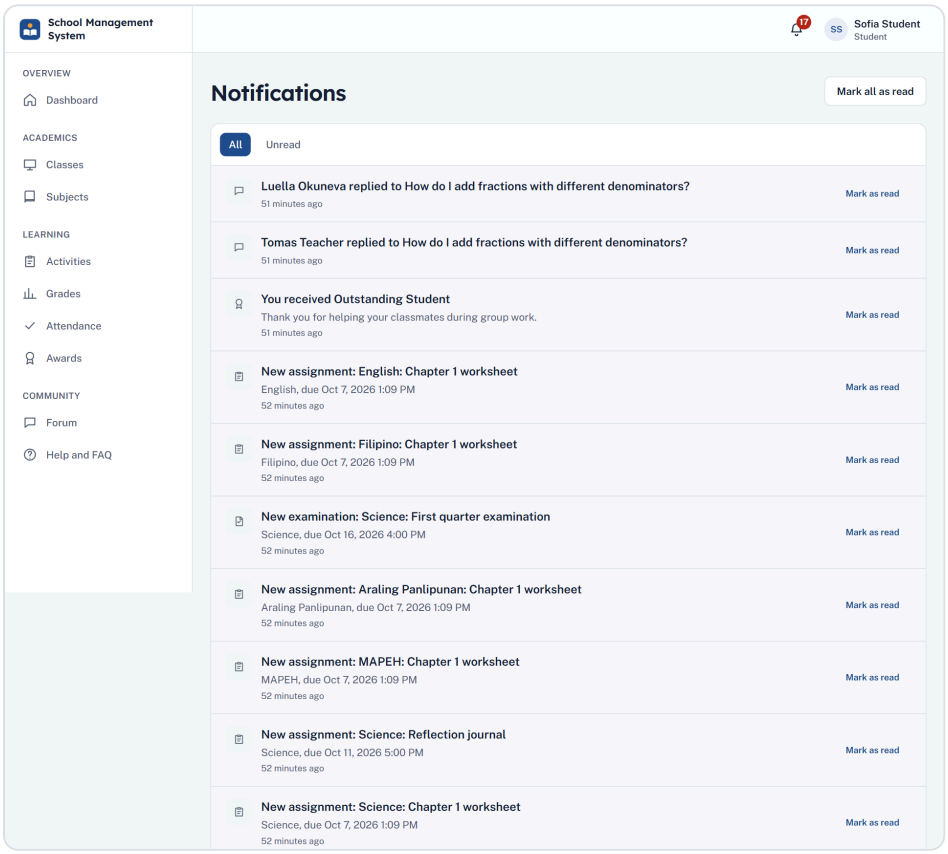

The system tells you when something needs your attention:

- a new activity is published;
- work is handed in or graded;
- exam results are ready;
- you receive an award or a teaching assignment;
- someone replies to your forum topic;
- the school sends an announcement.

1. Click the **bell** to see the latest notifications. Click one to go straight to its page; it is then marked as read.
2. To see all of them, open **Notifications** from the bell. Use **All** or **Unread** to filter.

The bell menu with the latest notifications.

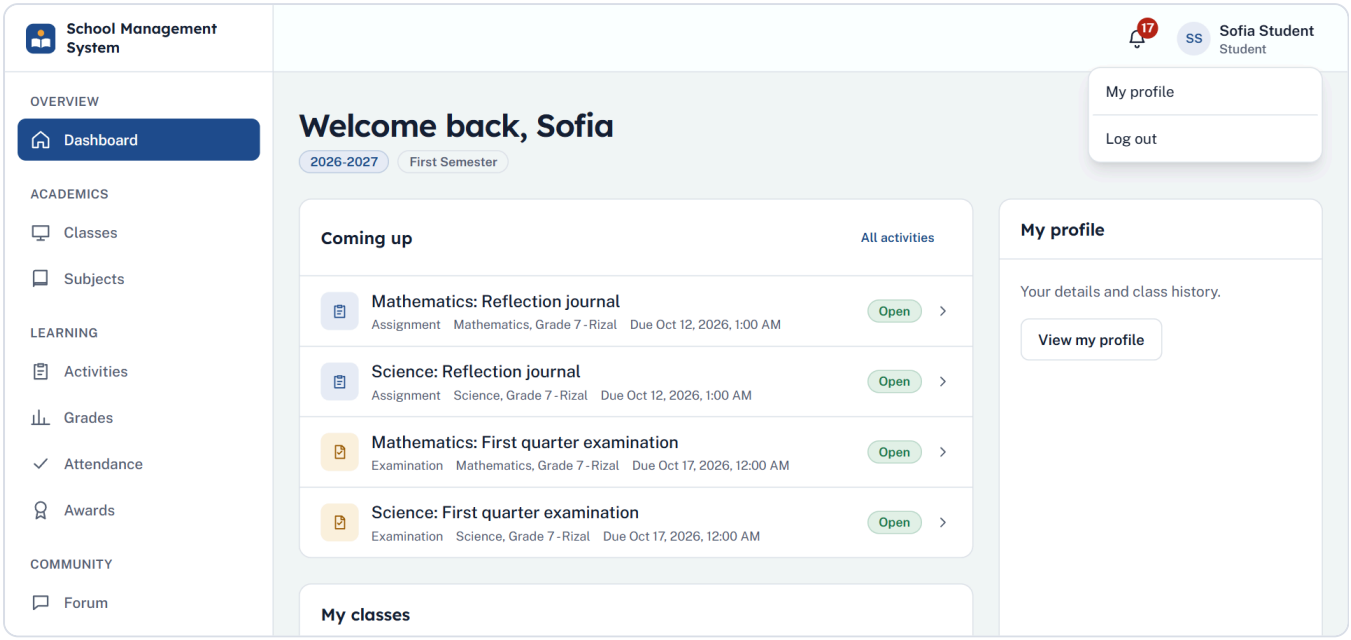

The full notifications page.

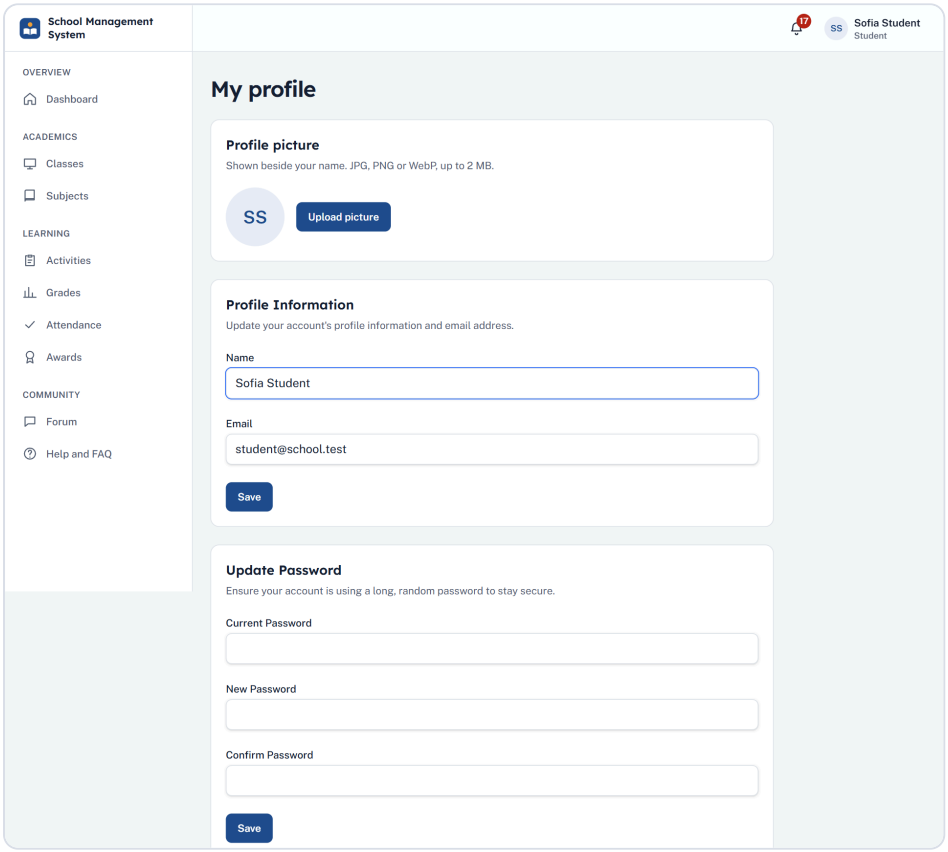

1.5 Your profile and logging out

1. Click **your name** at the top right.

2. Choose **My profile** to change your name, email, password or profile picture.
3. Choose **Log out** when you finish, especially on a shared computer.

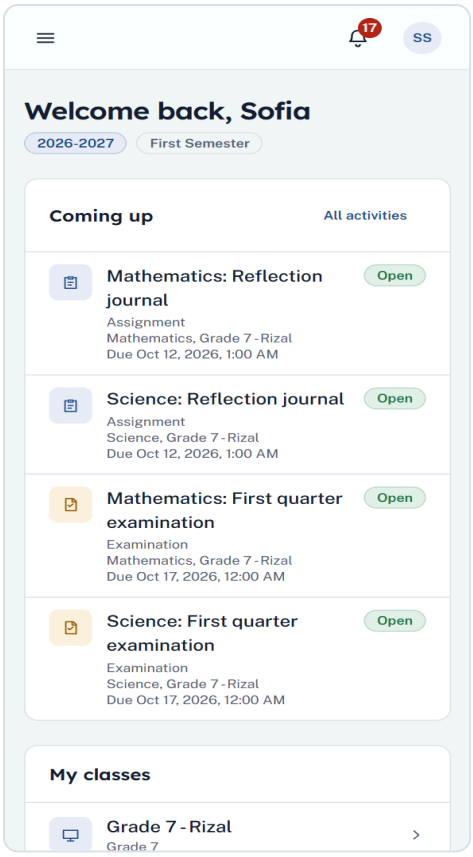

The account menu.

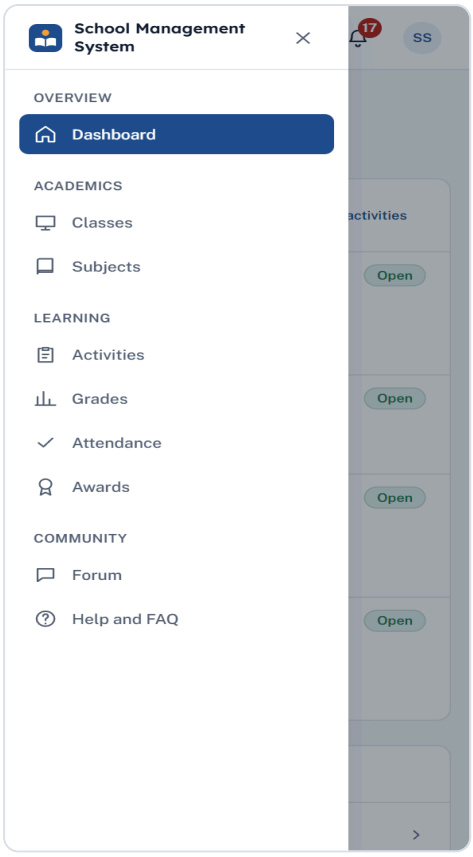

My profile: personal details, profile picture and password.

1.6 Using a phone

The system works on phones and tablets. On a small screen the menu is hidden: tap the **menu button** (three lines, top left) to open it, and the × to close it.

Dashboard on a phone.

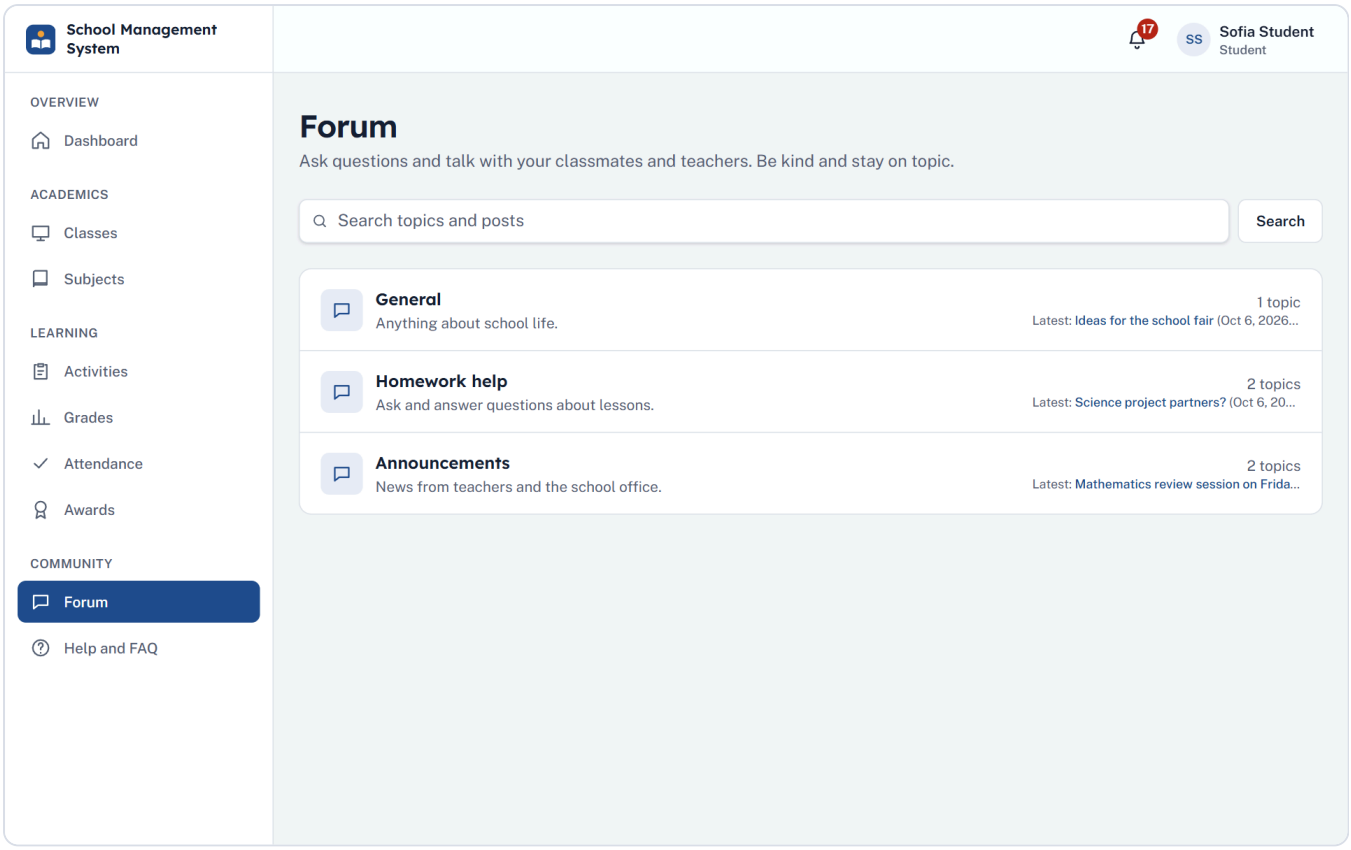

The menu opened.

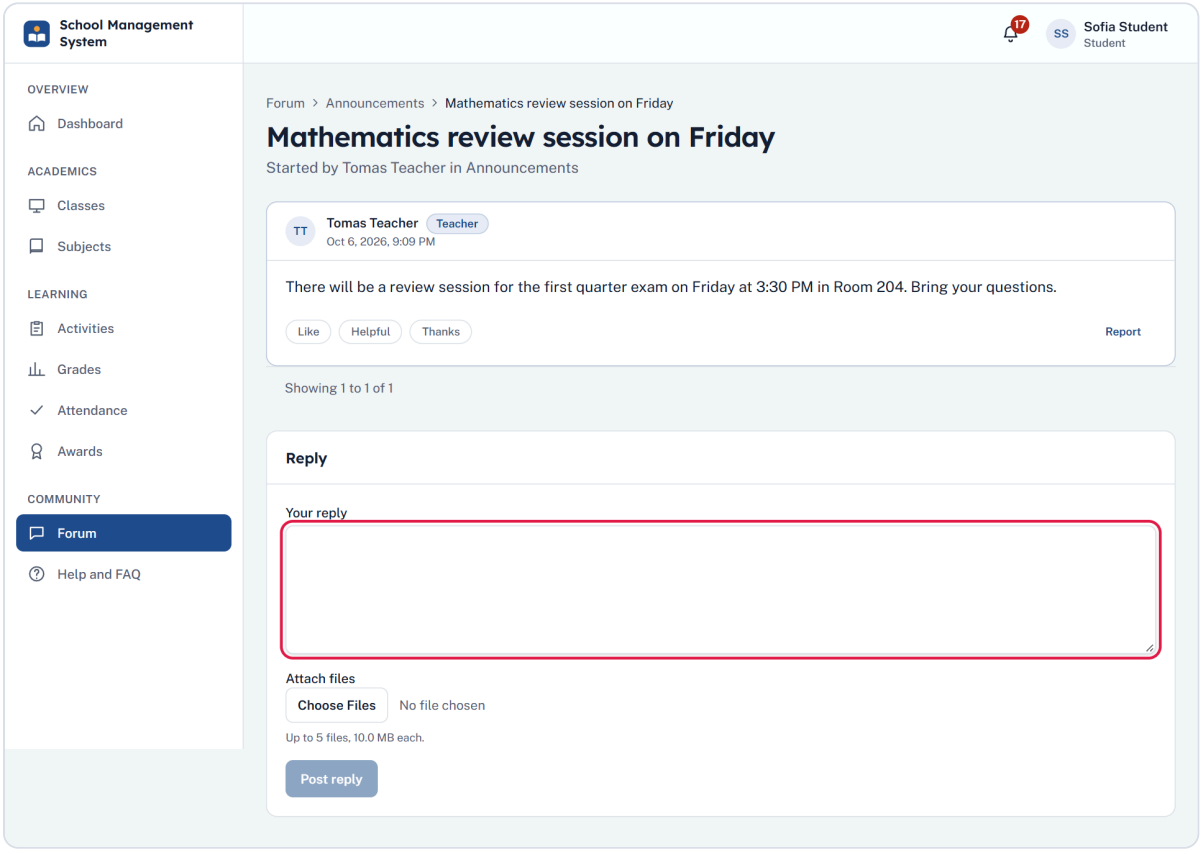

1.7 Forum

The forum is for questions and discussion between students and staff.

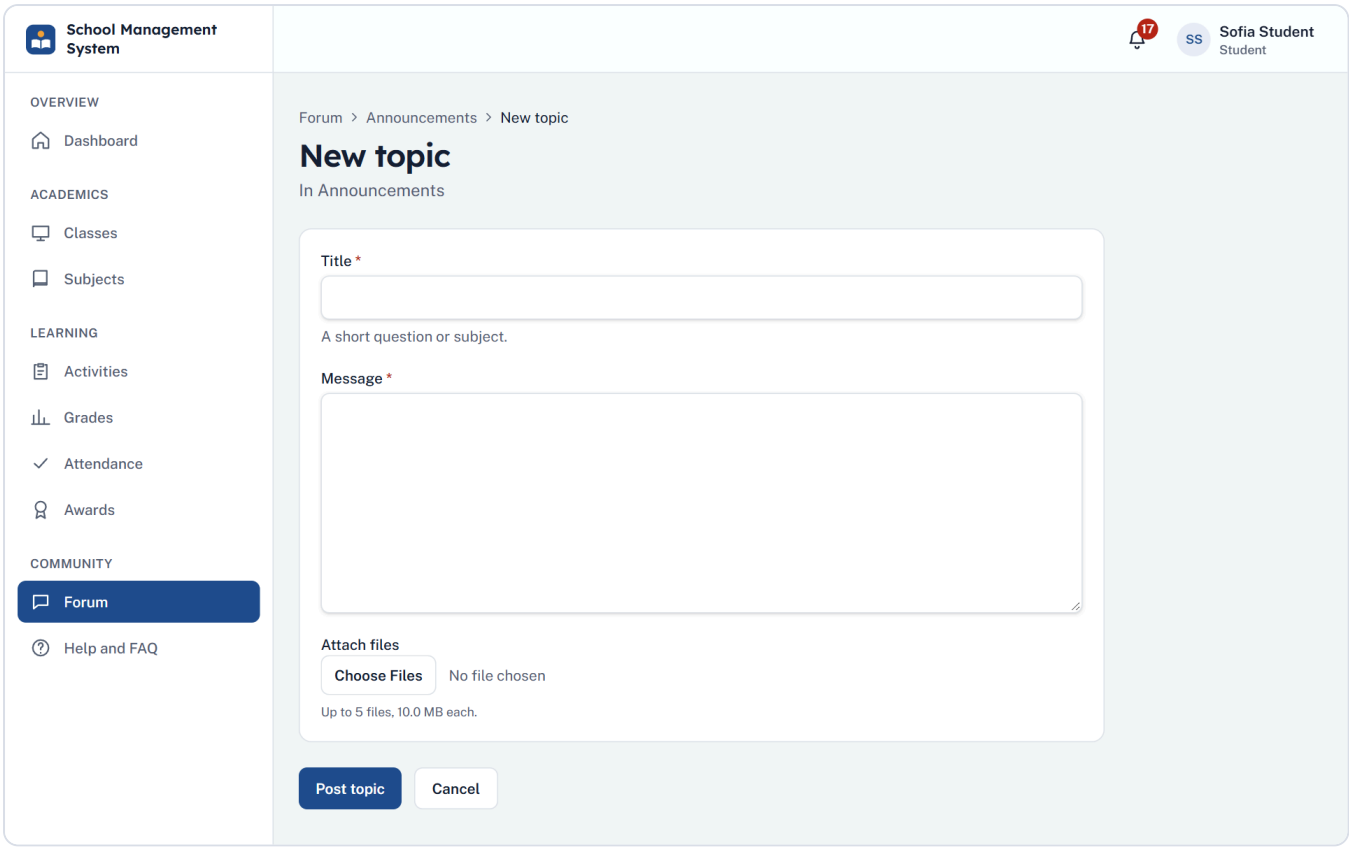

1. Open **Forum** in the menu and choose a category.
2. Open a topic to read it. Write in **Your reply** at the bottom and post it. You can attach files.
3. To start a discussion, open a category and click **New topic**.
4. If a post breaks the school's rules, use **Report** on that post. A moderator will review it.

Forum categories and recent topics.

A topic with the reply box (outlined).

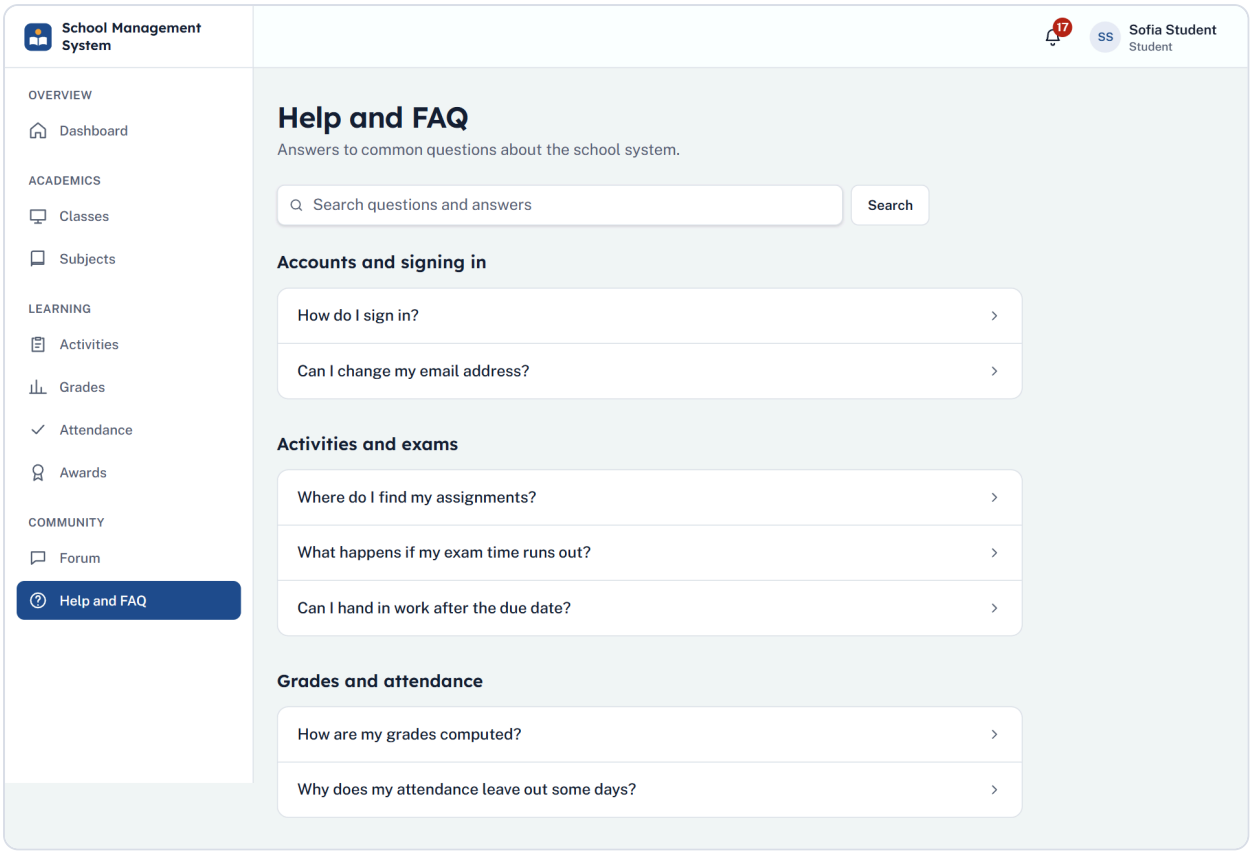

Starting a new topic.

> You can edit your own posts while a topic is open. Locked topics take no new replies.

1.8 Help and FAQ

Open **Help and FAQ** for answers to common questions. Search for a word, or browse by category.

The Help and FAQ page.

Part 2 · Students

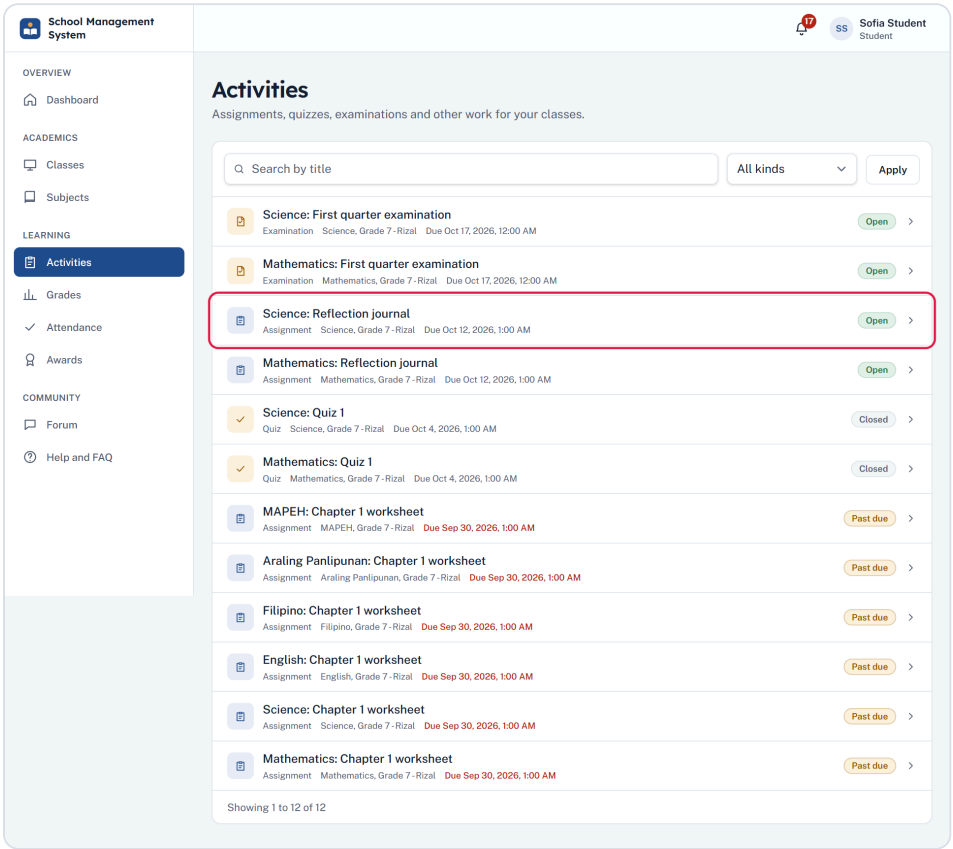

Students You see your own classes, activities, results, attendance and awards.

2.1 Find your activities

Activities are the work your teachers give you. There are five kinds:

- **assignments** and **activities**: you hand in written work or files;
- **quizzes**, **examinations** and **questionnaires**: you answer questions on screen.

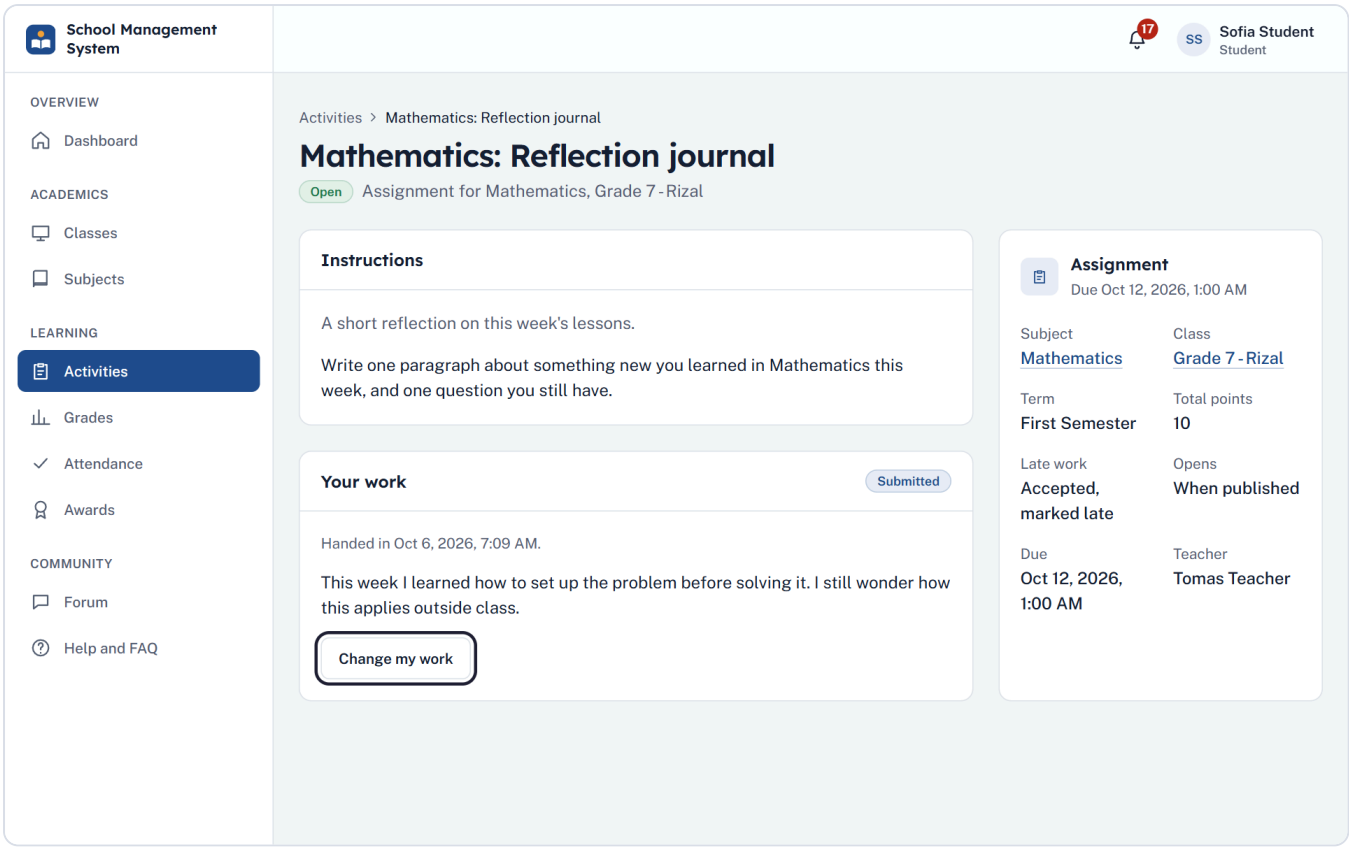

1. Open Activities in the menu. Your **Dashboard** also lists what is due soon.
2. Each activity shows its subject, its due date and a status, such as **Open** or **Past due**.
3. Click an activity to open it.

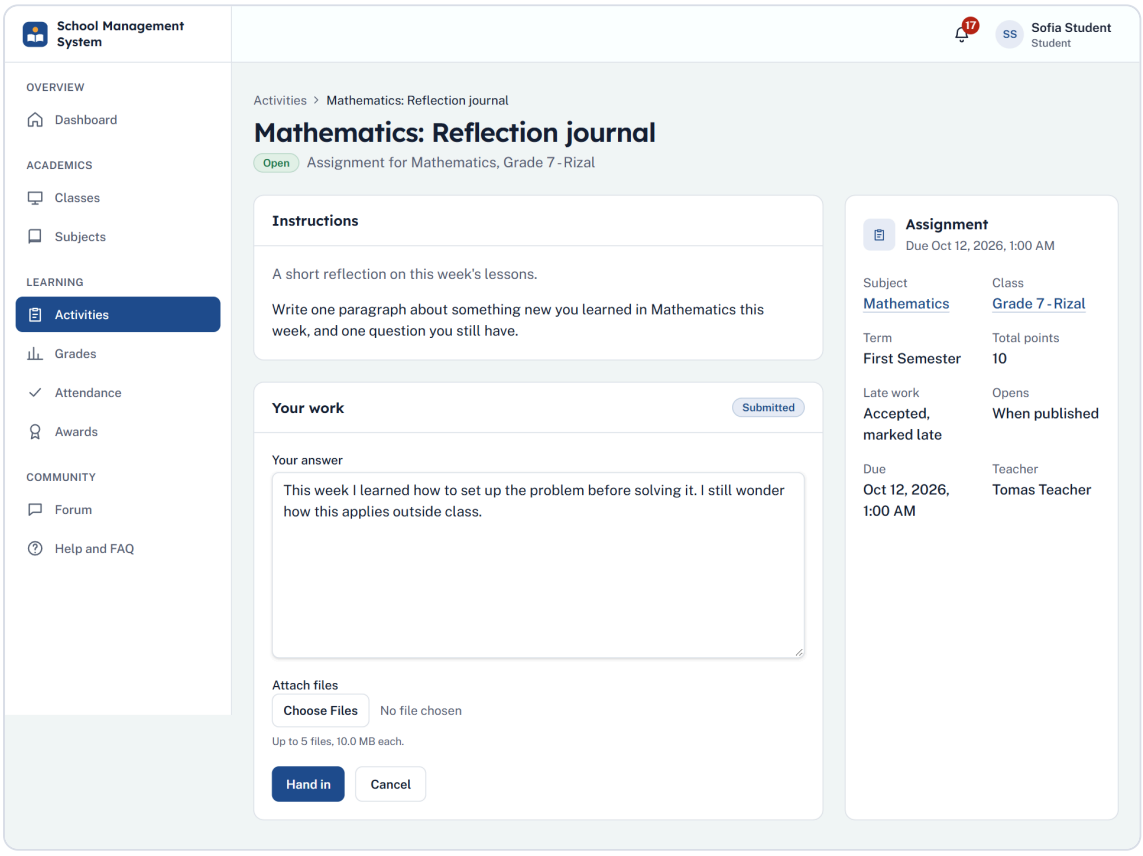

Your activities.

2.2 Hand in an assignment

1. Open the assignment and read the **Instructions**.
2. In **Your work**, write your answer and attach files if needed (up to 5 files, 10 MB each).
3. Click Hand in. The status changes to **Submitted** and your teacher is notified.
4. Until your teacher grades it, you can click Change my work to update it.

A handed-in assignment. It can still be changed until it is graded.

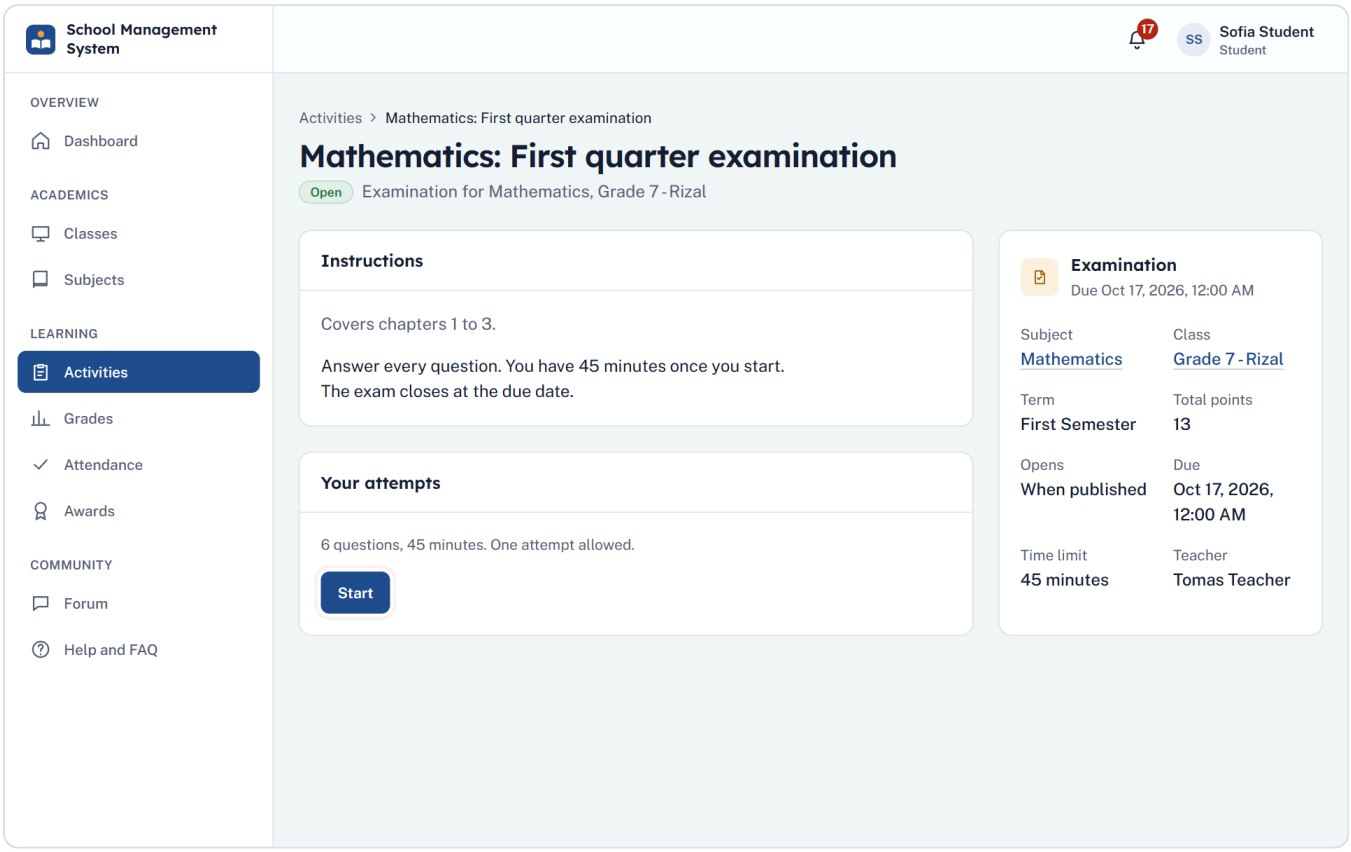

Writing your answer, attaching files and handing in.

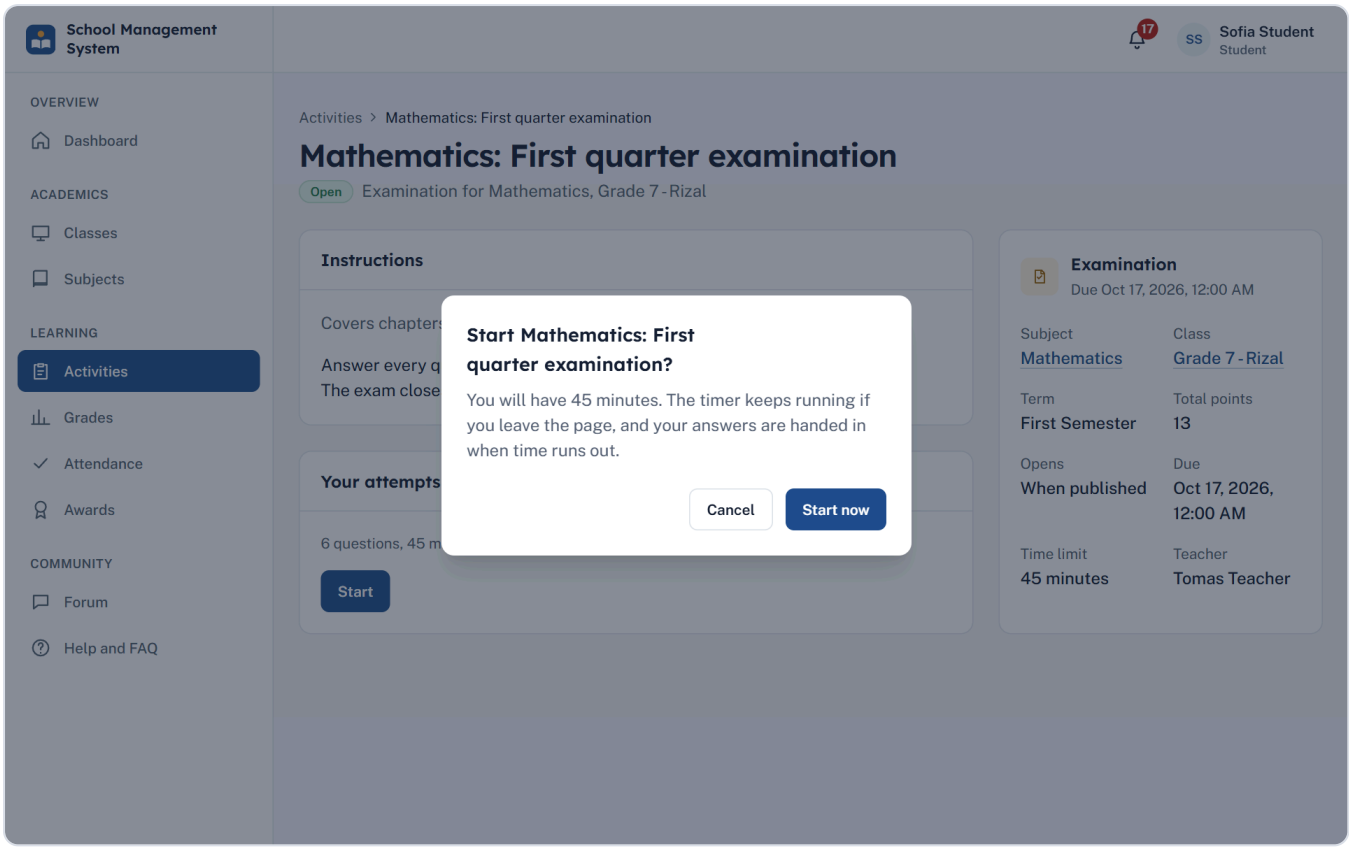

> **Late work.** After the due date you can only hand in if the teacher accepts late work, and it is marked **late**. Once your work is **graded**, it can no longer be changed.

2.3 Take a quiz or examination

1. Open the quiz or examination. The panel on the right shows the time limit and due date.
2. Click **Start**. A message confirms how much time you have.
3. Click **Start now** to begin. Answer the questions; each answer is **saved as you go**.
4. When you finish, hand in your answers. If time runs out, they are handed in for you.

An examination ready to start.

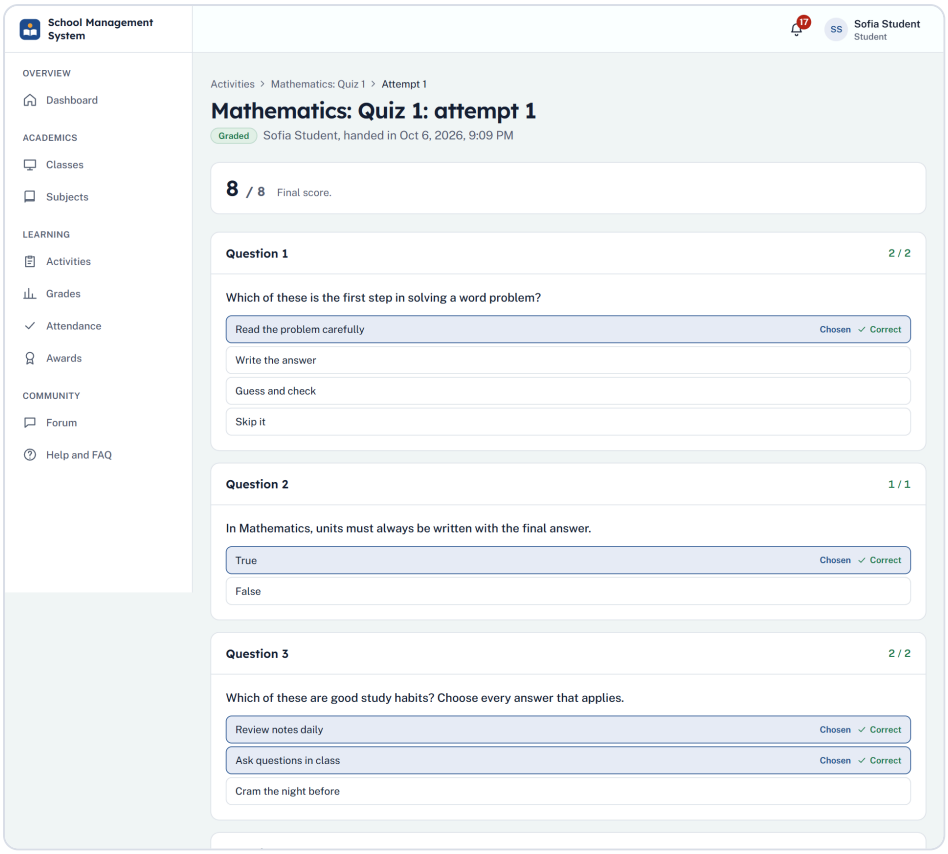

The confirmation before the timer starts.

> **The timer keeps running** even if you close the page or lose your connection, and it never goes past the due date. If you leave by accident, open the activity again and click **Continue your attempt**. Some quizzes allow more than one attempt; your best graded attempt counts.

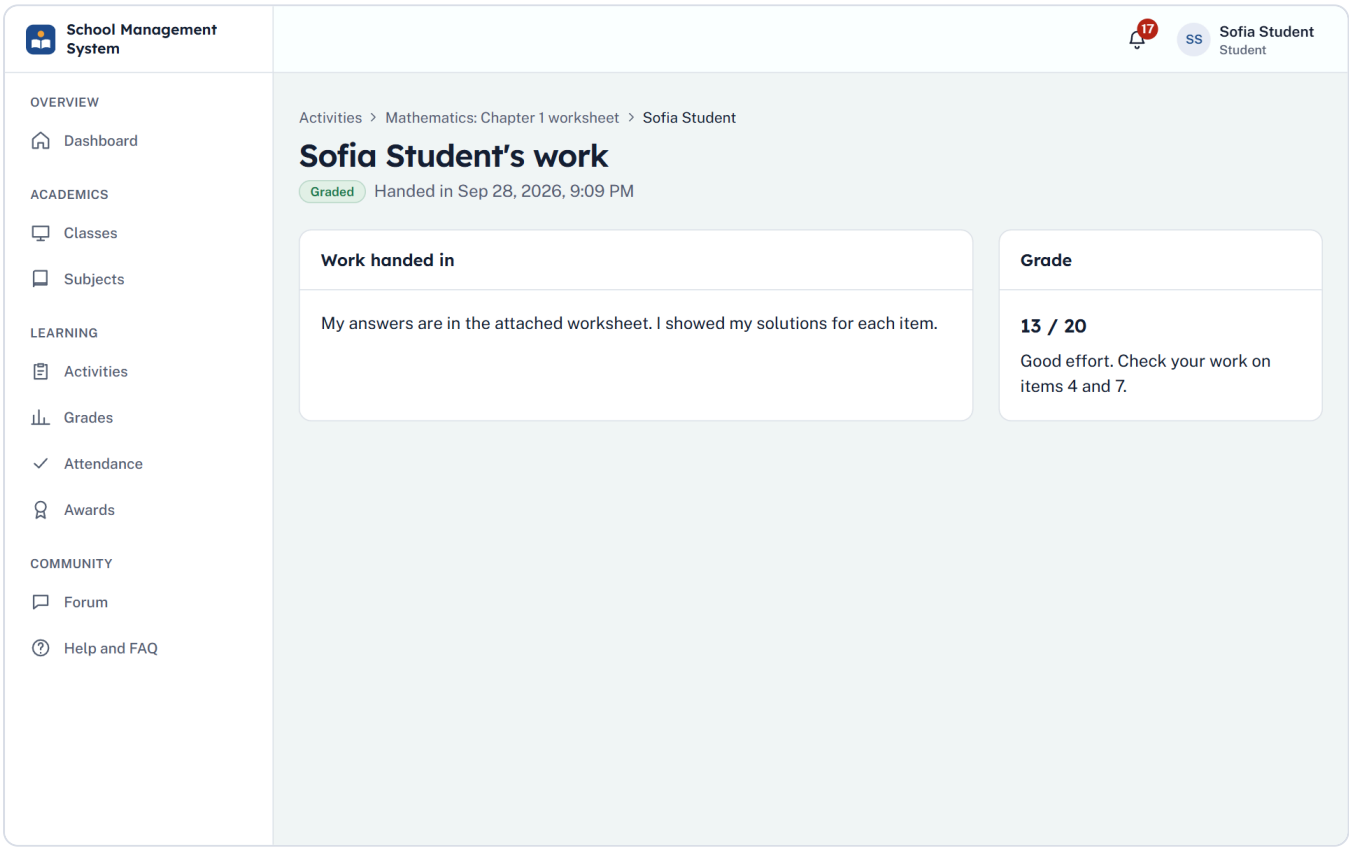

2.4 See your results

Multiple-choice, true-or-false and similar questions are scored straight away. Written answers are scored by your teacher, and you get a notification when they are done.

- For a quiz or exam, open the activity and then your attempt to see your score. Which questions you got right is shown once the activity is **closed**.
- For an assignment, open it to see your **score** and the teacher's **feedback**.

A graded quiz attempt.

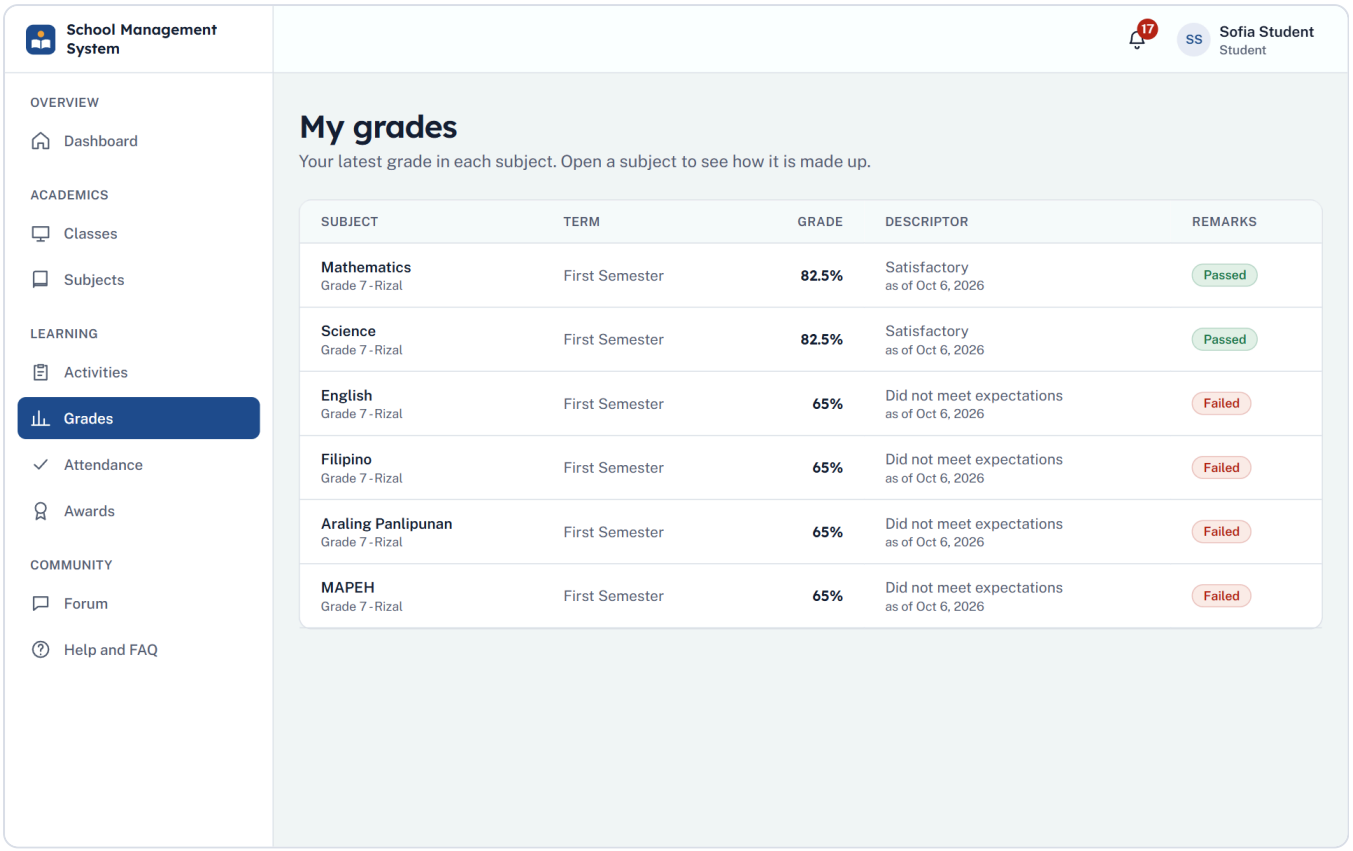

A graded assignment with score and feedback.

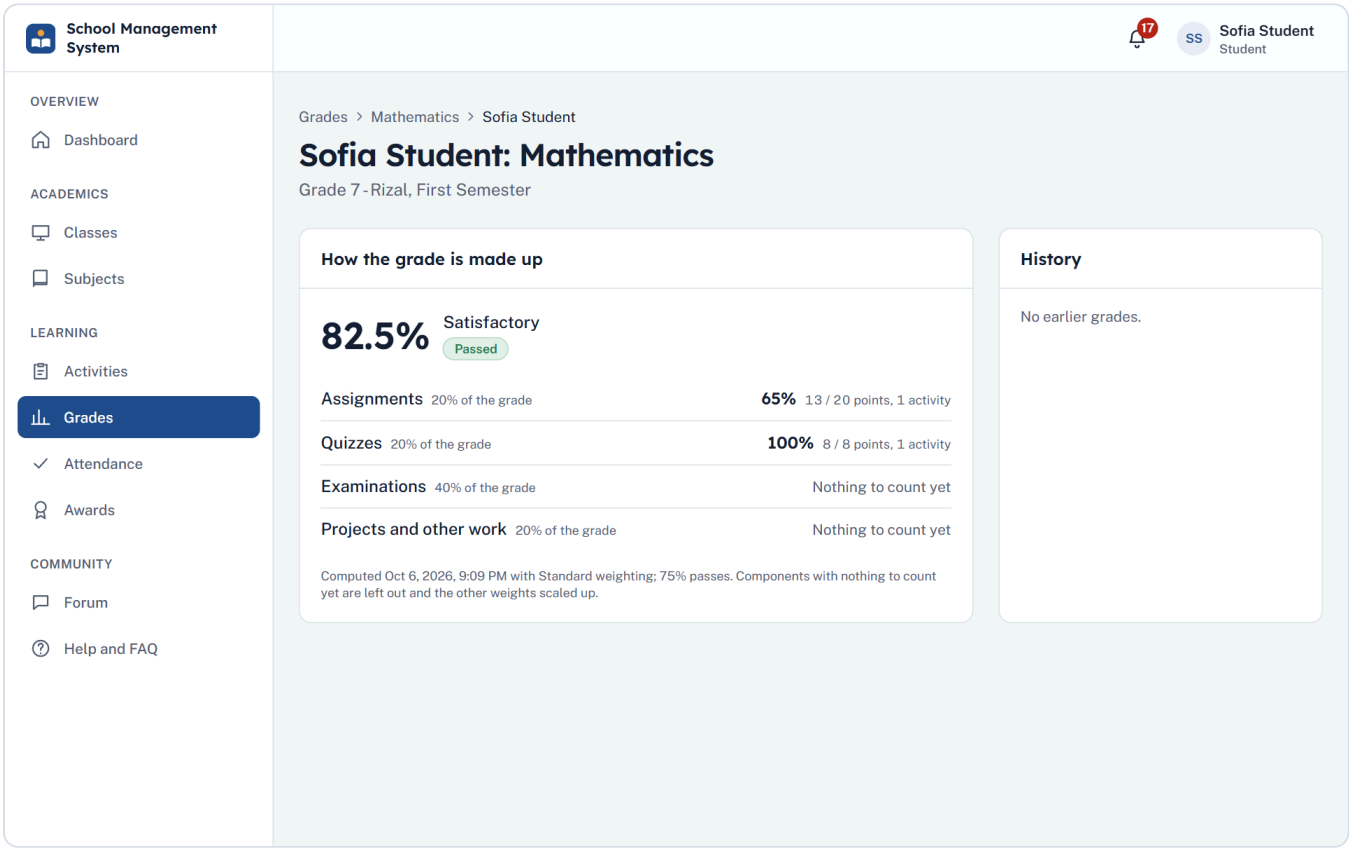

2.5 Your grades

1. Open Grades to see your current grade in each subject, with its descriptor and whether it passes.

2. Click a subject to see how the grade is made up: each part (assignments, quizzes, examinations and so on), its weight, and your earlier grades.

My grades.

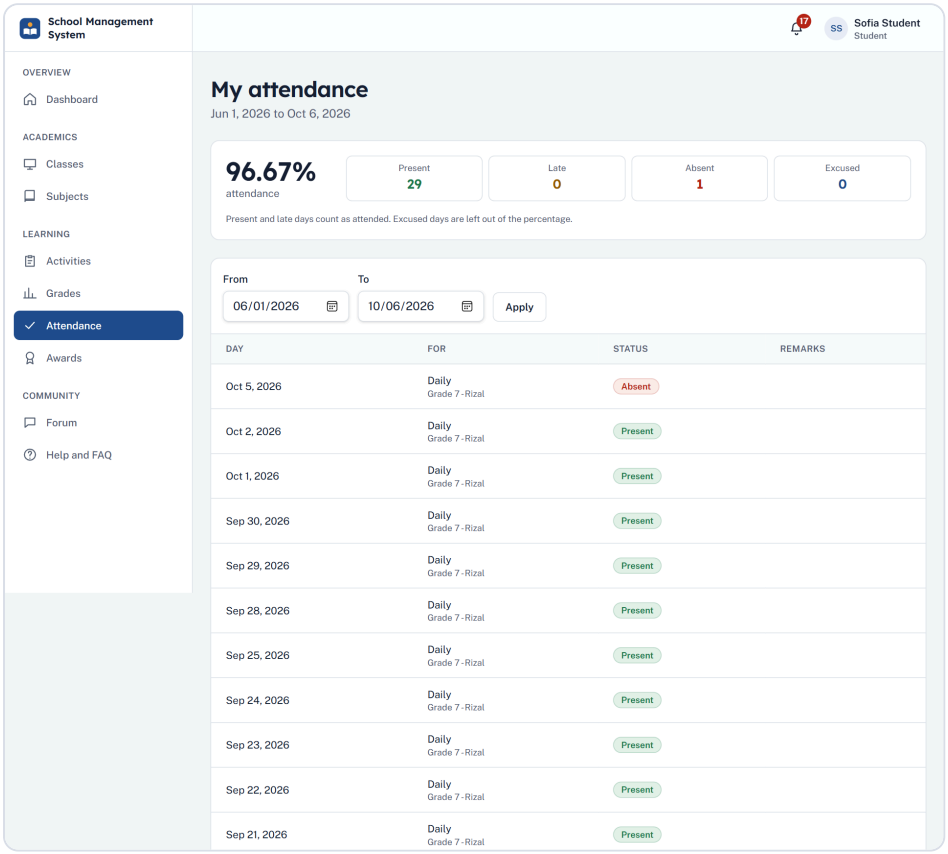

How one subject's grade is made up.

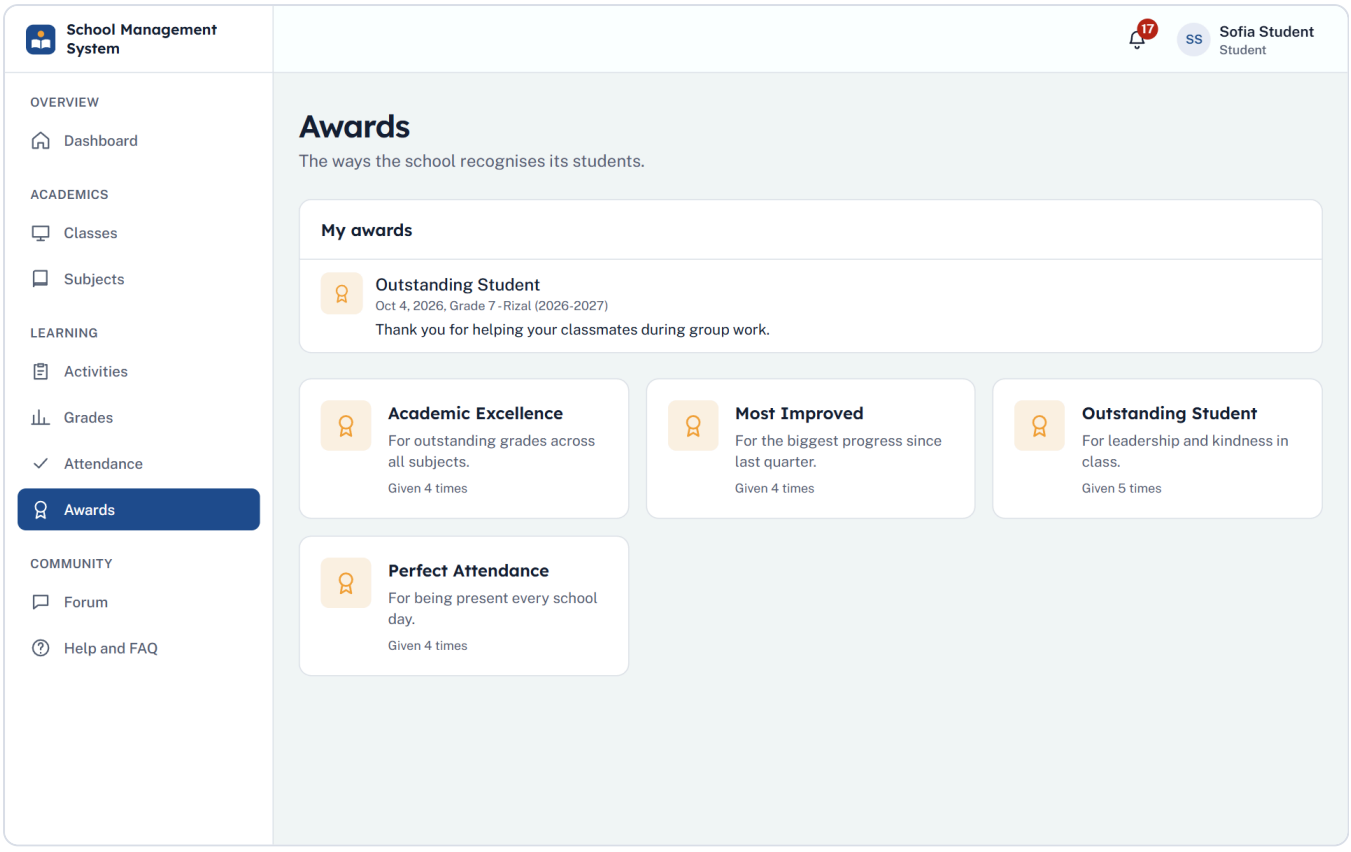

> Work you did not hand in counts as zero once it is past due. Work still waiting for the teacher is not counted until it is graded.

2.6 Attendance, awards and your class

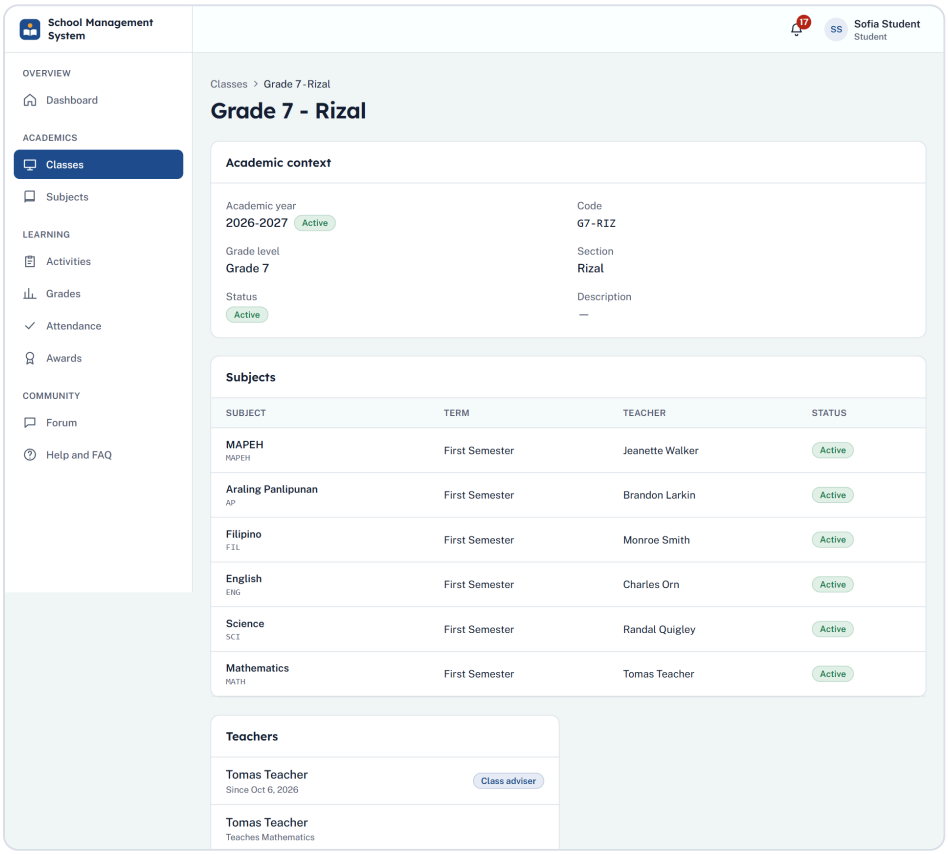

- **Attendance** shows your record for a period and your attendance rate. The rate counts present and late days as attended; excused days are left out.
- **Awards** lists the awards you have received.
- **Classes** shows your class, its subjects and its teachers.

Your attendance. Change the dates and click Apply to see another period.

Your awards.

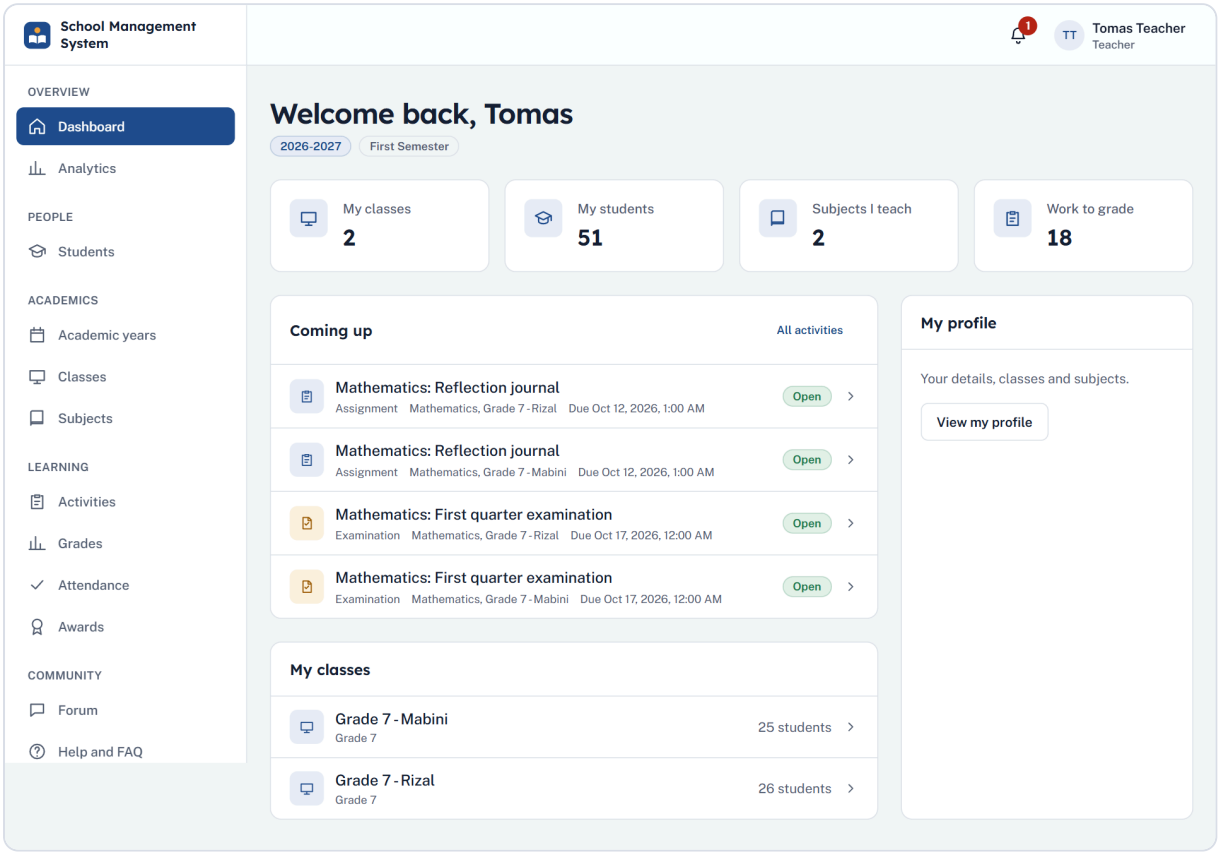

Your class page.

Part 3 · Teachers

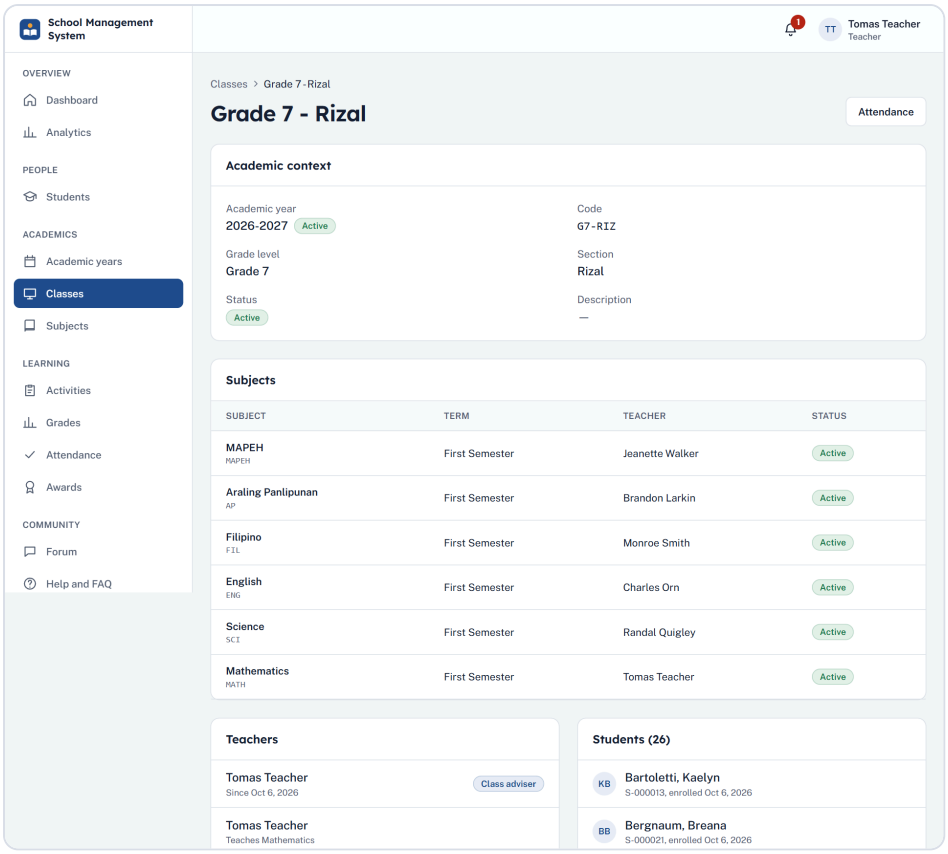

Teachers You work with the classes you are assigned to and the subjects you teach. You do not see other teachers' classes.

3.1 Your dashboard and classes

1. The **Dashboard** shows your figures, upcoming activities and your classes.
2. Open Classes and click a class to see its students, subjects and teachers.

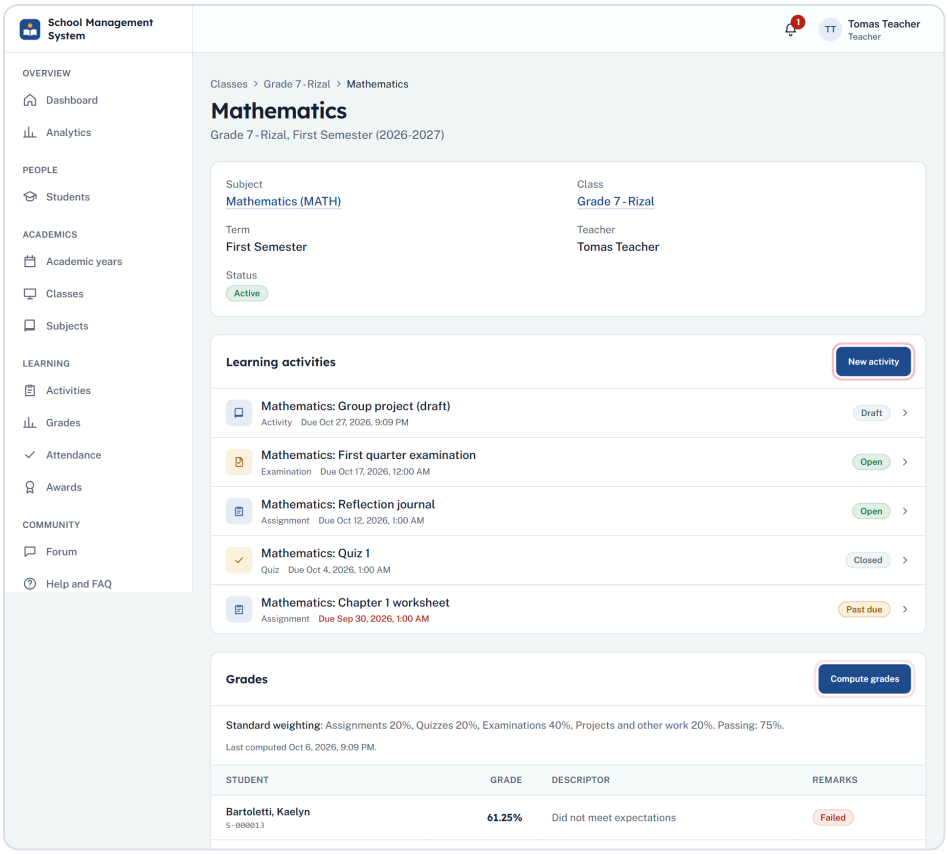

A teacher's dashboard.

A class page: subjects, teachers and enrolled students.

3.2 The subject page

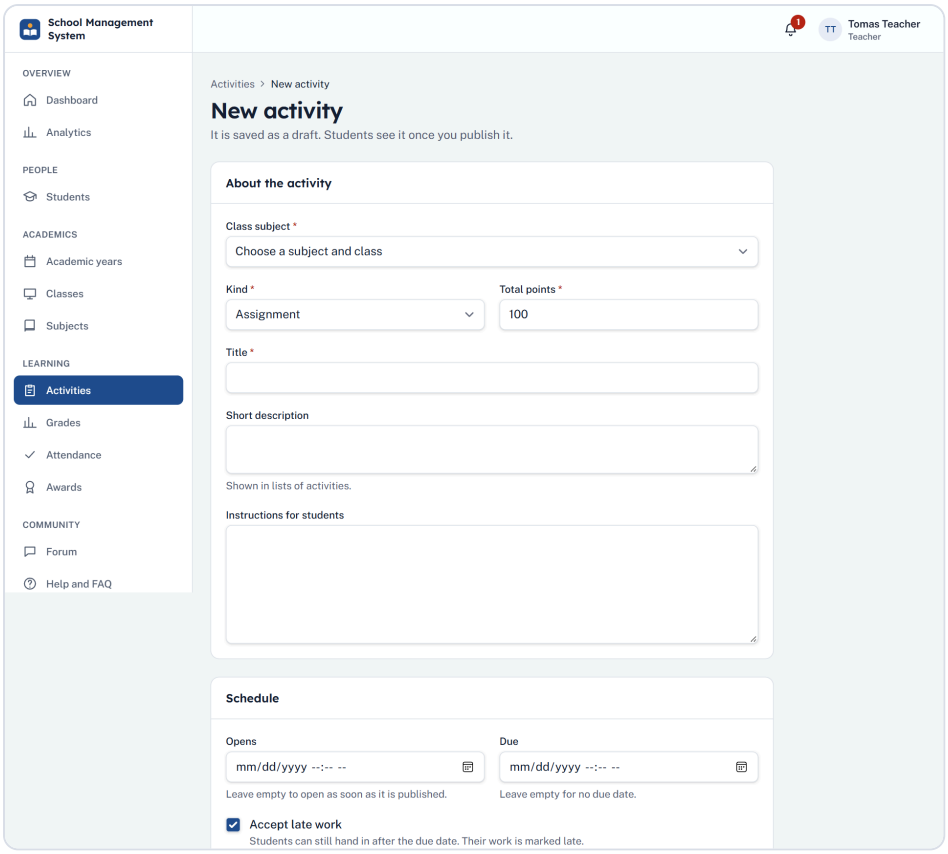

Each subject you teach in a class has its own page. Open it from the class page by clicking the subject. It holds the subject's **Learning activities** and its **Grades**.

Mathematics for Grade 7 - Rizal: **New activity** and **Compute grades** are outlined.

3.3 Create an activity

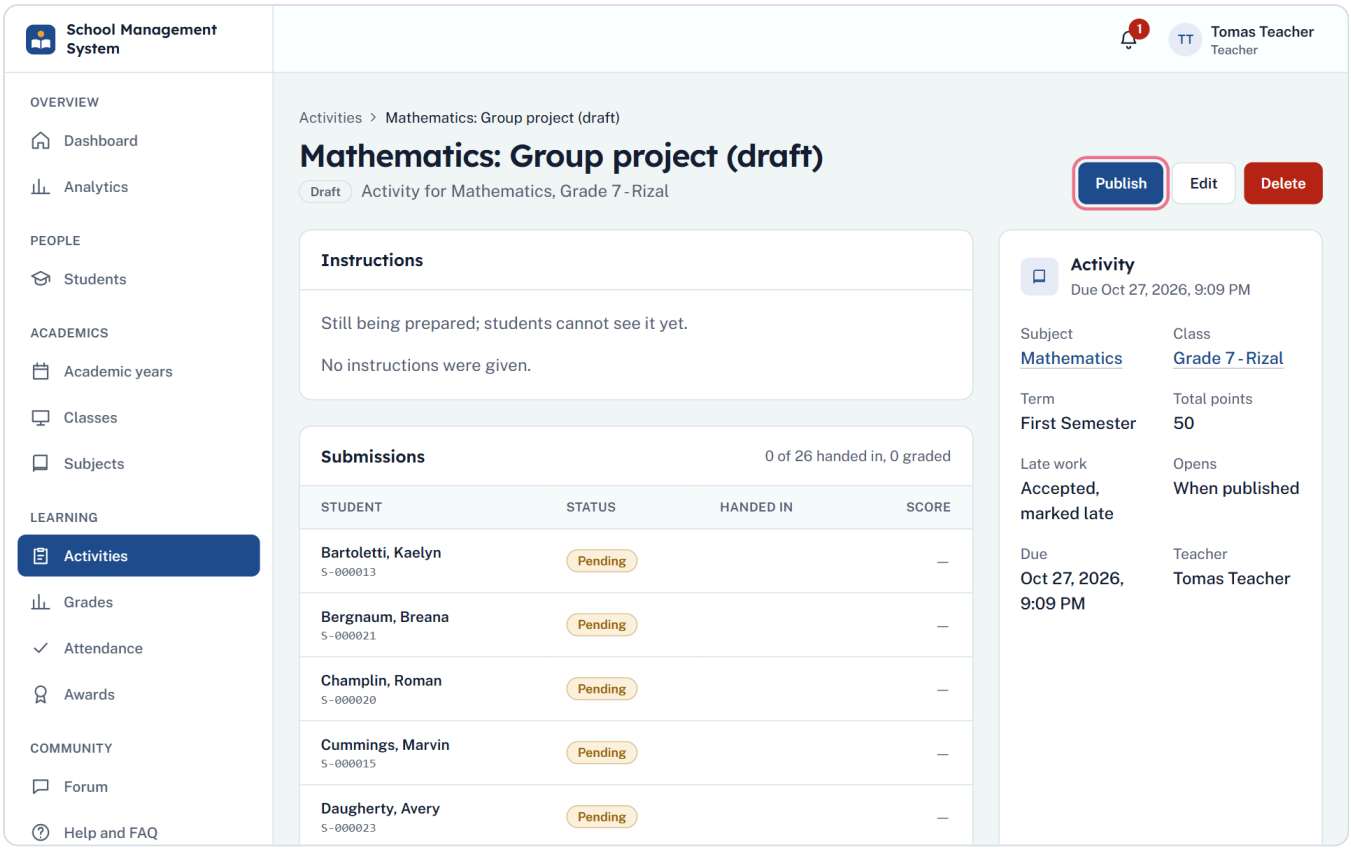

1. On the subject page click **New activity**, or click **New activity** on the Activities page.
2. Choose the **class subject** and the **kind**: assignment, quiz, examination, questionnaire or activity.
3. Enter the title, total points and instructions. You can attach files.
4. Under **Schedule**, set when it opens and when it is due, and whether late work is accepted.
5. For quizzes and examinations, also set:
   - the **time limit**;
   - the **number of attempts** allowed;
   - whether the **questions and options are shuffled**.
6. Save. The activity is saved as a **draft**: students cannot see it yet.

The new activity form.

3.4 Publish, close and reopen

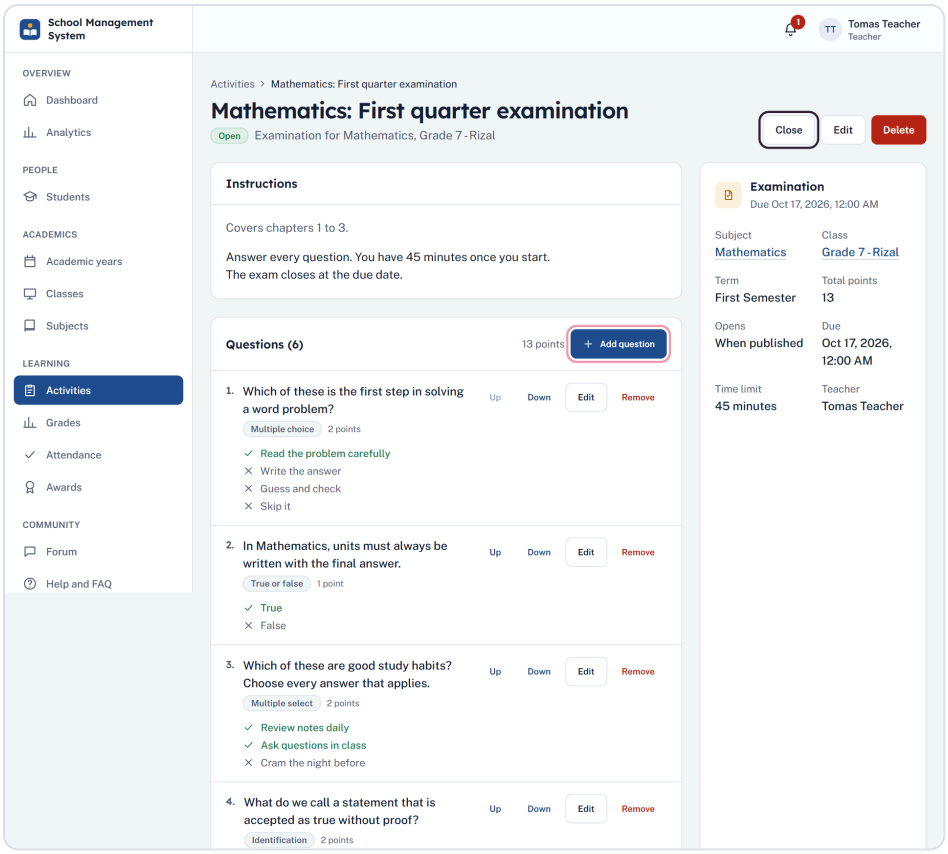

1. Open the draft and click **Publish**. Students in the class can now see it, and they are notified.
2. When the activity is over, click **Close**. Students can no longer hand in or start attempts, and quiz students can now see which answers were right.
3. A closed activity can be opened again with **Reopen**.

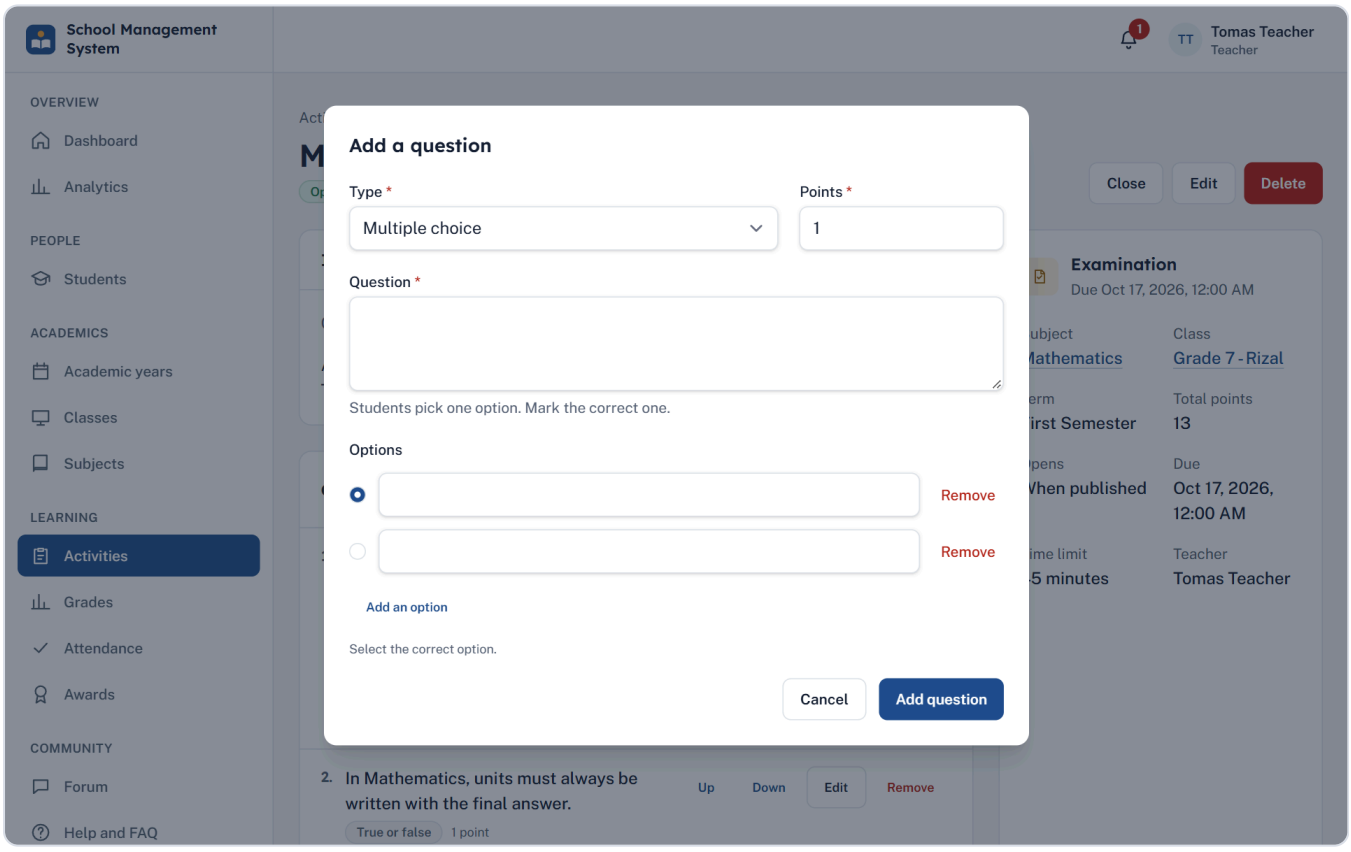

A draft activity with the **Publish** button.

3.5 Add questions to a quiz or examination

1. Open the quiz or examination and click **Add question**.
2. Choose the **type**:
   - Multiple choice
   - True or false
   - Multiple select
   - Identification
   - Short answer
   - Essay
3. Enter the points, the question and, where needed, the options. Mark which one is correct.
4. Click **Add question**. Use **Up**, **Down**, **Edit** and **Remove** to arrange the questions.

An examination's questions. **Add question** and **Close** are outlined.

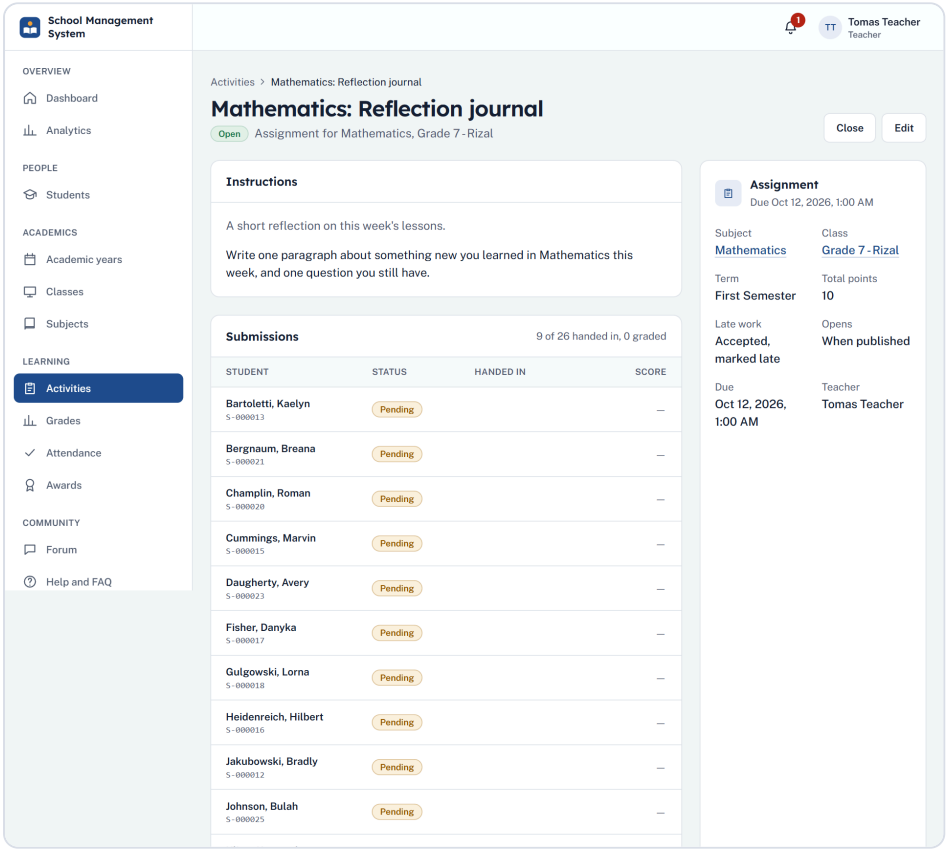

Adding a multiple-choice question.

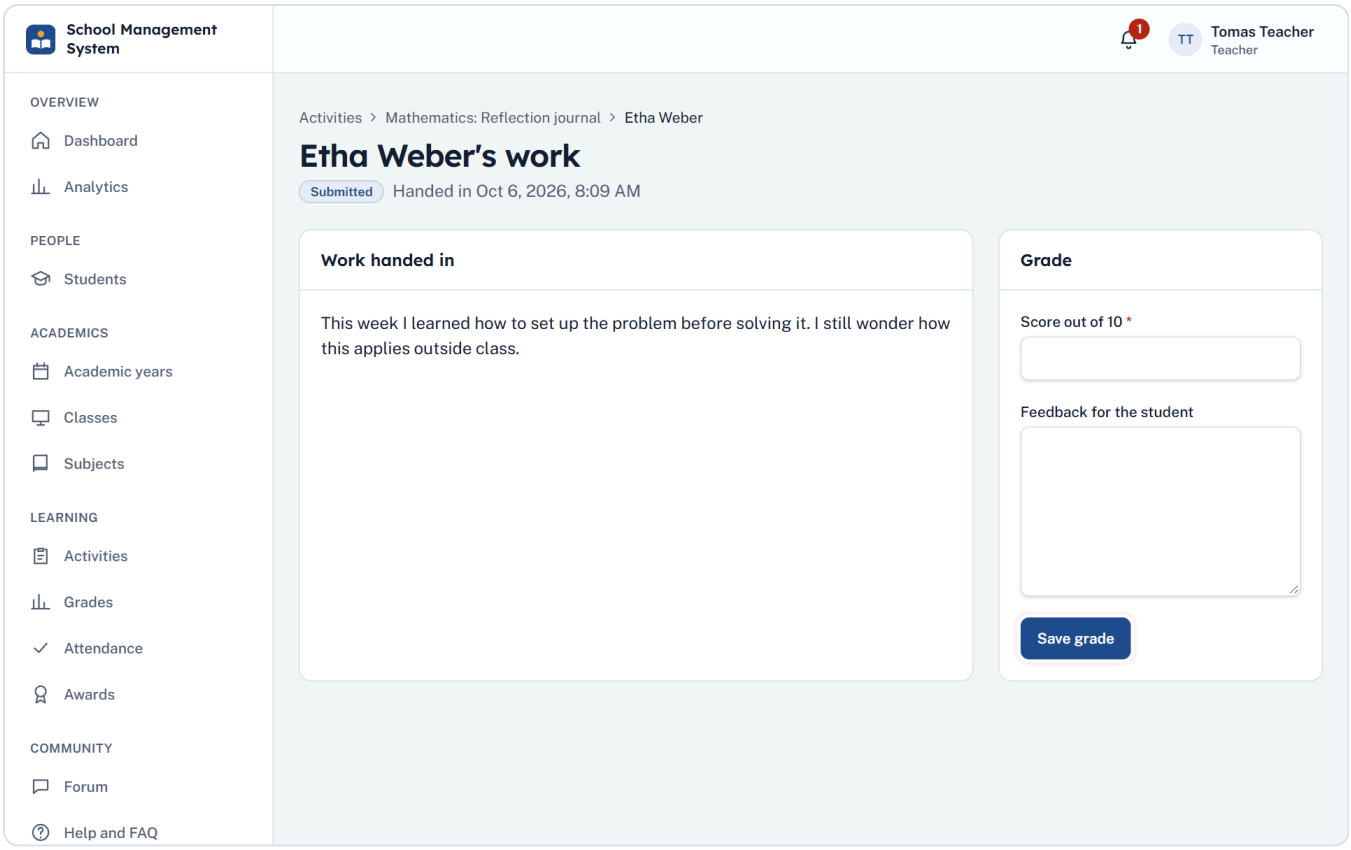

> **Scoring rules.** The first four question types are scored automatically.
>
> - For **multiple select**, the student must choose exactly the correct options to earn the points.
> - For **identification**, capital letters and extra spaces are ignored.
> - Short answers and essays are scored by you.
>
> Once a student has started an attempt, the questions are **locked** and can no longer be changed.

3.6 Review and grade handed-in work

1. Open the activity. The **Submissions** list shows every student's status:
   - **Pending**
   - **Submitted**
   - **Late**
   - **Graded**
   - **Missing**
2. Click a student to open their work and any attached files.
3. Enter the **score** and optional **feedback**, then click Save grade. The student is notified.

An assignment with its submissions list.

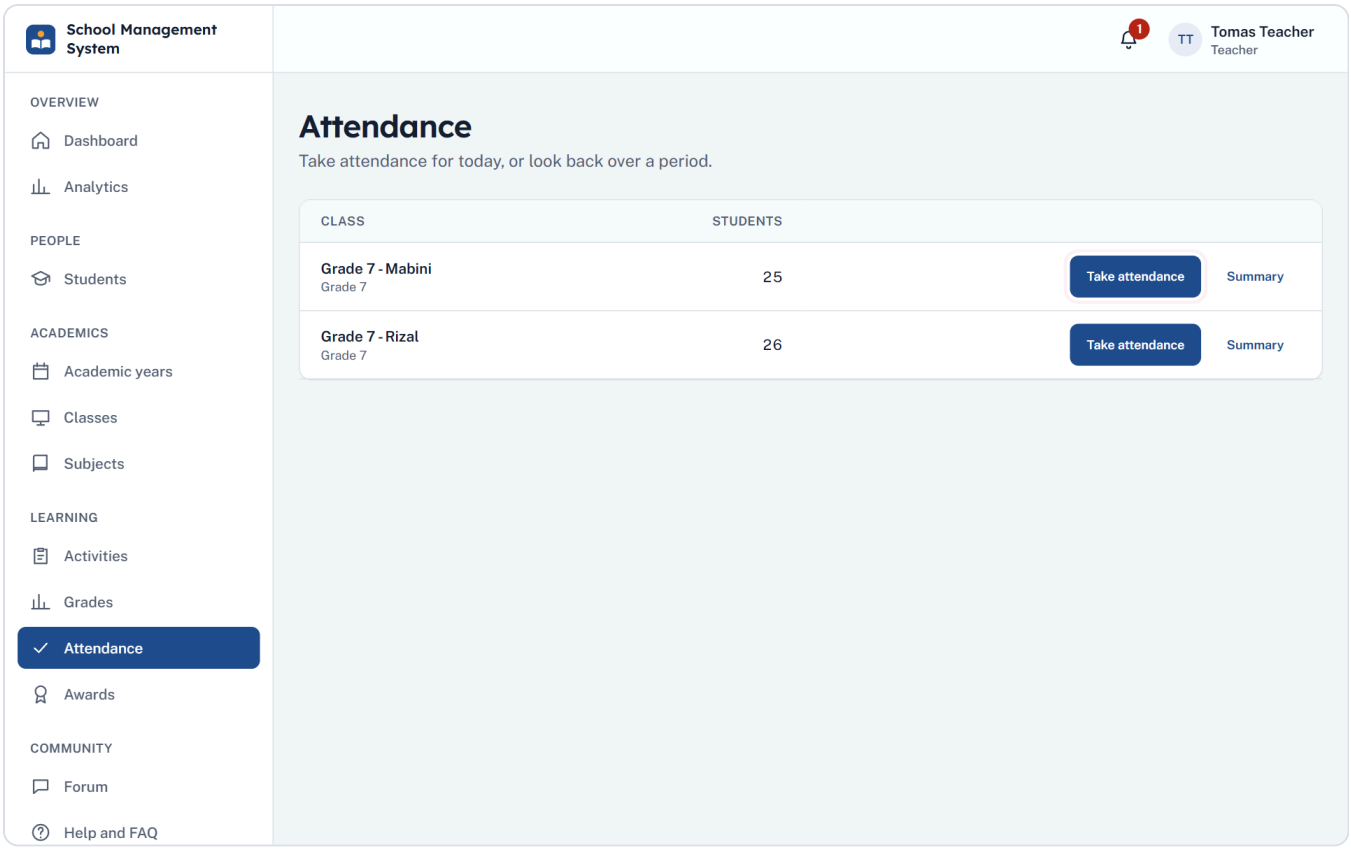

Grading one student's work.

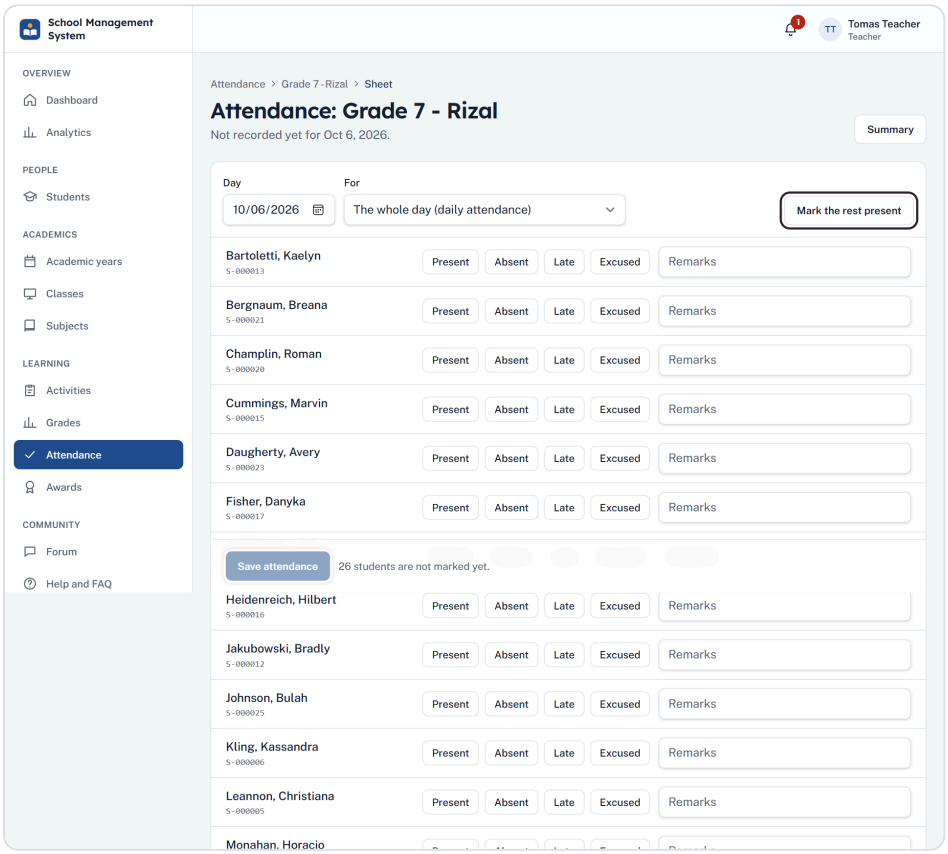

> Once graded, the student can no longer change that work.

3.7 Take attendance

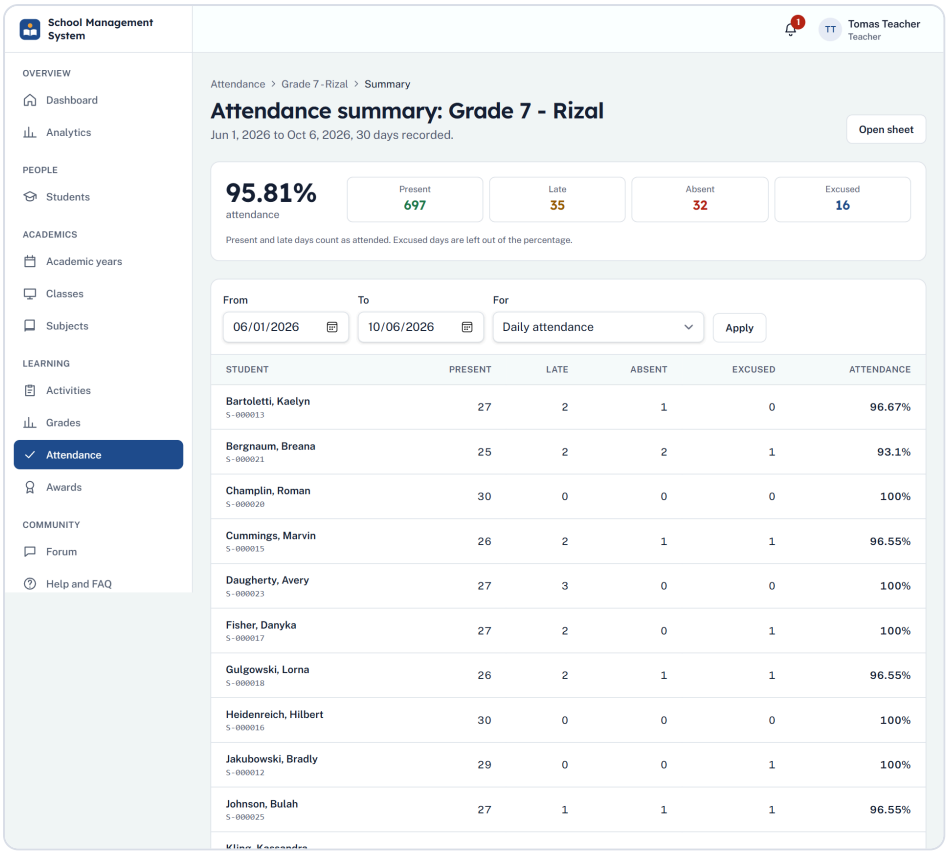

1. Open **Attendance** and click **Take attendance** for a class.
2. Choose the **day**, and whether you are recording the **whole day** or one **subject**.
3. Mark each student **Present**, **Absent**, **Late** or **Excused**, adding remarks if needed. **Mark the rest present** fills in everyone you have not marked.
4. Click **Save attendance**. You can come back and correct a day later.
5. Click **Summary** to see each student's attendance rate over a period.

Choosing a class.

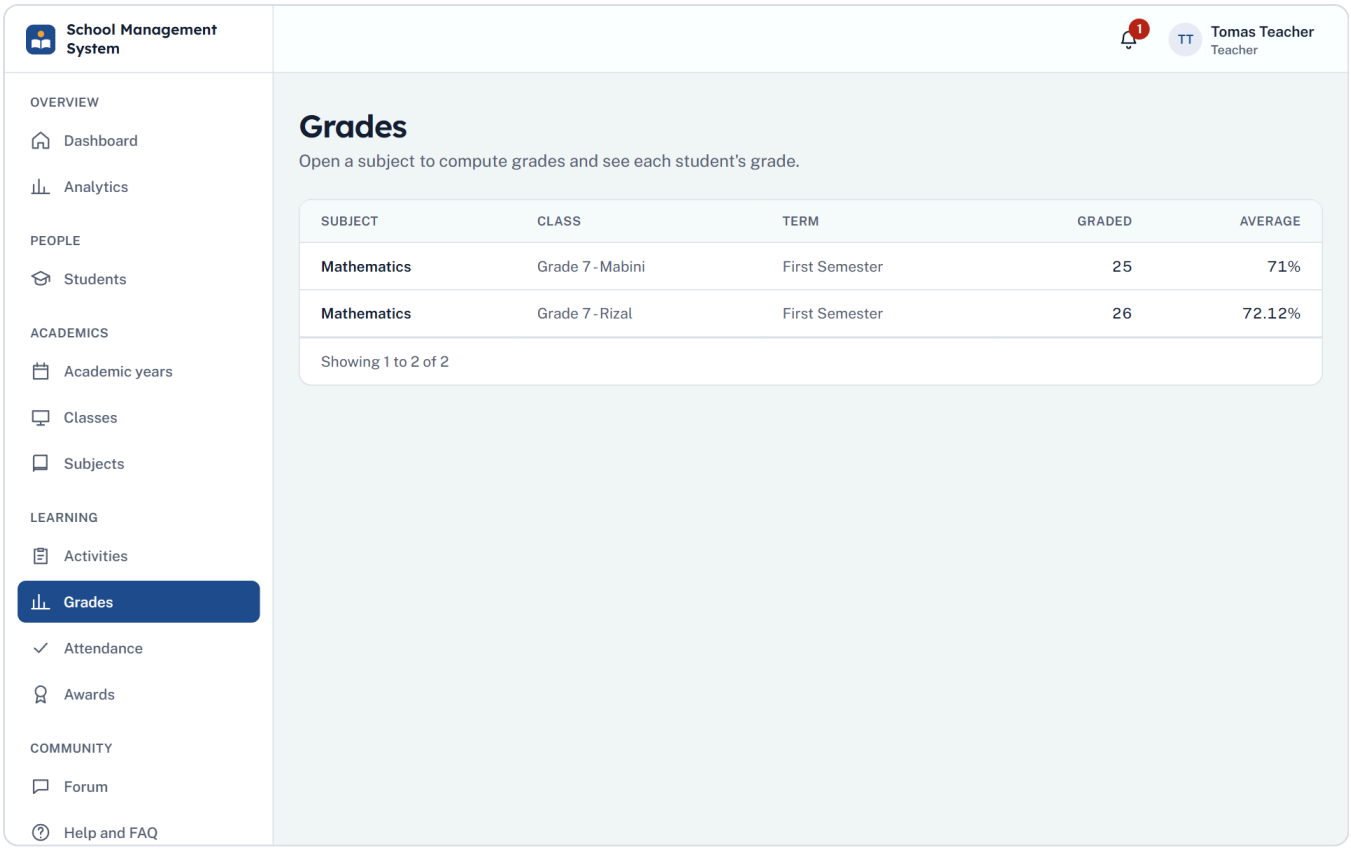

The attendance sheet.

The attendance summary.

3.8 Compute grades

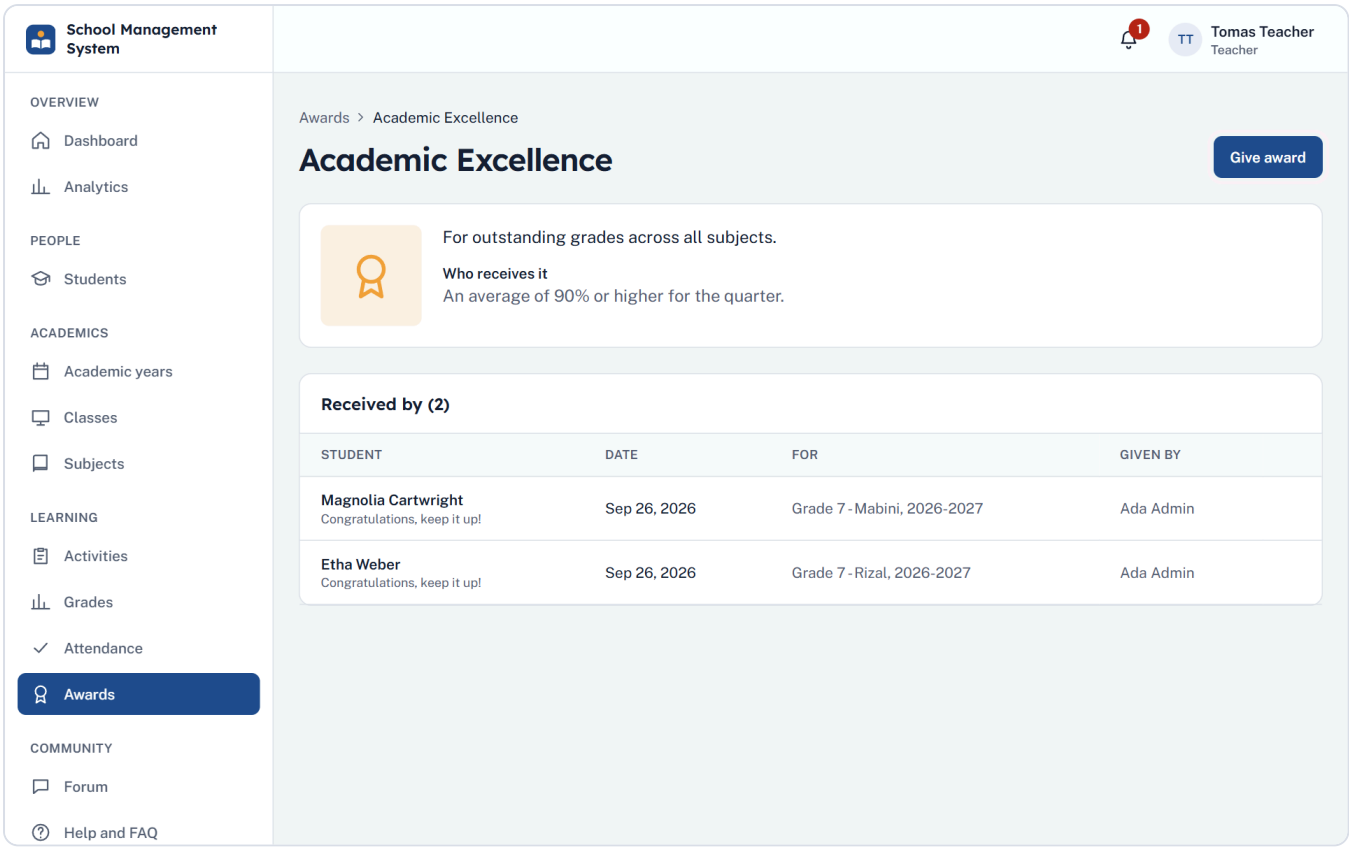

1. Open the subject page (see 3.2) and click **Compute grades**.
2. Each student's grade is worked out from their graded work, using the school's grading system. By default:
   - Assignments 20%
   - Quizzes 20%
   - Examinations 40%
   - Projects and other work 20%
   - 75% passes
3. Compute again after grading more work. Earlier results are kept in each student's grade history.

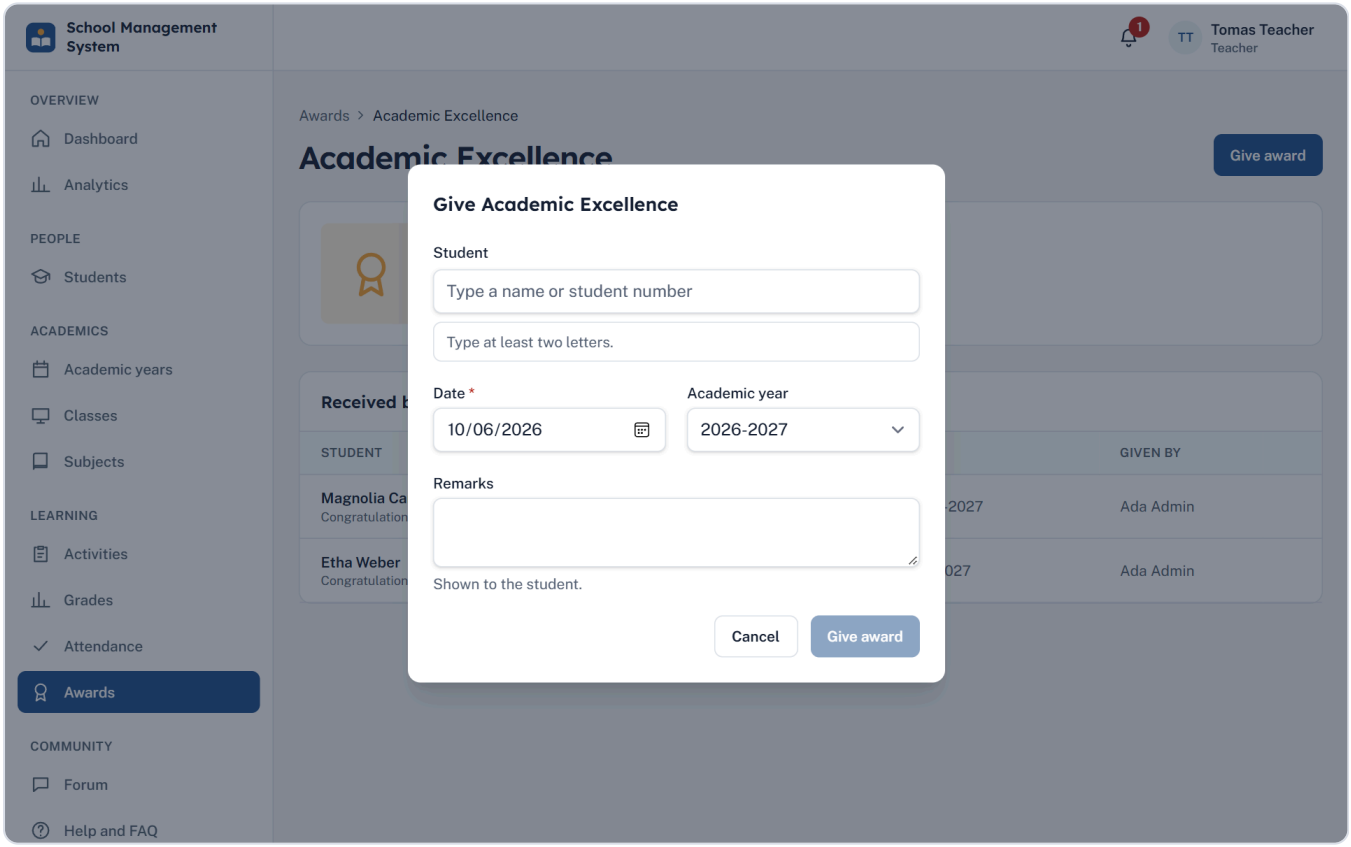

The Grades page lists your subjects and their grades.

3.9 Give an award

1. Open **Awards** and click the award.
2. Click **Give award**, choose the student (from your classes) and the date. Add **remarks** if you like; the student sees them.
3. The student is notified and the award appears on their profile.

An award and who has received it.

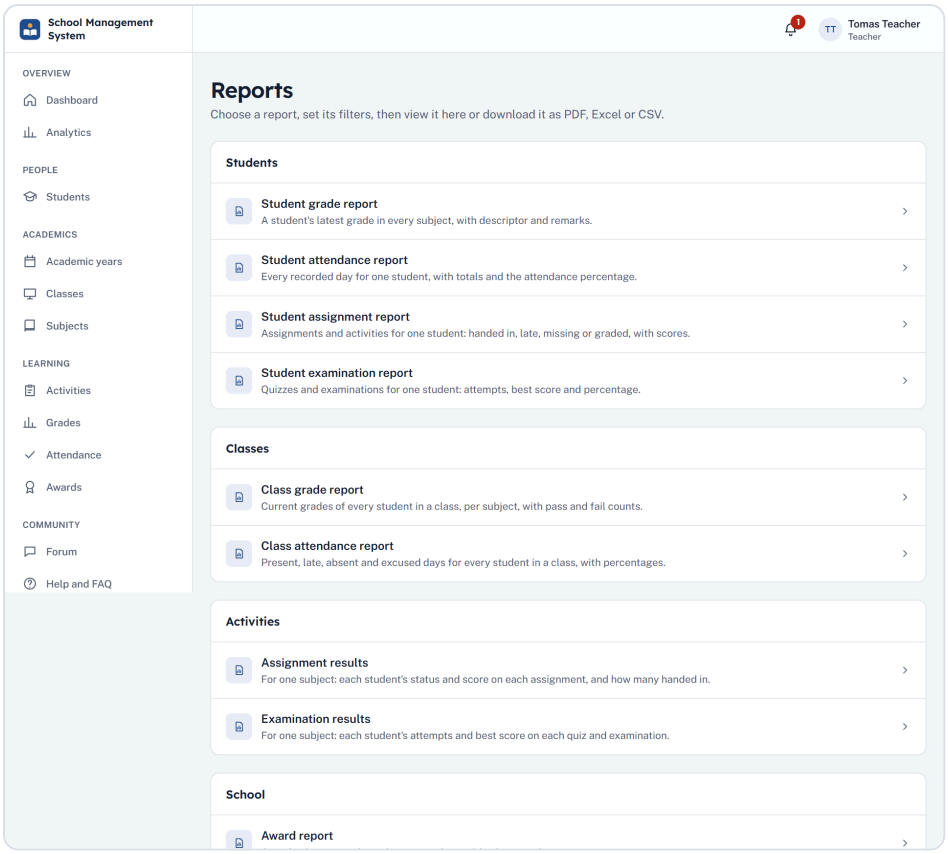

Giving the award to a student.

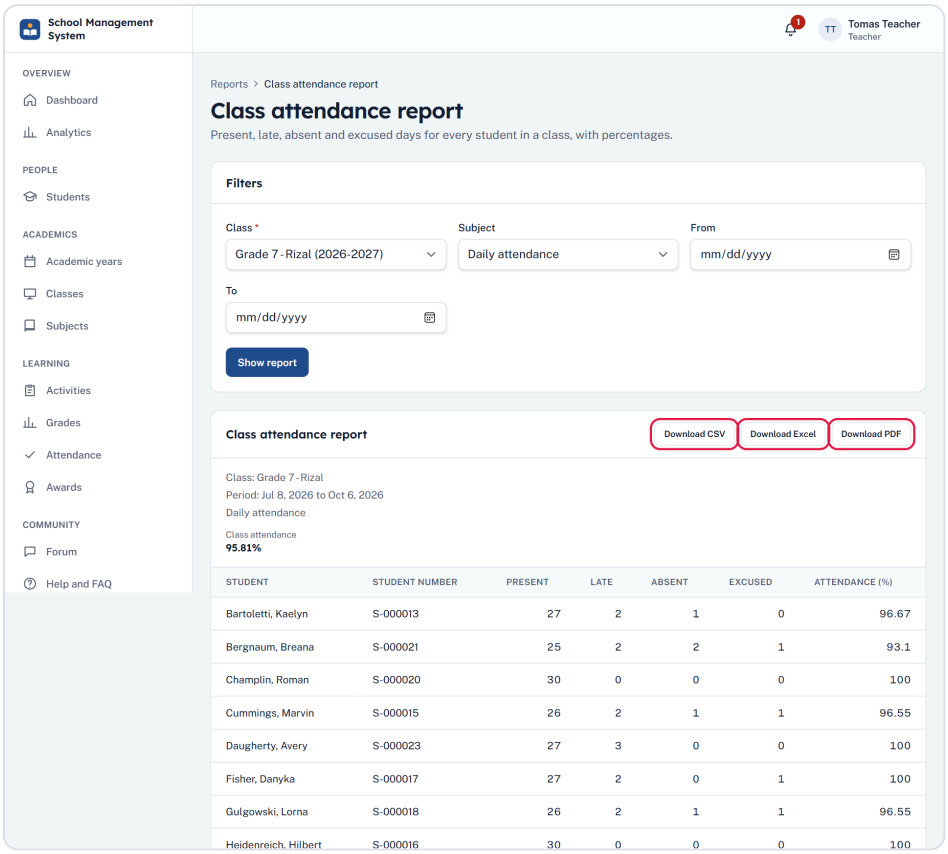

3.10 Reports

Reports list grades, attendance, assignment and exam results, awards and teaching loads.

1. Open **Reports** and choose a report.
2. Fill in the filters (fields marked * are required) and click **Show report**.
3. Download it with **PDF**, **Excel** or **CSV**.

The list of reports.

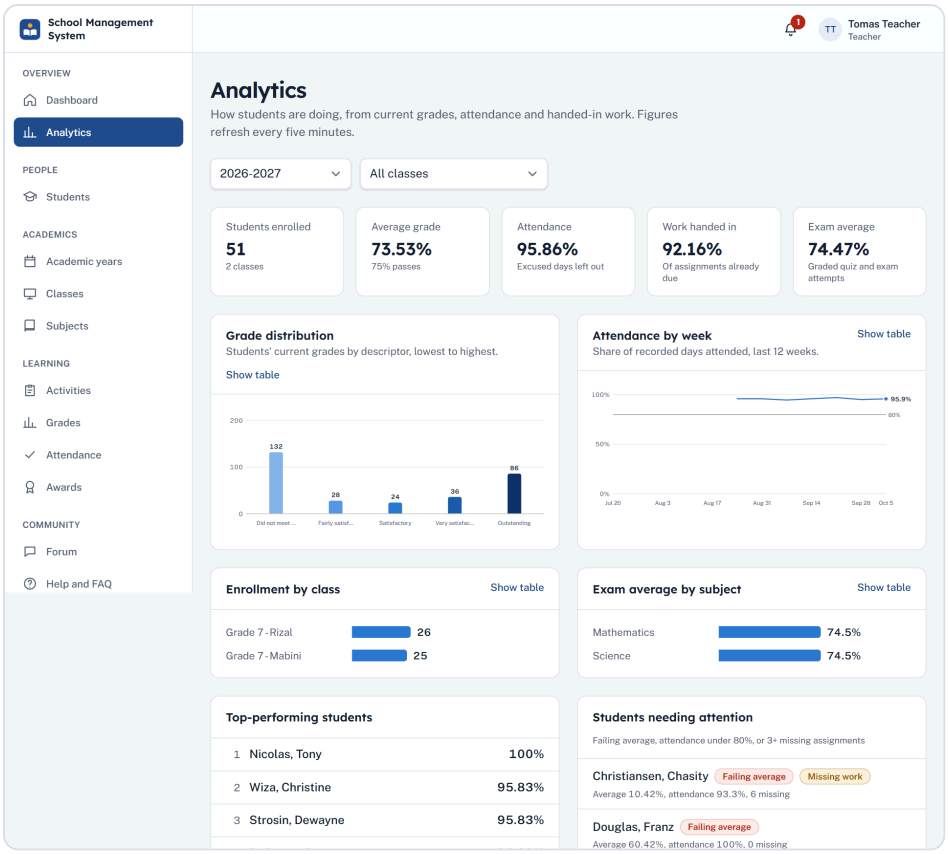

A class attendance report, with the download buttons outlined.

> Teachers only get results for their own classes.

3.11 Analytics

Open Analytics for charts of grades, attendance, enrollment and exam results. It also lists the **students needing attention**: those with a failing average, low attendance or several missing assignments. Choose a year and class at the top to narrow the figures. The figures refresh every five minutes.

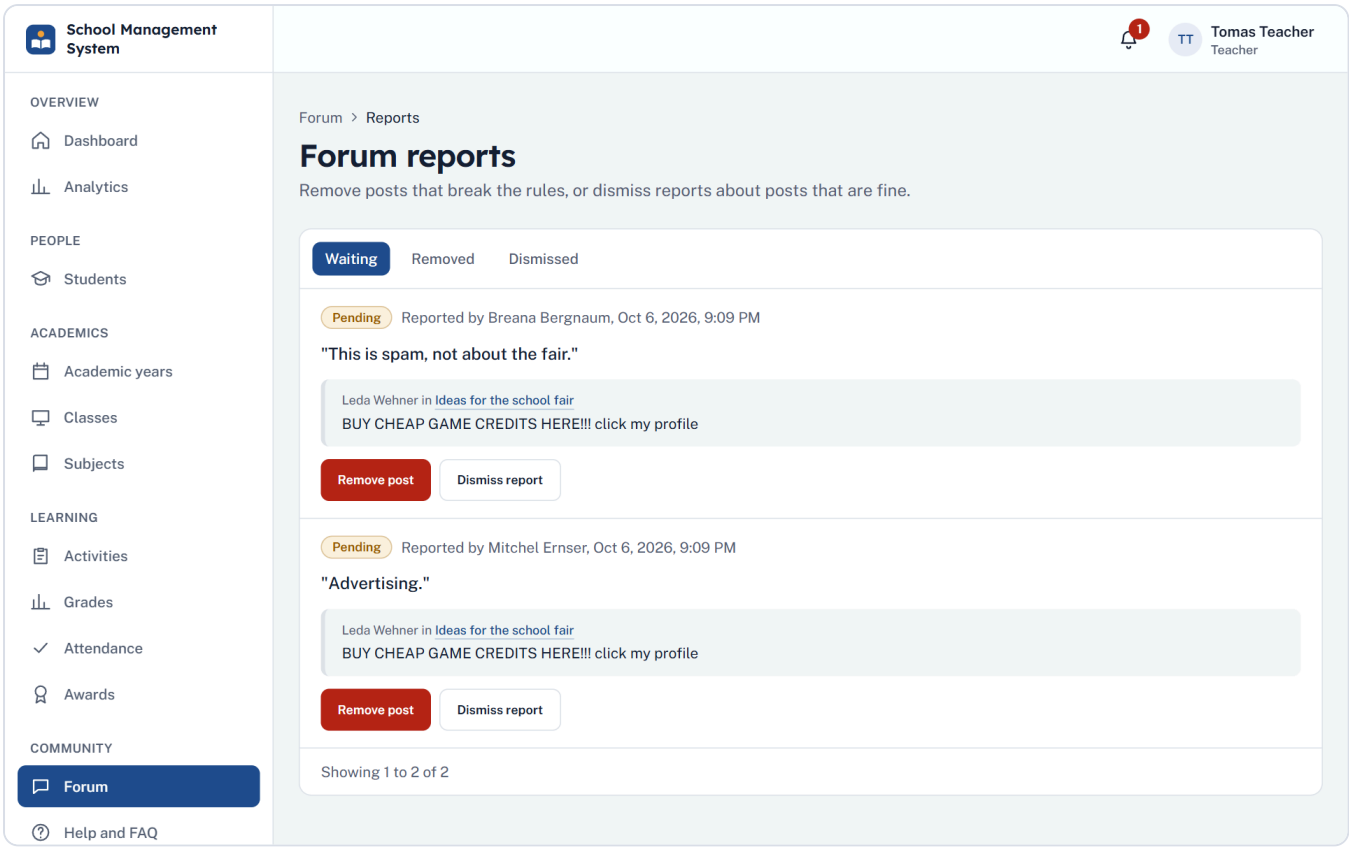

The analytics page.

3.12 Moderate the forum

Teachers and administrators are forum moderators.

- In a topic, moderators can **pin**, **lock** or **remove** it.
- **Forum reports** (from the Forum page) lists posts that users reported. For each report, choose **Remove post** or **Dismiss report**.

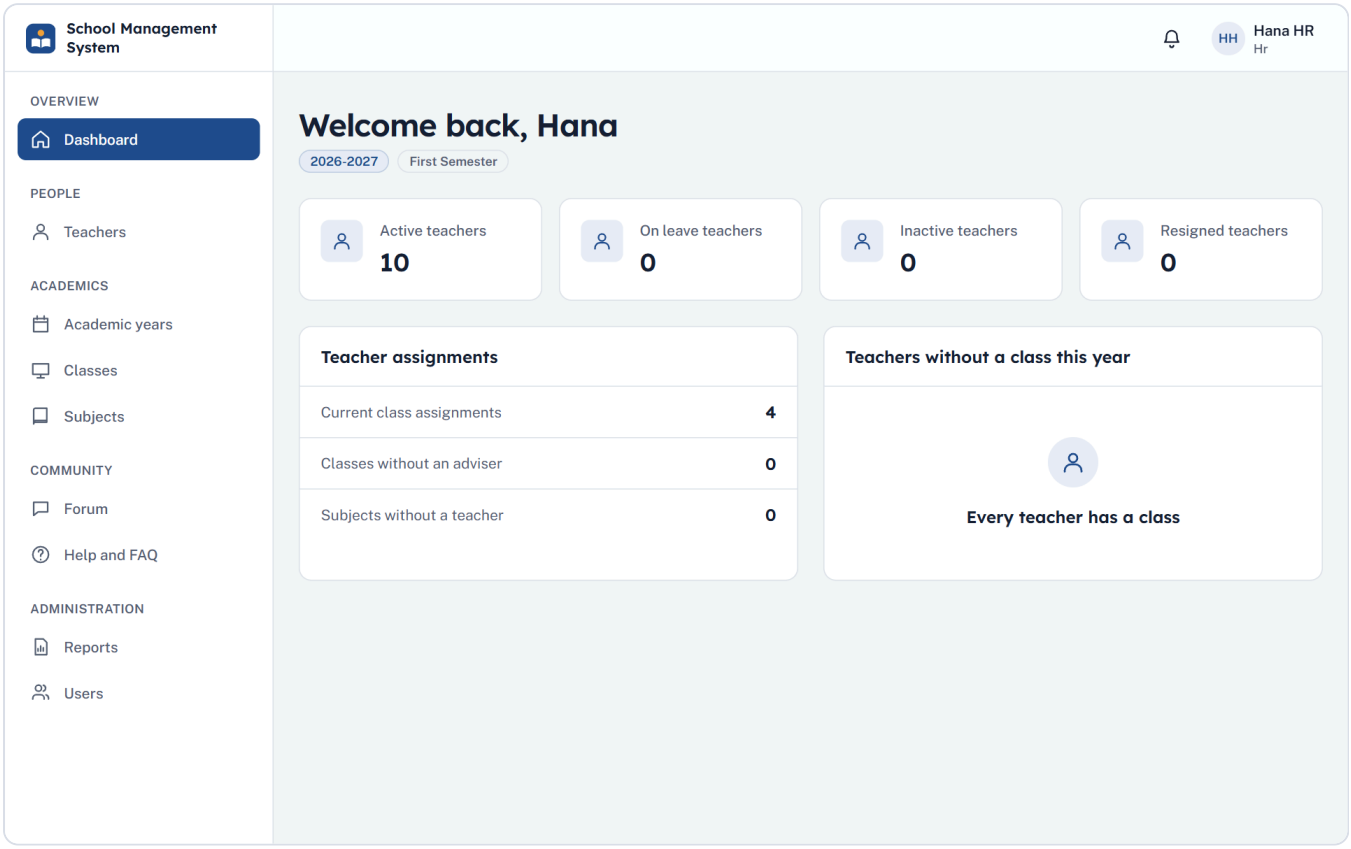

Reported posts waiting for review.

Part 4 · HR staff

HR You manage teacher records and decide which teachers work with which classes.

4.1 Your dashboard

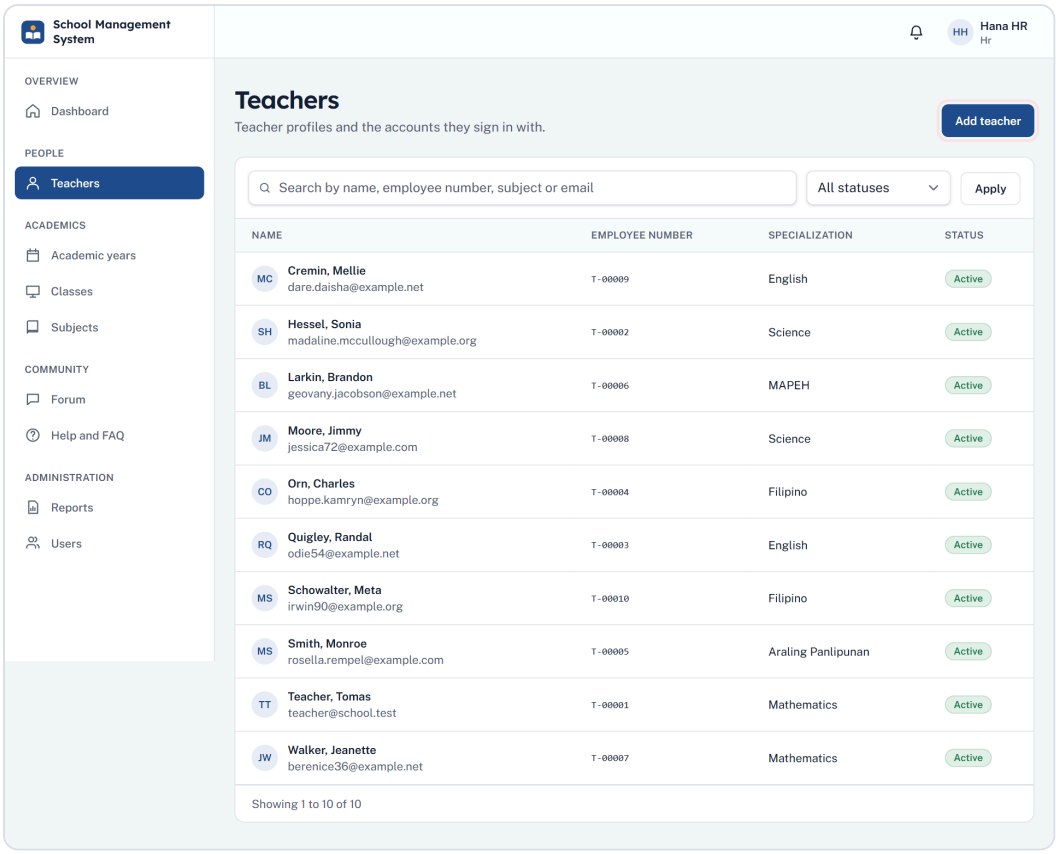

The dashboard shows the current teacher assignments and the **teachers without a class this year**.

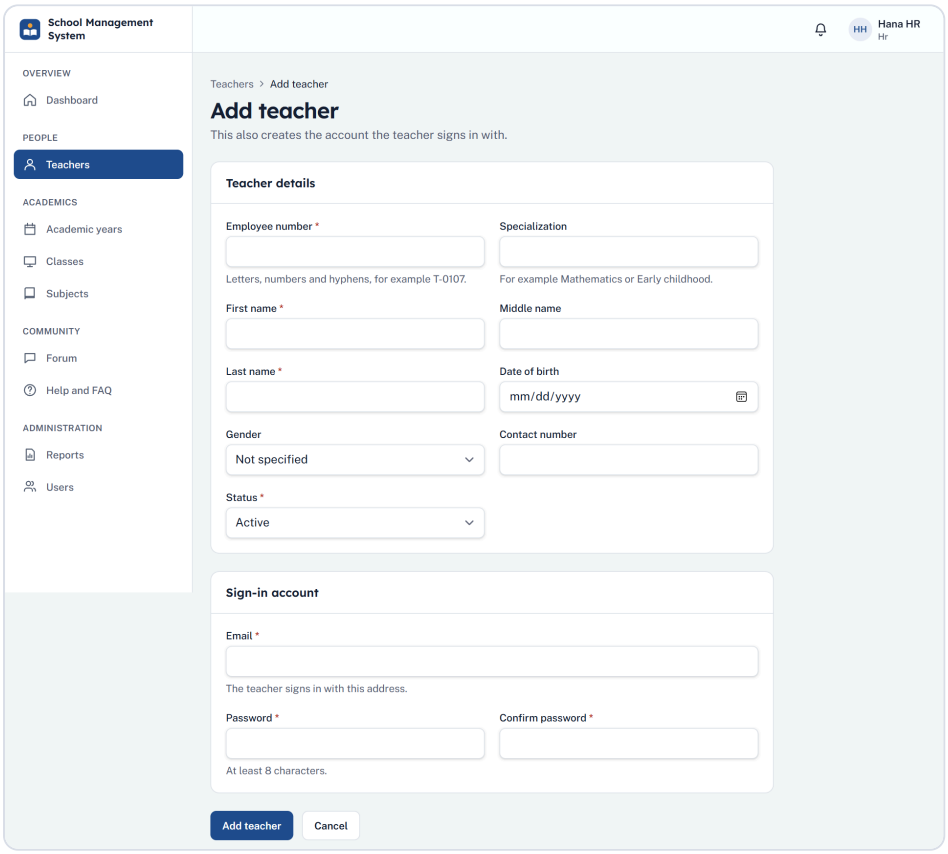

The HR dashboard.

4.2 Add and update teachers

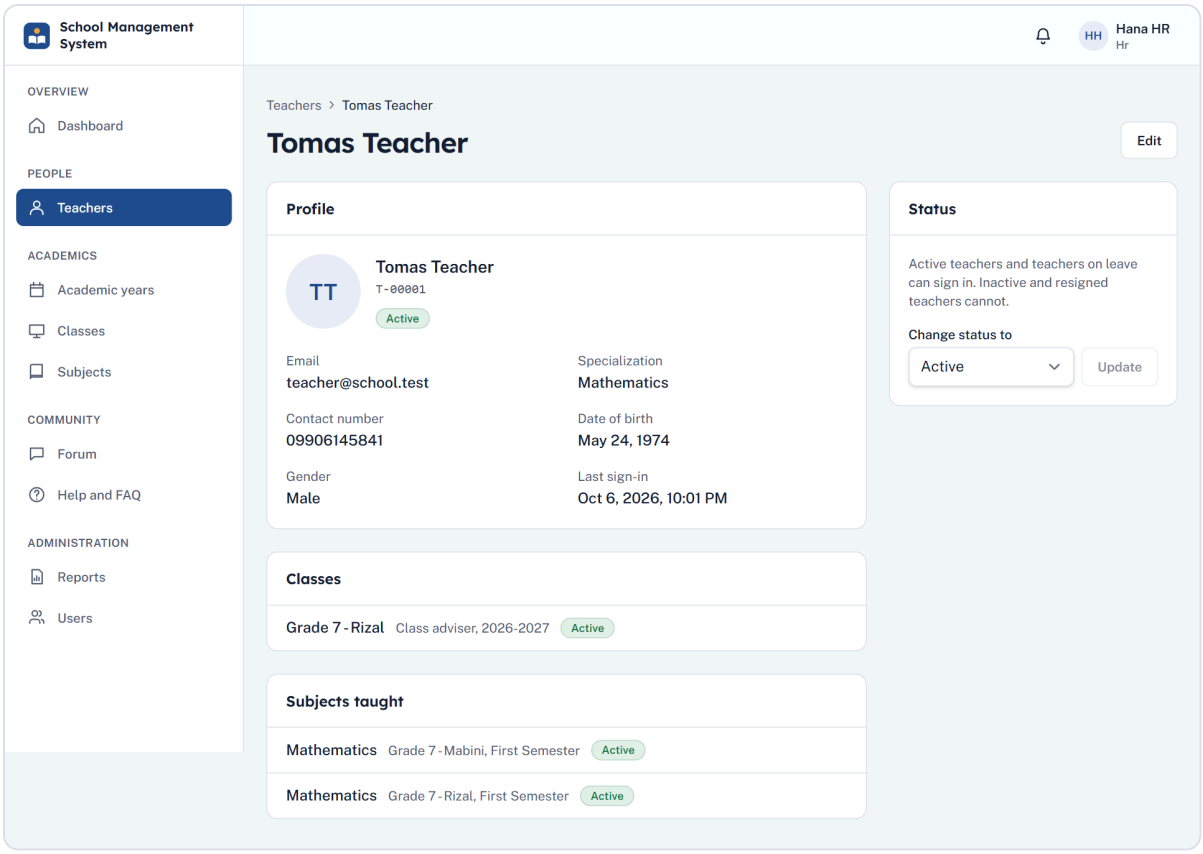

1. Open Teachers. Search or filter the list.
2. Click Add teacher, fill in the details and save. The **Sign-in account** section (email and password) creates the teacher's account at the same time.
3. Click a teacher to see their profile, classes and subjects. Use **Edit** to change details, or change their **status**.

The teacher list.

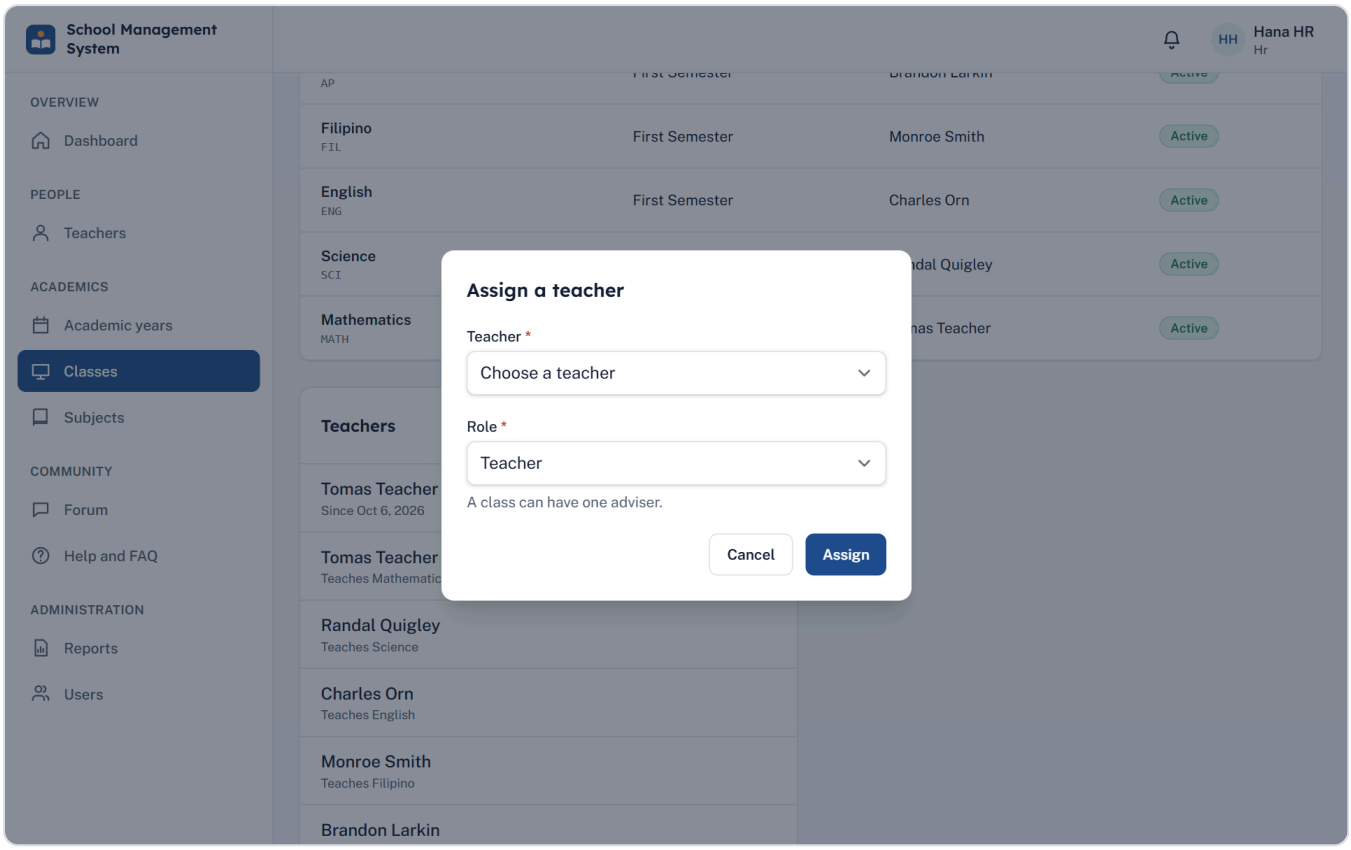

Adding a teacher.

A teacher's profile.

4.3 Assign a teacher to a class

1. Open Classes and click the class.
2. In the **Teachers** section click Assign teacher.
3. Choose the teacher and their role, **Adviser** or **Teacher**, and save. The teacher is notified.
4. To end an assignment, click End next to it. Past assignments stay in the class history.

Assigning a teacher to a class.

4.4 Reports

HR staff can open and download reports, such as teaching loads, in the same way as teachers (see 3.10).

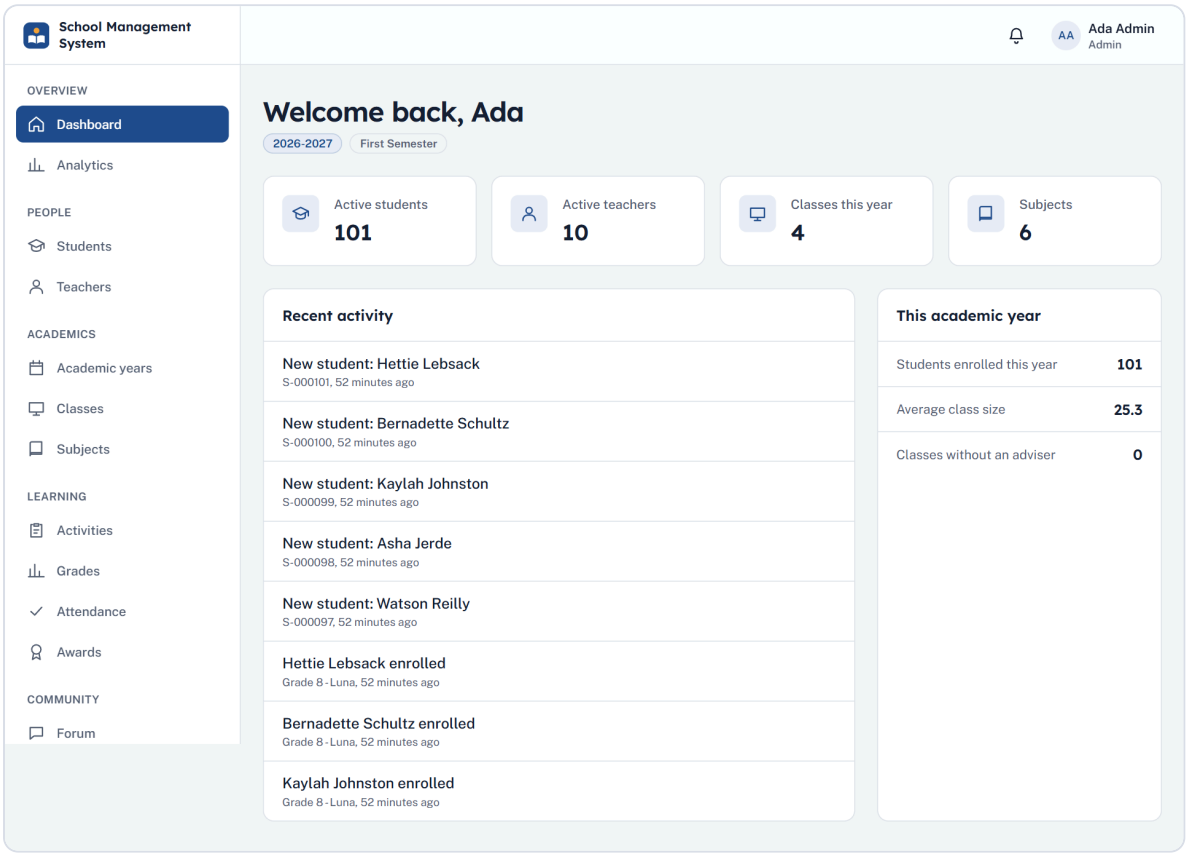

Part 5 · Administrators and super admins

Admin Super admin Administrators can use every module. Everything in Parts 3 and 4 also applies to you.

5.1 Your dashboard

The dashboard shows:

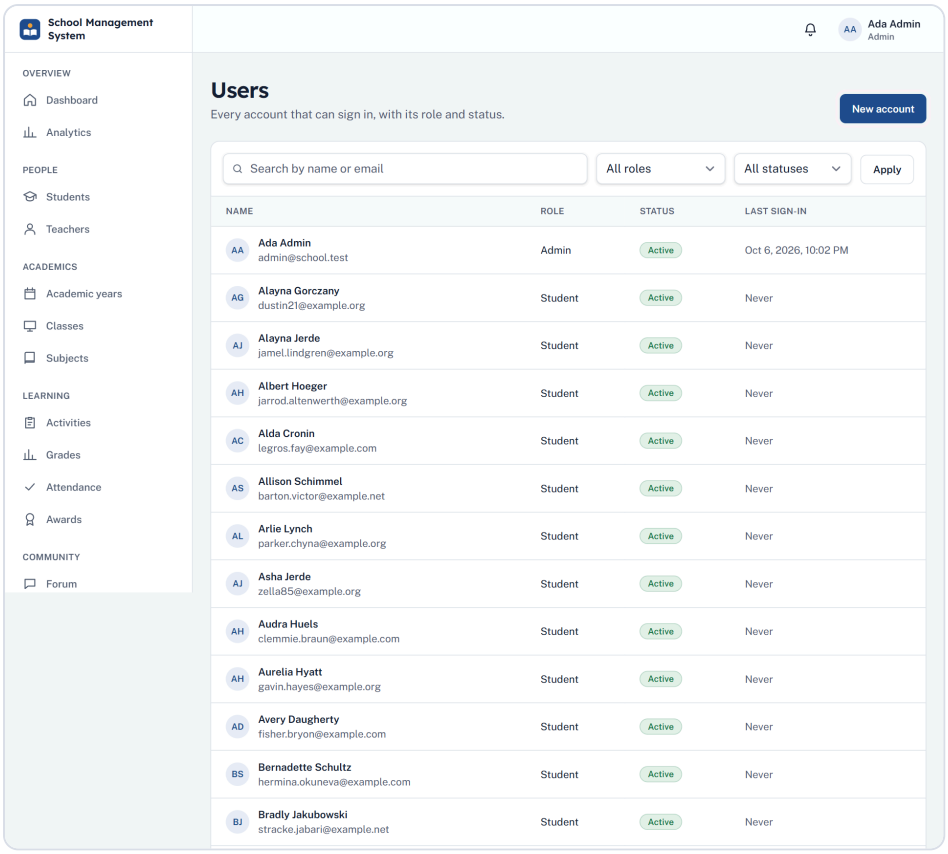

- the active year and term;
- school-wide counts of students, teachers, classes and subjects;
- recent changes;
- figures for this academic year, such as classes still without an adviser.

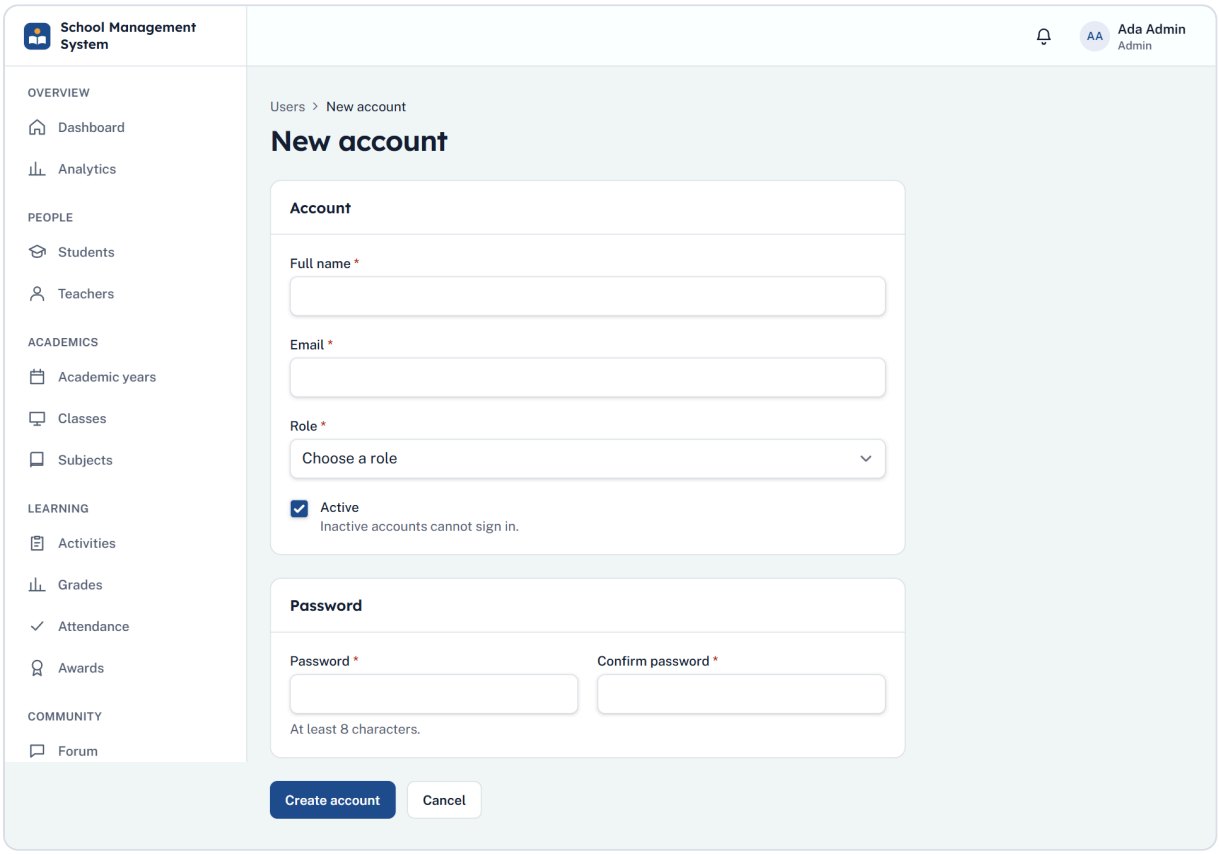

The administrator dashboard.

5.2 User accounts

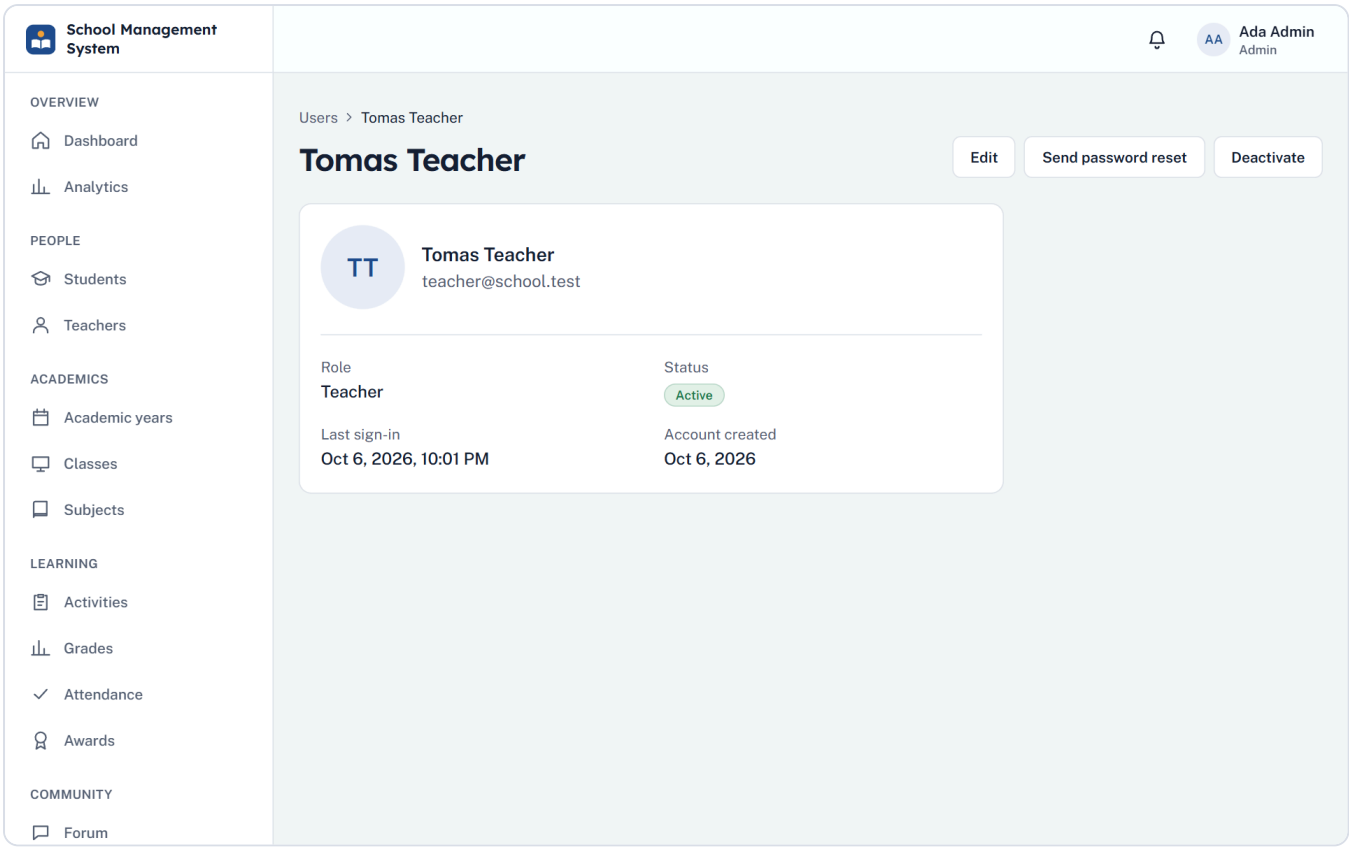

1. Open **Users**. Search by name or email, or filter by role.
2. Click **New account**. Enter the name, email, **role** and a first password, then click **Create account**.
3. Click a user to see their account, change their role, or **deactivate** it. A deactivated account cannot sign in, but its history is kept.

User accounts.

Creating an account.

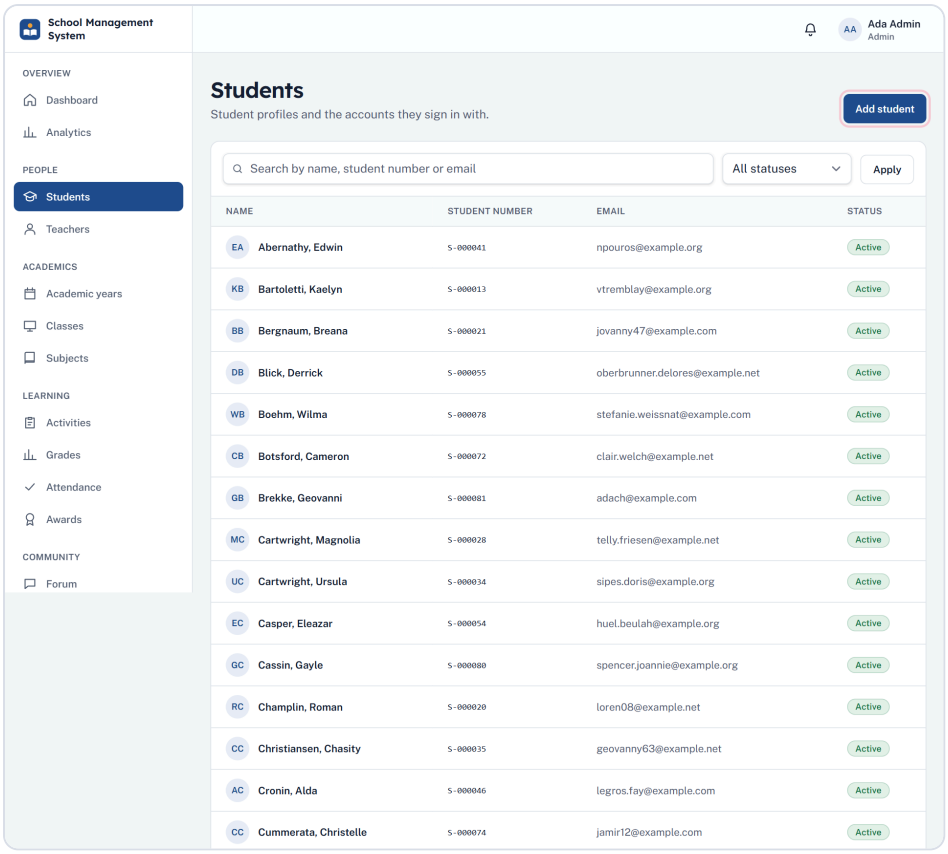

One user's account.

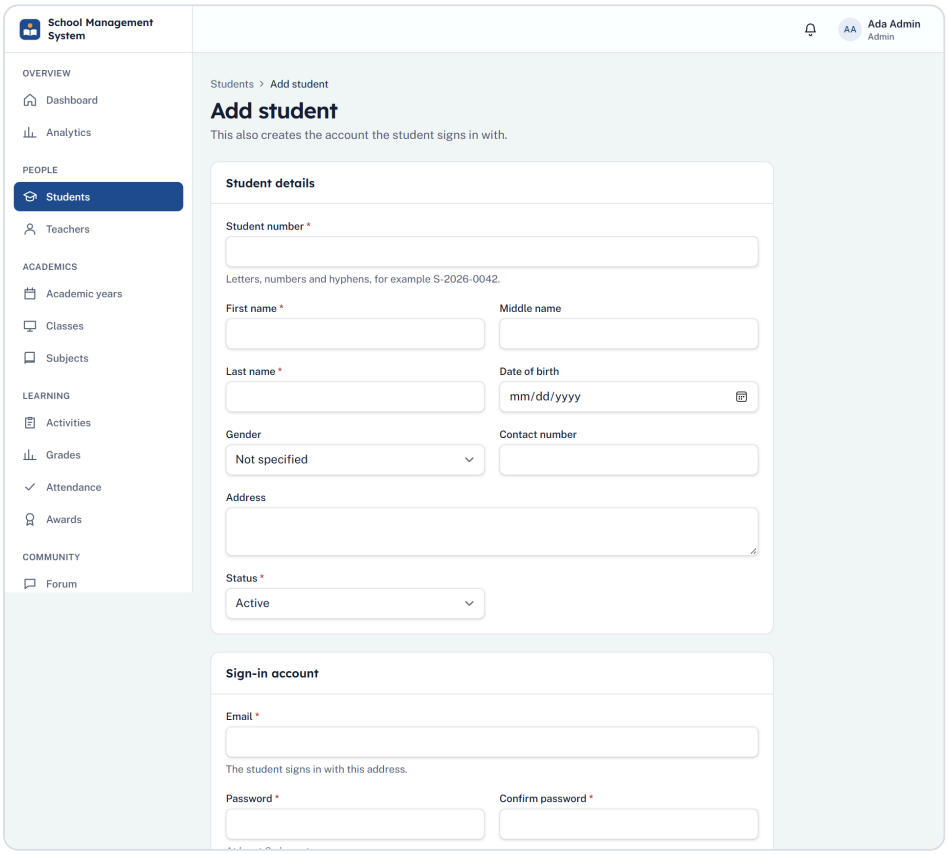

> **Super admins.** Only a super admin can give the **Super admin** role or change another super admin's account. Otherwise the two roles see the same screens.

5.3 Students

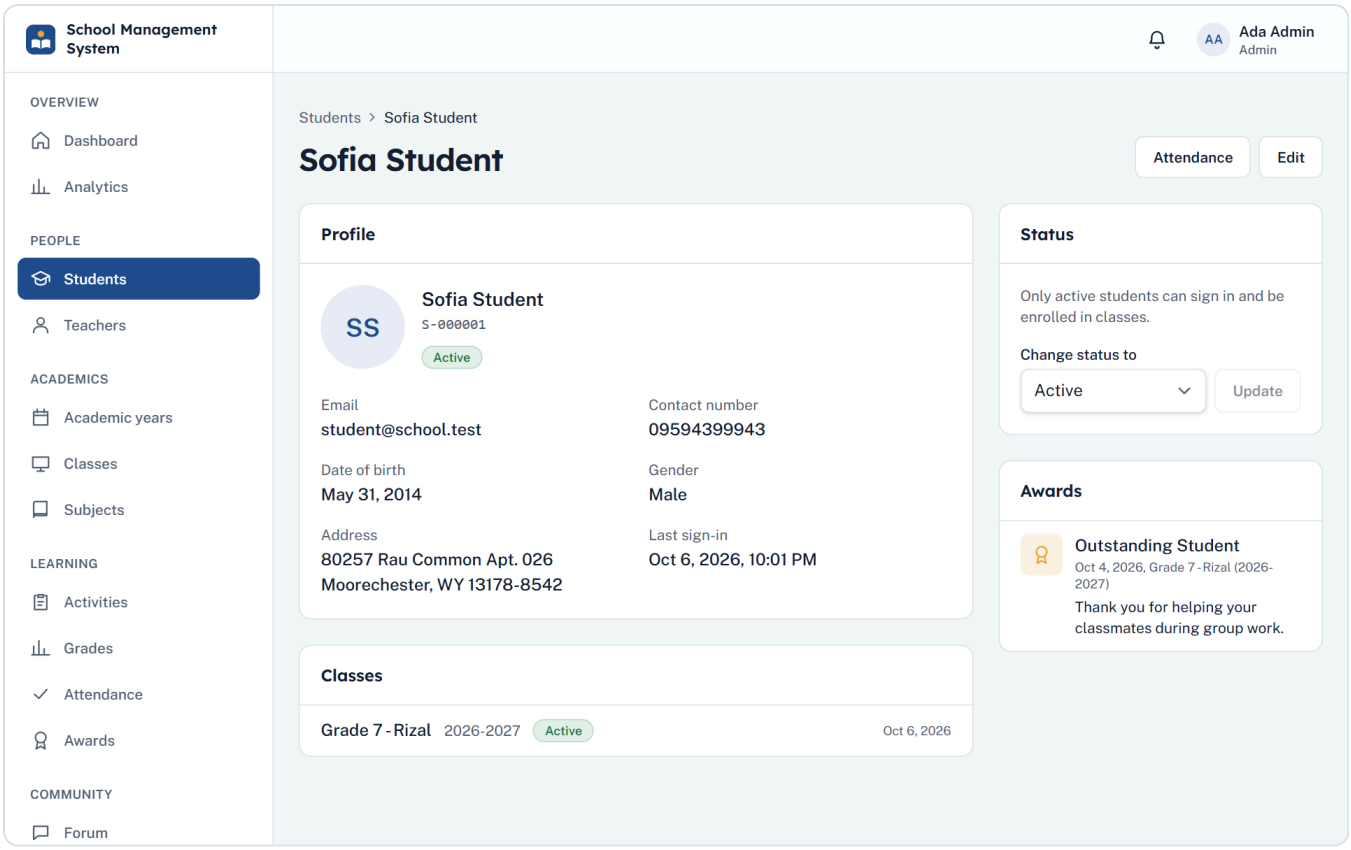

1. Open **Students**. Search by name or student number.
2. Click **Add student**, fill in the details and save.
3. Click a student to see their profile, class history, attendance and awards, and to change their **status**.

The student list.

Adding a student.

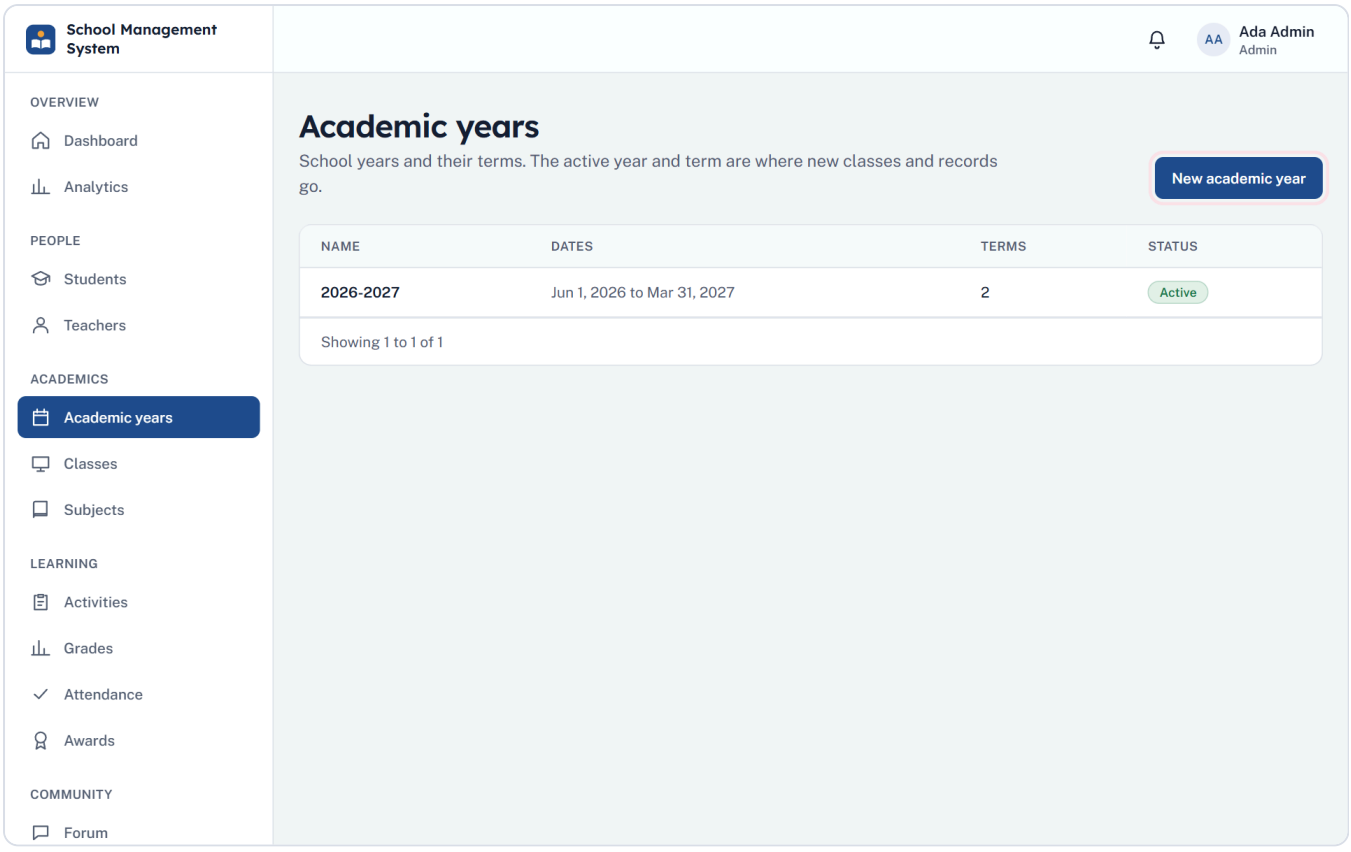

A student's profile.

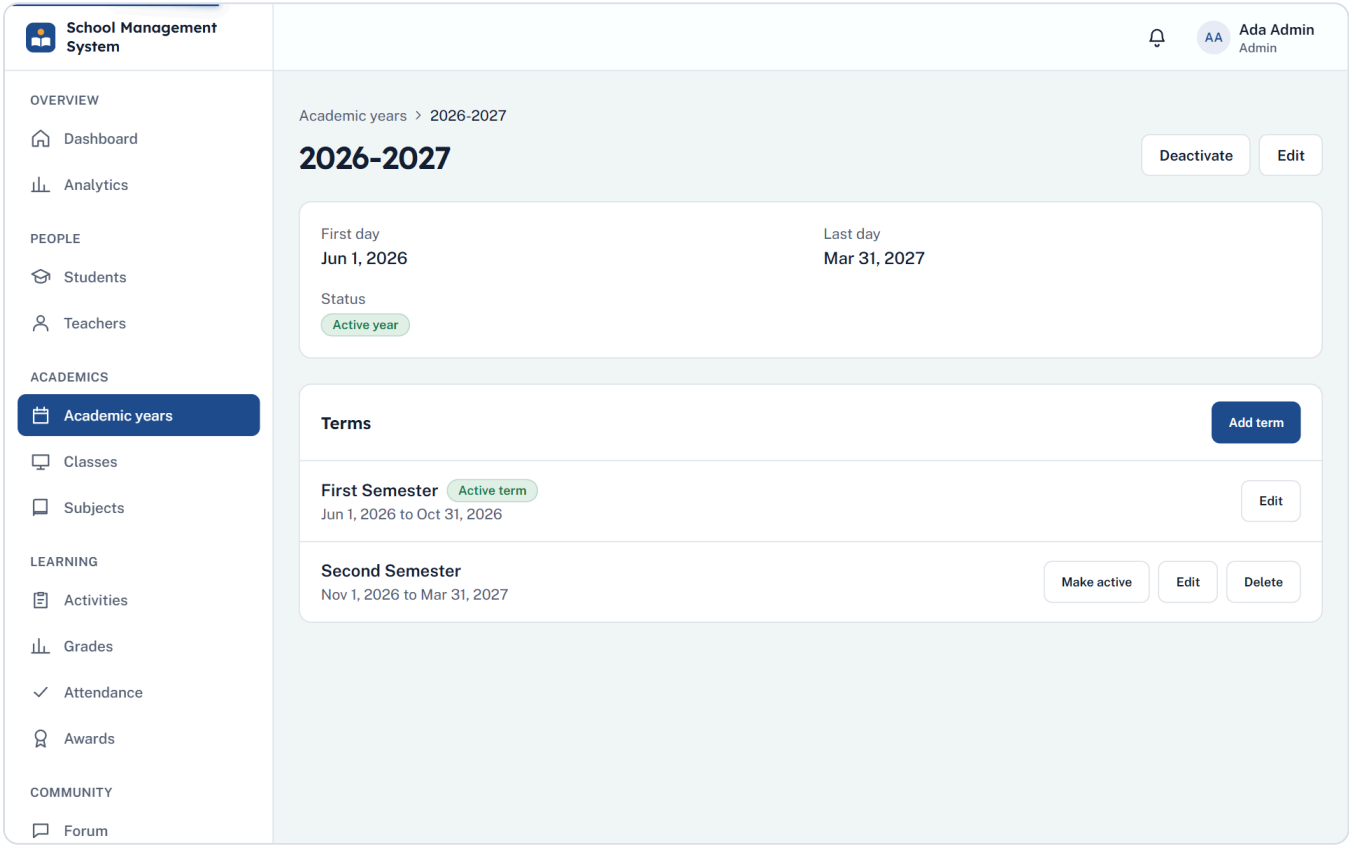

> A student with any history, such as enrollments, work, attendance, grades or awards, cannot be deleted. Change their status instead.

5.4 Academic years and terms

1. Open Academic years and click New academic year.
2. Open the year to add its **terms** (for example, semesters).
3. Set the **active** year and term. Dashboards and new classes use the active ones.

Academic years.

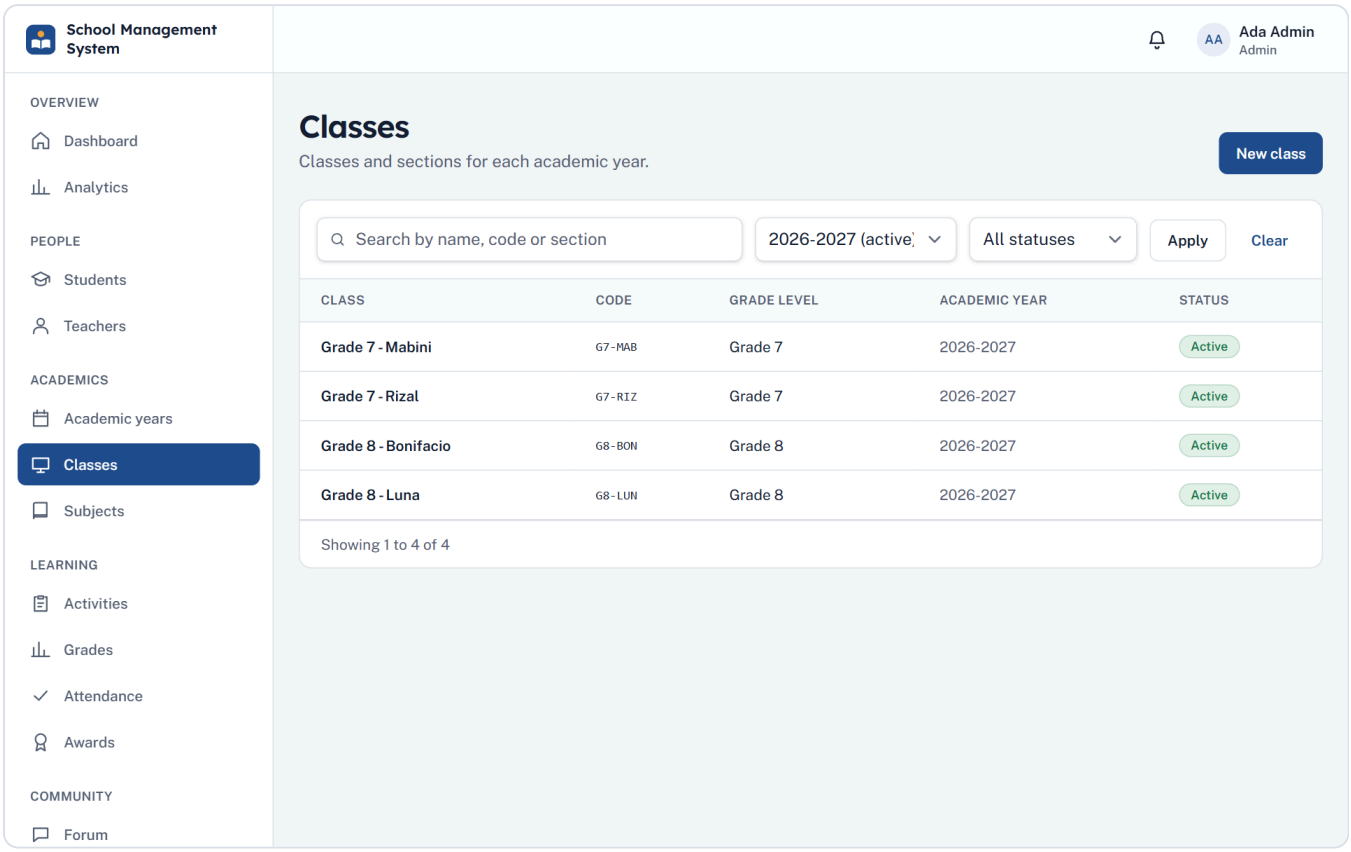

A year and its terms.

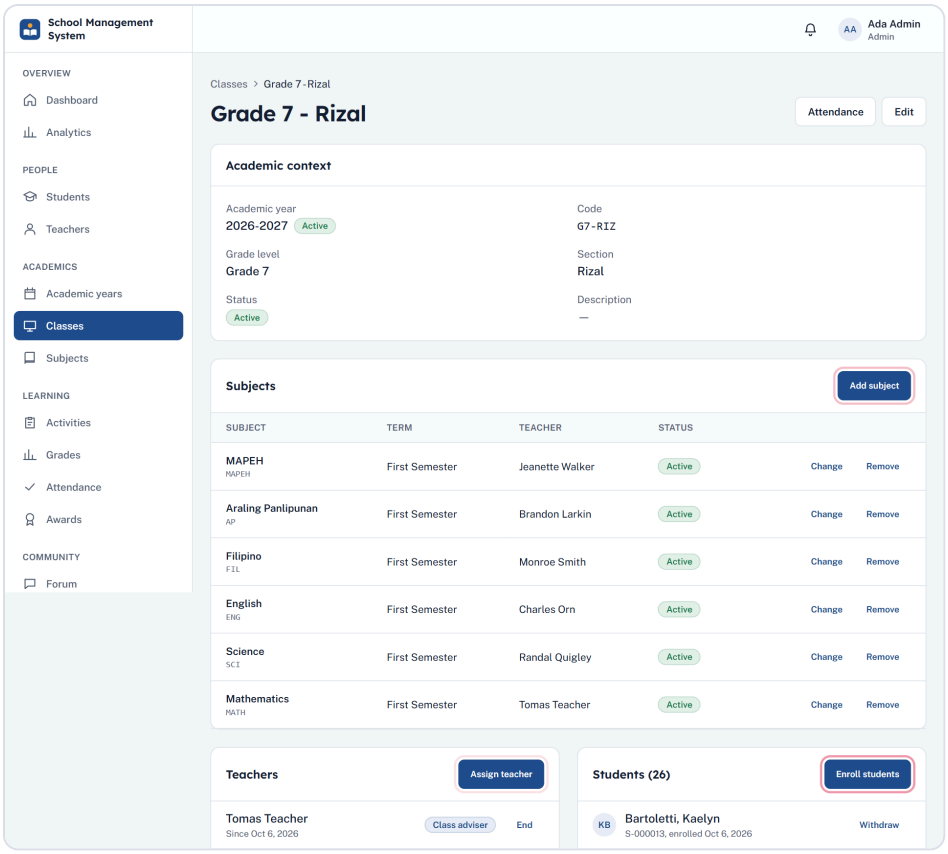

5.5 Classes, subjects and enrollment

Set up a class in this order:

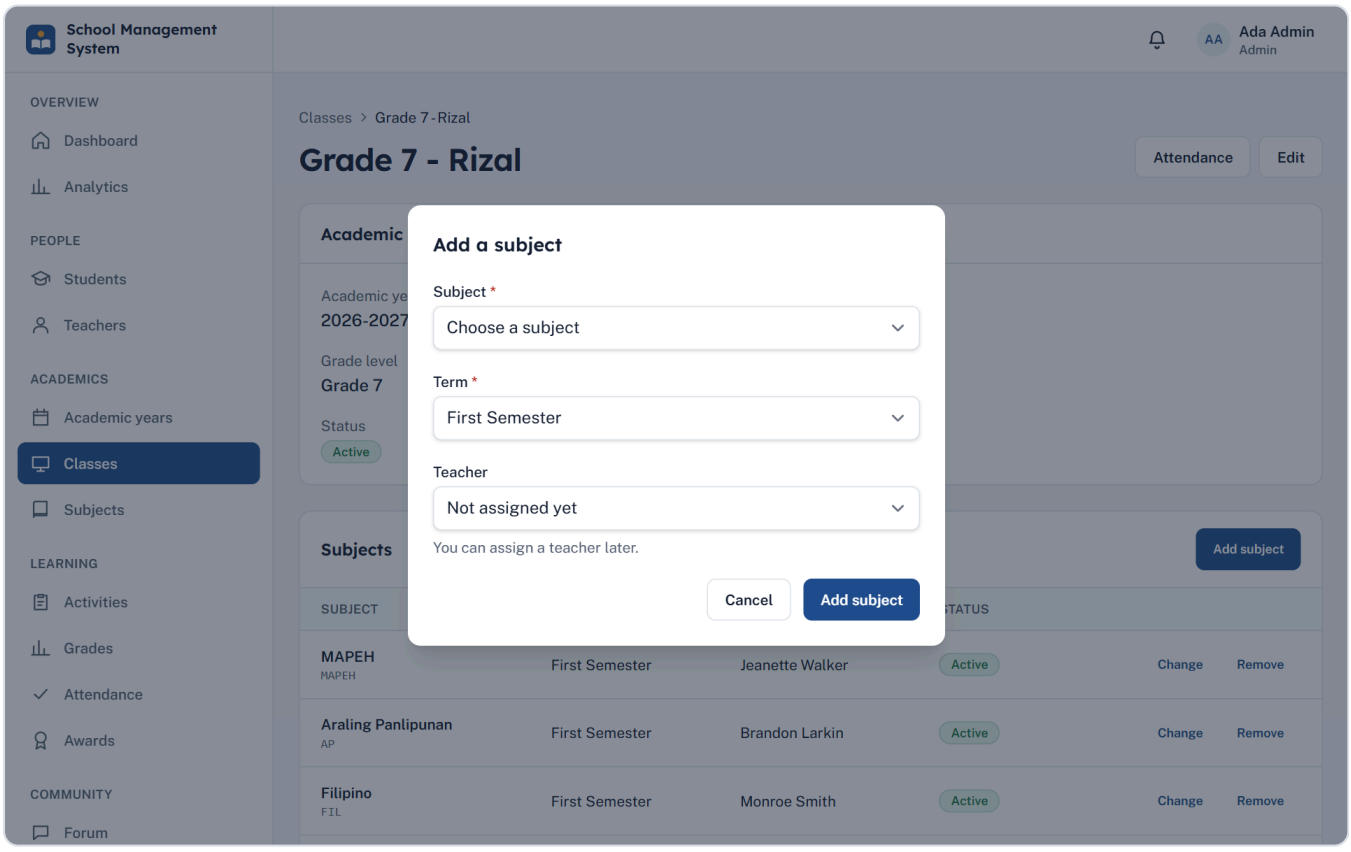

1. **Subjects.** Make sure the subjects exist under **Subjects**, or add them there.
2. **Class.** Open **Classes** and create the class: name, grade level, section and academic year.
3. **Subjects for the class.** On the class page, click **Add subject**. Choose the subject, its teacher and the term. Teachers manage only the subjects they are given here.
4. **Adviser and teachers.** Click **Assign teacher** (see 4.3).
5. **Students.** Click **Enroll students**, search, tick the students and click **Enroll selected**. Use **Withdraw** to take a student out; their history is kept.

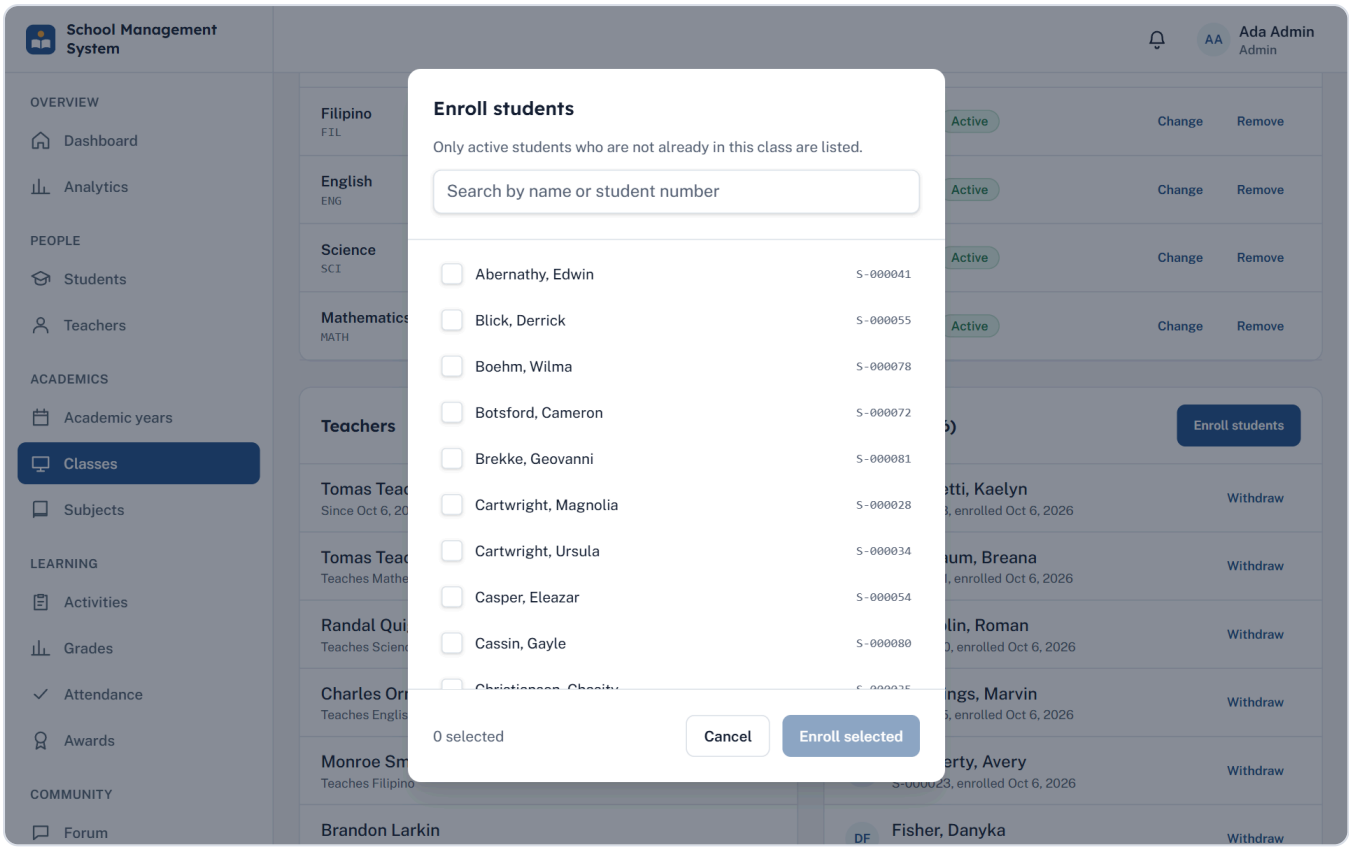

The class list.

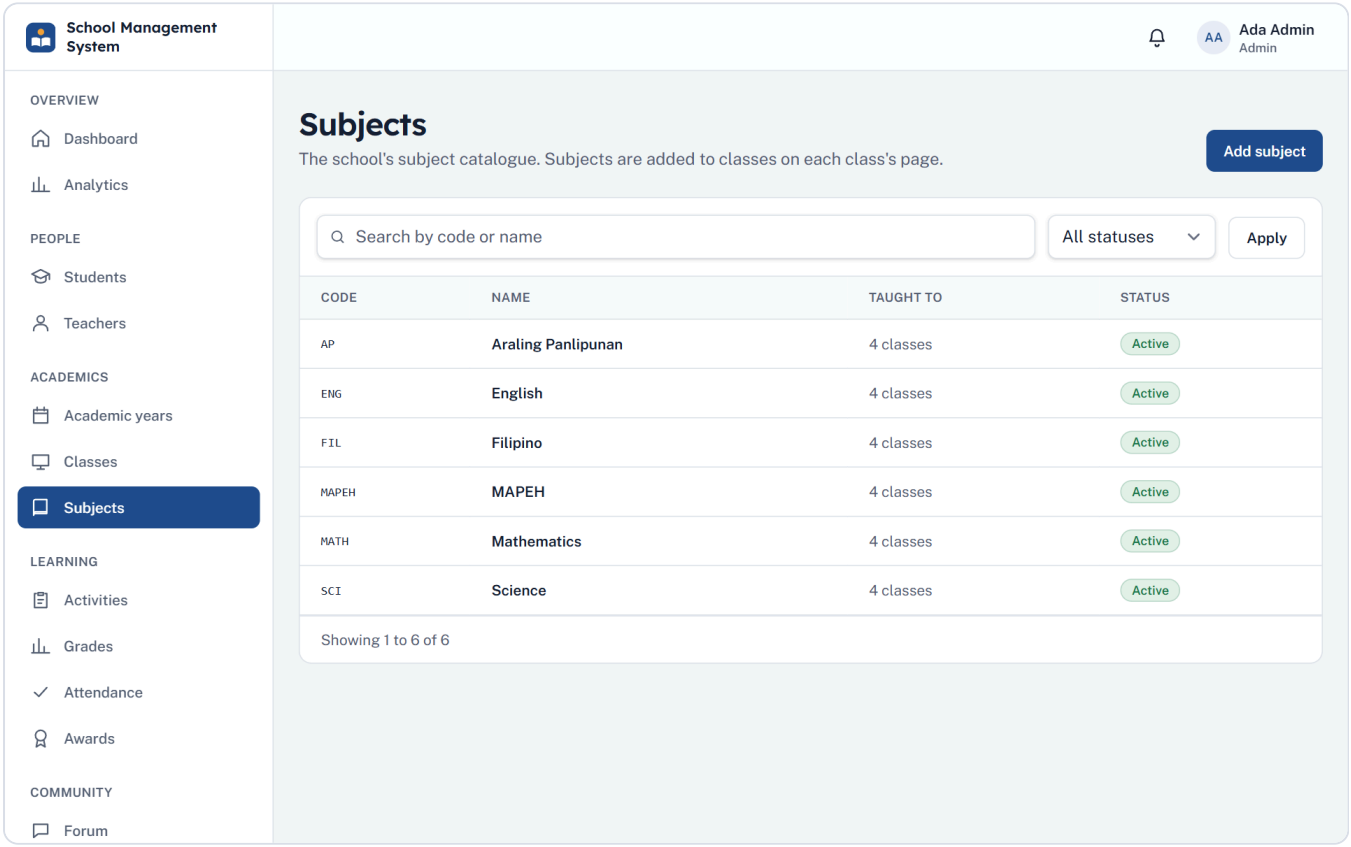

A class page, with **Add subject**, **Assign teacher** and **Enroll students** outlined.

Adding a subject to the class.

Enrolling students.

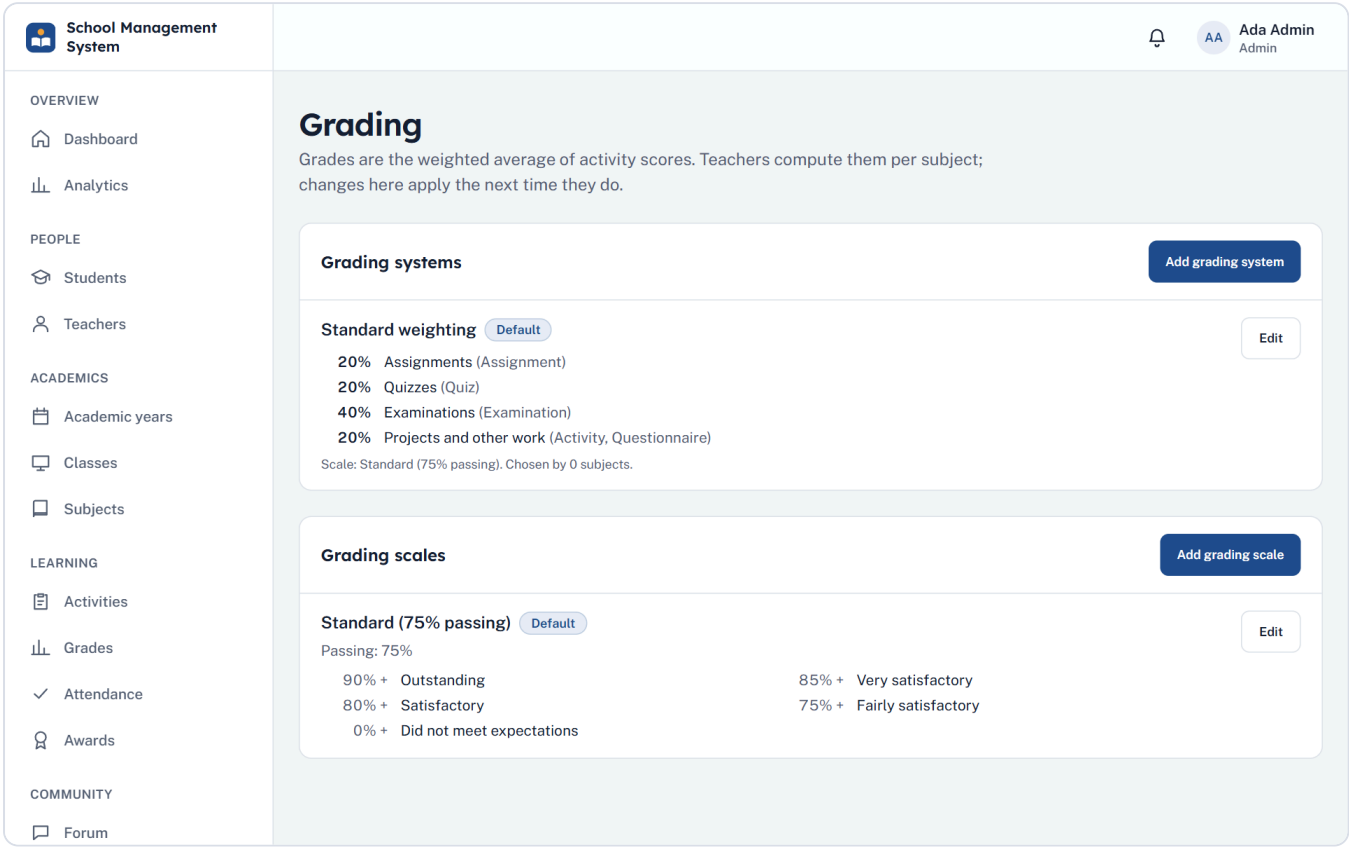

The subject list.

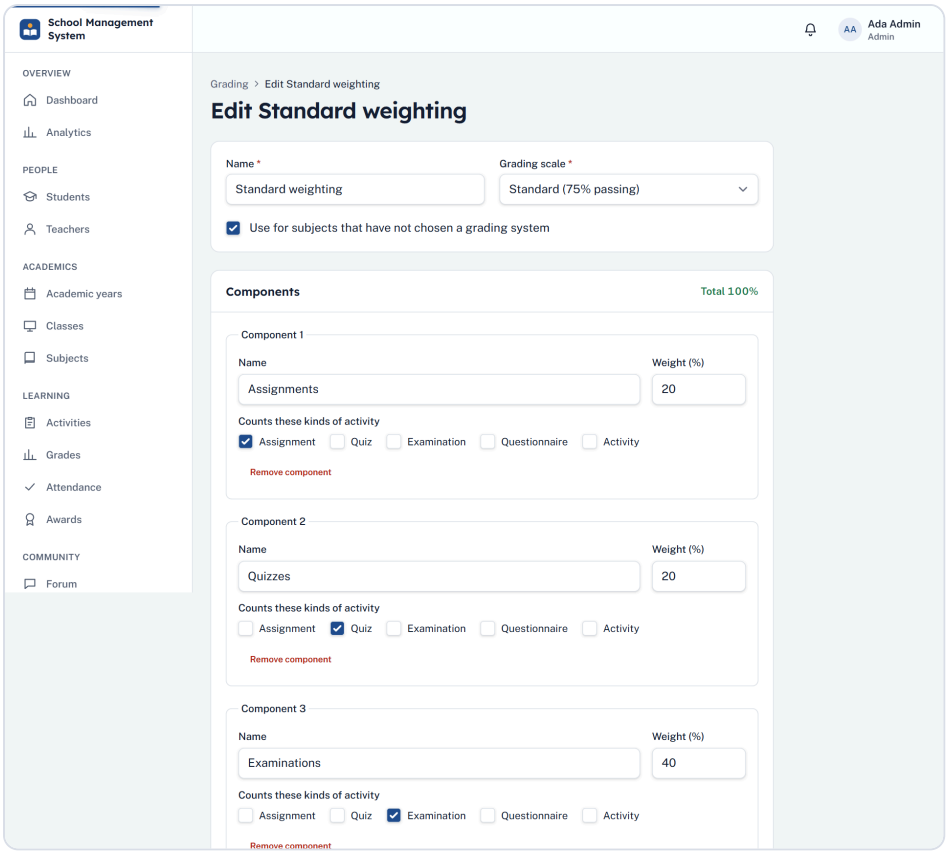

5.6 Grading settings

Open Grading under Administration.

- A **grading system** sets the parts of a grade and their weights, and which kinds of activity count in each part.
- A **grading scale** sets the passing mark and the descriptors. By default:
  - Outstanding: 90 and above
  - Very satisfactory: 85 and above
  - Satisfactory: 80 and above
  - Fairly satisfactory: 75 and above
  - Did not meet expectations: below 75

Grading systems and scales.

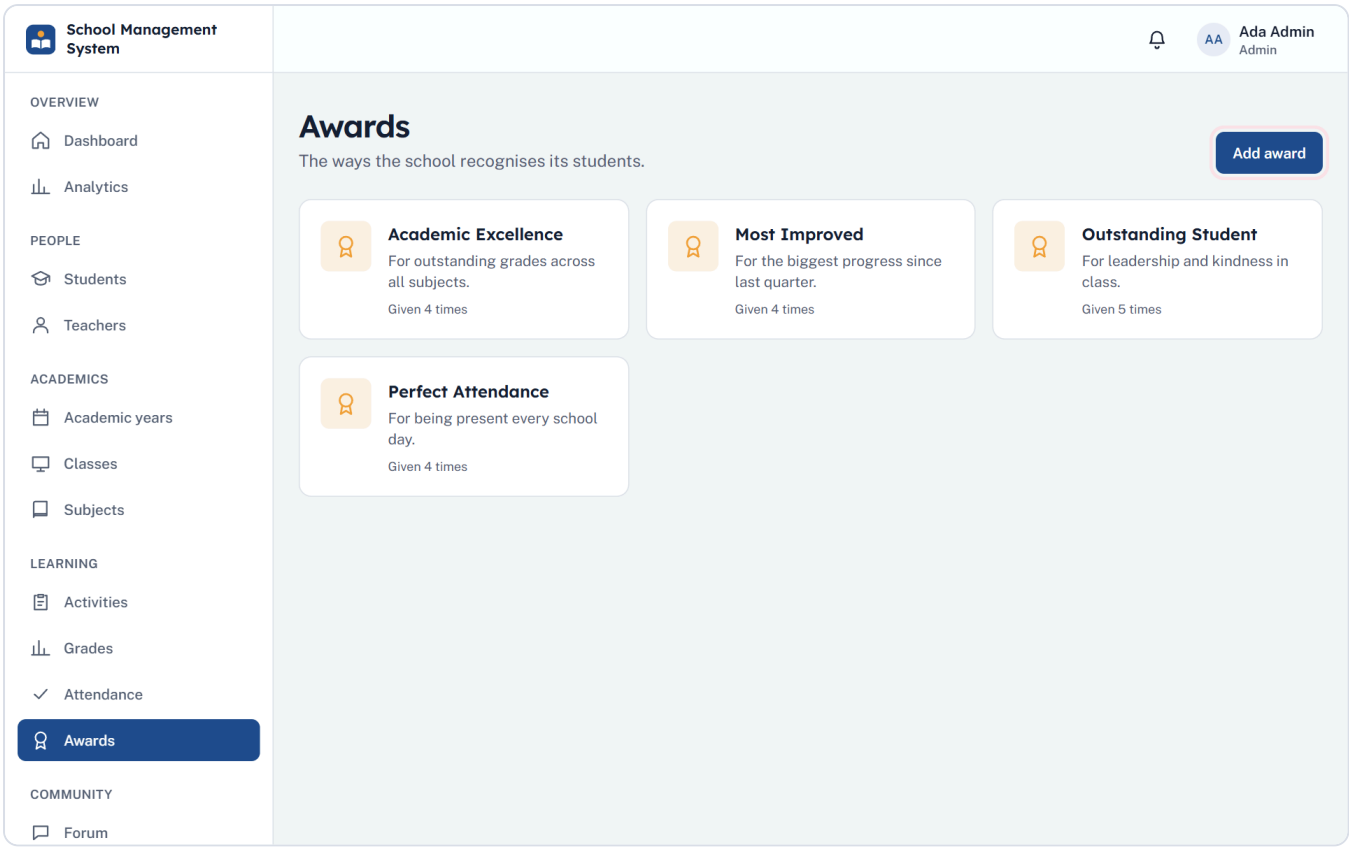

Editing the weights of a grading system.

> New settings take effect the next time grades are computed.

5.7 Awards

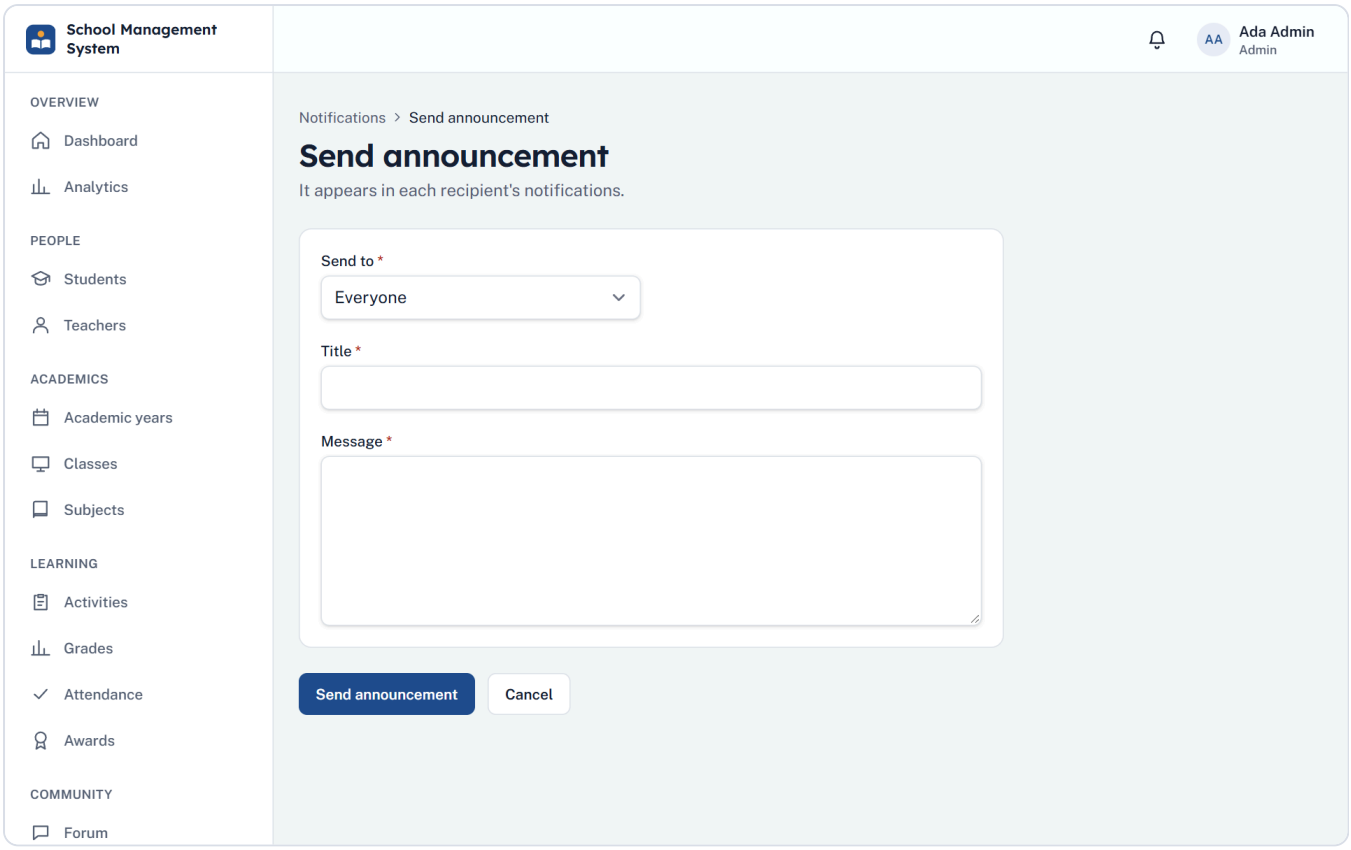

Open **Awards** and click **Add award** to define an award: its name, description, who receives it, and a picture. Only **active** awards can be given. Teachers can then give it (see 3.9). A given award is never deleted. If it was given by mistake, **revoke** it with a reason, and it stays in the student's history.

The awards list.

5.8 Send an announcement

1. Open **Notifications** and click **Send announcement**.
2. Choose who receives it: everyone, one role or one class.
3. Enter the title and message, and send. It arrives as a notification.

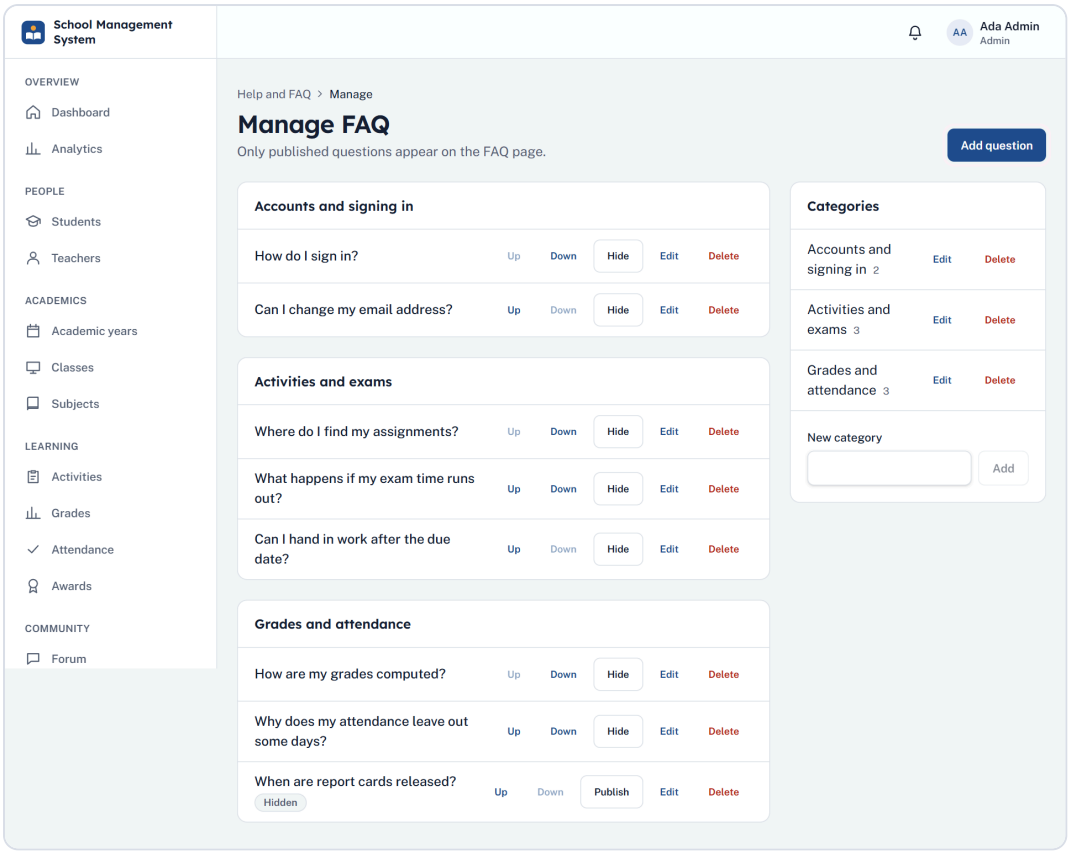

Writing an announcement.

5.9 Manage the FAQ

Open **Help and FAQ** and click **Manage FAQ**.

- Add **categories**.
- Click **Add question** to write a question and its answer.
- Only **published** questions appear on the Help page.

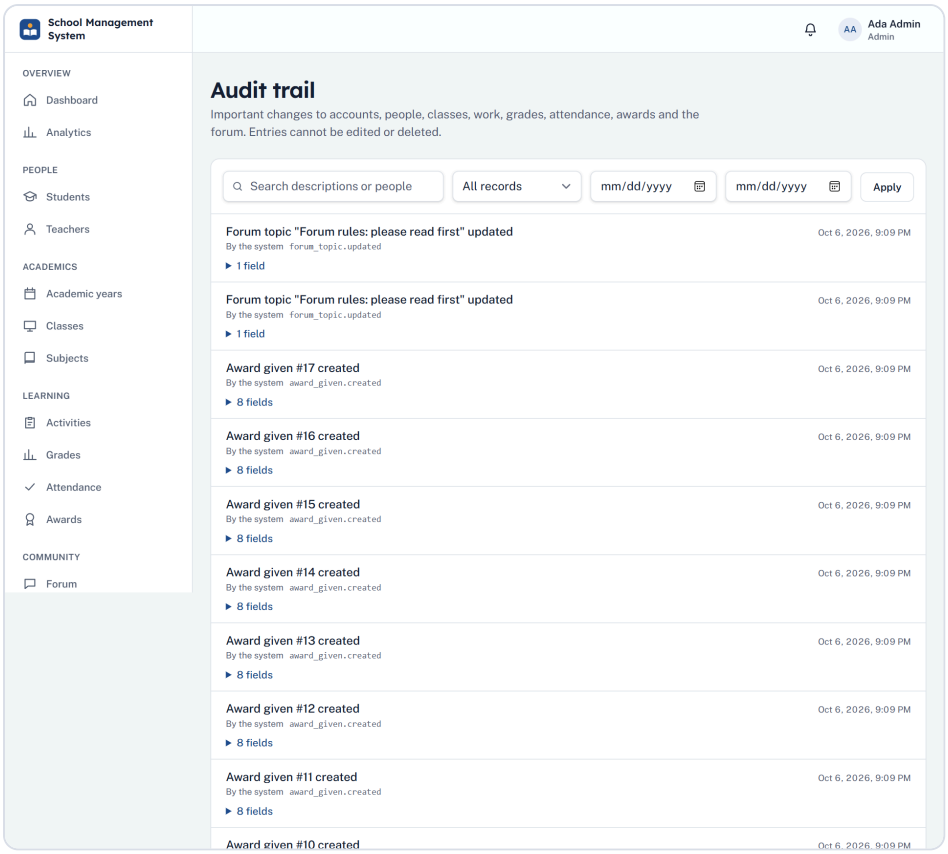

Managing FAQ categories and questions.

5.10 Audit trail

Open **Audit trail** to see who changed what and when. It covers changes to:

- accounts and students;
- enrollments and teacher assignments;
- activities;
- attendance and grades;
- awards;
- forum moderation.

Each entry shows the values before and after. Search by name, or filter by area and date, then click **Apply**. Entries cannot be changed or deleted.

The audit trail.

Appendix · Who can do what

What each role can do as the system is delivered. Teachers and students only ever see their own classes and their own records.
